Preface

Early Muslims were not graduates of universities or religious institutes, but they were normal individuals who understood and contemplated the Holy Quran well. In this book we're trying to understand some verses of the Holy Quran within the context of knowledge of what has happened historically and scientifically over the past fourteen centuries, also to connect them to what came before, in ancient history.

Anyone who reads Quran knows that it addresses more than one level of humankind. This means that in most verses, we find more than one level of understanding the intended meaning. The surface meaning of a verse may indicate one thing, but upon deeper reflection, it reveals a hidden meaning.

What has emerged in various fields of science does not contradict the Qur'an, but further clarifies the intended meaning and thus confirms the credibility of Qur'an even for understanding modern science.

In history, we will give priority of the Qur'an story, as we shall see all copies of Qur'an are the same dating since more than 14 centuries. Surprisingly, this will reveal many pitfalls for the known History.

It is not a fallacy to consider the Qur'an as a living entity and a constantly renewed miracle of GOD, informing us of future sensory and scientific miracles of what will happen throughout time.

Indeed, we will find that the Quran addresses humanity in all aspects of life and beyond.

However, in this work, we will focus on science & history, in both we will find surprises!

Hence the title:

“Stunning Verses”

Surah El-Baqara: 2-2:

Strange enough the Holy Qur'an begins by a challenge!

This method was not adopted at those early times, especially for an emerging religion. But recently, it has already been proven to be a strong eloquent method so that you put each idea into test and see if this result is compatible with the results known at that time. Then to confirm certain concepts, whether scientific, historical or social, and what is more amazing that the data or ideas stated, are still valid for centuries, even over time all along 14 centuries (as we shall see).

ذَٰلِكَ الْكِتَٰبُ لَا رَيْبَ فِيهِ هُدًى لِّلْمُتَّقِينَ ﴿٢﴾

Meaning: This is the Book in which there is no doubt, a guide for the righteous.

One of the earliest Qur'an writings dated since the seventh decade was found at Birmingham university library proven by carbon isotope 14 denoting its age around 1370 years old written between 568-645 A.D, which proves that the wholly Qur'an was collected and written at prophit Muhamed times, in other words, not changed all the way through 14 centuries.

What is astonishing also that its written on an animal leather in one of the oldest versions of Arabic dilects (Hegazi handwriting -with no dots)

It's amazing that up till now there is only the same version of the Qur'an which was not changed all over time, proving that its mere words of GOD. We can put this challenge into a test (falsification theory), if we imagine the Surah number as (X) axis, Verse number as (Y) axis, Altitude or level above or below the see level as (Z) axis, and time as a factor (T) axis according to special relativity theory, this means as you read now this verse so this will be $\{x_1, y_1, z_1, t_1\}$ if we compare this to the same verse number read in any book at the same time in Egypt, Sweden, Canada or Japan .. it will be the same verse (recitation),

in addition if we go back in time and ask anyone who reads Qur'an frequently, it will be the same (linguistic in Arabic). Also, if he was reading another verse, in an airplane or submarine {X₂, Y₂, Z_n, T_n} it will be the same recitation for this verse. The same can be applied even if it is years or even centuries back, as GOD assured in Qur'an that all over time, he will be the savior of Qur'an (recitation & meaning).

This is for the linguistic part, but for comprehension, it is much more challenging as within the same text meanings become clearer & matching with knowledge of each era!. What is really amazing, that the following verses to this one we can actually see this challenge in progress in, but in both ways!

The so-called Codex Parisino-petropolitanus formerly conserved portions of two of the oldest extant Quranic manuscripts. Most surviving leaves represent a Quran that is preserved in various fragments, the largest part of which are kept in the Bibliothèque nationale de France, as BNF Arabe 328(ab). Forty-six leaves are held at the National Library of Russia and one each in the Vatican Library (Vat. Ar. 1605/1) and in the Khalili Collection of Islamic Art.

Qur'an manuscript dating more than 1400 years, still the same exact words.

El-Baqara: 2-30.

In this verse as if GOD interacts to something, mostly was not favored to go on. At the beginning of this verse: " اذ قال " actual translation "Then GOD said", this gives an idea that this was a response for something going on (strangely "Then" sounds like " اذ and can be driven of it!). Angels were spoken to in this verse, and their response denotes that they have witnessed a lot of killing & blood shed!

The second notice about this verse which gives idea is: " خليفه " meaning: successor! This means that someone or some kind will die or vanish and another will be in his place. In the verses following this one till "2-38" GOD explains that he taught Adam to be able to fit in this mission. Can this explain that before the existing mankind the presence on earth of another species! Meanwhile, the sudden disappearance of pre-historic creatures.

Actually, in many verses of Qur'an GOD states that he destroyed previous nations to mankind as they did not obey his orders and did a lot of killing & got corrupted, verses: 29-34-8, 40-82. In fact there are direct orders from GOD to mankind, to search & find on earth prehistoric evidences that denotes the sudden destruction of previous civilizations. Actually, there are many verses that clarify that there were very advanced civilizations, yet this wasn't excuse for GOD punishment as they got corrupt.

وَإِذْ قَالَ رَبُّكَ لِلْمَلٰٓئِكَةِ اِنِّىْ جَاعِلٌ فِى الْاَرْضِ خَلِيْفَةًۭ قَالُوْۤا اَتَجْعَلُ فِيْهَا مَنْ يُفْسِدُ فِيْهَا وَيَسْفِكُ الدِّمَآءَ وَنَحْنُ نُسَبِّحُ بِحَمْدِكَ وَنُقَدِّسُ لَكَۙ قَالَ اِنِّىْۤ اَعْلَمُ مَا لَا تَعْلَمُوْنَ ﴿۳۰﴾

Meaning: When your Lord said to the angels, "I am placing a successor on earth." They said, "Will You place in it someone who will cause corruption in it and shed blood, while we declare Your praises and sanctify You?" He said, "I know what you do not know

Massive stone pillars at Göbekli Tepe, in southeast Turkey, erected for ritual use by early Neolithic people 11,000 years ago

The Pre-historic era refers to the time in human history before the advent of written records, beginning with the first known use of stone tools by hominins around 3.3 million years ago and lasting until approximately 3100 BC, when recorded history began. This period encompasses significant developments in human evolution, culture, and technology.

El-Baqara: 2-61:

The important issue about this verse is trying to avoid extreme luxury and vanity, for all mankind not only for Moses people to as this can easily lead to corruption, which is stated directly by GOD in verse (17:16), and to be always thankful to GOD. This story starts by Moses & Israelites escaping from Pharoah and his soldiers (this escape was stated in this Surah verse 50), as will be discussed later Pharoah could have drowned in El-Yam - part of the Nile river in the present day Sudan (was part of Egypt).

There are many remarks in this verse:

The first: is "تَنْبِتُ الْأَرْضَ" this means that they are in a rainy land but not a desert but with no plants as desired by the Israelites.

The second major remark is Moses order for the Israelites to descend from this elevated rainy plateau to a land where the desired food is present, this can be a hint that there was no Exodus (at that time Egypt extended till the Nile roots in Abyssinia).

Third: Mentioning Egypt in this way which is the only time in the whole Qur'an to be mentioned in this (مصرًا) way giving a clue that you will descend to many countries one of them is Egypt! (if they were in Saina, it could have been just Egypt in the normal written way, مصر), also the usual way in Qur'an, also Egypt was known as upper or lower Egypt according to Nile flod)

Fourth: They were ordered to descend to a lower level land, meaning that they were in a raised rainy plateau than the sea level of lower Egypt, Abyssinian plateau is a perfect match that combines all these

criteria, not a desert open place that where they can be easily found as in Sainai.

So, in this way it was easier to Moses & the Israelites to escape from pharaonic Egypt in a southward direction following the river Nile to ensure the presence of food & water supplies for everyone, also so that their footsteps will not be discovered easily, particularly that Pharaoh & soldiers drowned in "Al-Yam" which is close to Abyssinia.

This possible explanation tells why they didn't go to the promised land (being far) also refutes that they were lost in Sainai (closer to the promised land). Also, explains why they were lost for 40 years (new land for them) in addition within this region as stated in (verse 63) that the GOD elevated the "Tur" mountain above the Israelites as a threat in order to let them oath. The "Tur" mountain in Abyssinia is a further evidence, also this verse denotes that Israelites returned to their homes in Egypt, even it describes what they will do then, killing Prophets & disobeying GOD (these actions were manifest in Egypt as will be discussed based on Qur'an verses).

وَإِذْ قُلْتُمْ يٰمُوسَىٰ لَنْ نَصْبِرَ عَلَىٰ طَعَامٍ وَاحِدٍ فَادْعُ لَنَا رَبَّكَ يُخْرِجْ لَنَا مِمَّا تُنْبِئُ الْأَرْضُ مِنْ
بَقْلِهَا وَقِثَّائِهَا وَفُومِهَا وَعَدَسِهَا وَبَصِلَهَا ۖ قَالَ أَتَسْتَبْدِلُونَ الَّذِي هُوَ أَدْنَىٰ بِالَّذِي هُوَ خَيْرٌ
أَهْبِطُوا مِصْرًا فَإِنَّ لَكُمْ مَّا سَأَلْتُمْ وَضُرِبَتْ عَلَيْهِمُ الذِّلَّةُ وَالْمَسْكَنَةُ وَبَاءُوا بِغَضَبٍ مِنَ اللَّهِ
ذَٰلِكَ بِأَنَّهُمْ كَانُوا يَكْفُرُونَ بِآيَاتِ اللَّهِ وَيَقْتُلُونَ النَّبِيِّينَ بِغَيْرِ الْحَقِّ ۚ ذَٰلِكَ بِمَا عَصَوْا وَكَانُوا
يَعْتَدُونَ ﴿٦١﴾

Meaning: And recall when you said, "O Moses, we cannot endure one kind of food, so call to your Lord to produce for us of what the earth grows: of its herbs, and its cucumbers, and its garlic, and its lentils, and its onions." He said, "Would you substitute worse for better? Go down to Egypt, where you will have what you asked for." They were struck with humiliation and poverty, and incurred wrath from God. That was because they rejected God's revelations and wrongfully killed the prophets. That was because they disobeyed and transgressed

Our master Abraham has a special and revered status in most heavenly religions. The story of our master Abraham in the Holy Quran comes in several stages, and we can learn a lesson from each stage. For example, in his youth, he tried to prove to his father that idols neither benefit nor harm, so he broke most of them. His father and the people of the village prayed to burn him! Following this era, we find that offering human sacrifices to please the gods – especially children - is a common occurrence, as in Ba'al (present since then)!

Those who follow the stories of our master Abraham find that he uses experience and reason to reach conclusions. God, informs our master Abraham - at a young age - that His power is greater than their plots, and so He commanded the fire not to burn our master Abraham. In nearly a similar event after Abraham dreams of sacrificing his son Ishmael, God Almighty redeemed our master Ishmael with a great sacrifice. The evidence in these two incidents is that God forbids this custom (offering human sacrifices), and the most likely explanation is that it is due to the intervention of Satan.

Therefore, we find, for example, that Satan worshippers, even today, are keen on this rejected tradition, even till today as Ba'al worshippers! Anyone who follows the story of Abraham's guidance to faith will find it based on logical experiences, including his attempt to convince himself of a star (Saturn), then the moon, then the sun. In a later section his visit to Egypt was carved on the wall of a tomb (Beni Hassan ancient Egyptian tomb) in the same manner, and in order to convince him, GOD told him to bring a bird,slaughter it, and place a piece of it on every mountain. Then he would call them, and they would come to him flying. And here GOD's proof to him was complete. In this noble verse, GOD clarifies to us that He made His Sacred House, since its inception, so that monotheists would make pilgrimage to it, and this would be a reward for them - and from this we understand that even in the period before our masterAbraham - as evidenced by the fact that He only raised the foundations of the House (which were already present). In this verse, He presented the making of the House

a place of assembly for the people before making the Station of Abraham a place of prayer, and that he (with Ishmael) would purify the House for the monotheists and bow and prostrate, The question here is:

Who performed the Hajj to the House before this period?

The answer: Monotheists, descendants of Adam, since the first message to the first prophet after him, Idris, in Egypt.

The Pyramid Texts and their monotheistic hymns example of this. One of the most surprising things that happened in the ninth century AD, during the changing of the Kaaba's covering and renovation work at the Station of Ibrahim, was that inscriptions of words whose meanings were unknown at the time were found.

The historian Abu Abdullah Al-Fakihi engraved them and asked someone who knew ancient languages, Abu Zakariya Al-Maghribi, to translate them from ancient Egyptian. (In the book: "Akhbar Makkah" by Al-Fakihi, around 900 A.D) It is known that there are three ways to write the ancient Egyptian language, including hieroglyphics, demotic, and hieratic (for the general public and for simplicity). This is one of the pictures of the writing found below the Maqam Ibrahim, written in the hieratic way (Hagar? One of the Sabians?)

وَإِذْ جَعَلْنَا الْبَيْتَ مَثَابَةً لِّلنَّاسِ وَأَمْنًا وَاتَّخِذُوا مِن مَّقَامِ إِبْرَاهِيمَ مُصَلًّى وَعَهِدْنَا إِلَىٰ إِبْرَاهِيمَ
وَإِسْمَاعِيلَ أَن طَهِّرَا بَيْتِيَ لِلطَّائِفِينَ وَالْعَاكِفِينَ وَالرُّكَّعِ السُّجُودِ ﴿١٢٥﴾

Meaning: And We made the House a focal point for the people, and a sanctuary. Use the shrine of Abraham as a place of prayer. And We commissioned Abraham and Ishmael, "Sanctify My House for those who circle around it, and those who seclude themselves in it, and those who kneel and prostrate."

This is a copy of the writing at the base of the shrine

In a recent translation: It is (possible) modern inscription, it begins with the Eye of Horus or the god, and (Per) meaning house, then (Shemsu) meaning heavens, as (followers of GOD), and it can be translated as:

The Preserved House, the House of the Lord of the Heavens, the Most High, the Magnificent: The House of God, the Giver, in Mecca, the House of Prayer, the Followers of God: Abraham 1211 Sabaoth, Land of Punt

This inscription relates to someone whose primary education and likely language were from Egypt, and that this last line serves as an introduction to its author, suggesting he was a Harranian Sabian from Egypt الصابئه الحرائيين, or perhaps related to Hagar, or even to Abraham himself, in the year 1211, which coincides with the unification of Upper and Lower Egypt by King Menes.

Punt county was within Egypt domain, denoting both sides of the red sea, where many Prophets, as will be noted in this book, crossed the red sea as Josef, Abraham, Moses....etc.

In this verse GOD states that the creation of heavens and earth is related to the night & day. In a way it can be comprehended that the heaven is more responsible to the night darkness, and day time is more related to earth (its rotation around its axis). It is also sated that water is generally crucial for life, rain water plays a role in this. Finally, the wind and cloud movement is delineated at the space between the heaven and earth which we now know as the atmosphere! Clear percision!!

Rain and cloud movement are crucial elements of weather patterns, and they significantly affect climate and daily weather conditions. Here's a hint of how they work: Clouds form when water vapor in the atmosphere cools and condenses into tiny droplets. This often occurs when warm, moist air rises. Different cloud types (cirrus, cumulus, stratus, etc.) influence and are influenced by weather conditions and atmospheric stability. Clouds move due to wind, As clouds rise, the temperature drops, leading to condensation and the formation of droplets. Smaller droplets collide and merge to form larger droplets. When droplets become heavy enough, they fall as rain. Factors Influencing Rain and Cloud. Mountains can cause uplift, leading to increased precipitation on the windward side and rain shadow effects on the leeward side. Low and high-pressure systems create dynamic environments where air moves, influencing both cloud development and precipitation.

It's really amazing how all these accurate data are in one verse valid through 14 centuries!

إِنَّ فِي خَلْقِ السَّمَوَاتِ وَالْأَرْضِ وَاخْتِلَافِ اللَّيْلِ وَالنَّهَارِ وَالْفَلَكَ الَّتِي تَجْرِي فِي الْبَحْرِ بِمَا يَنْفَعُ النَّاسَ وَمَا أَنْزَلَ اللَّهُ مِنَ السَّمَاءِ مِنْ مَّاءٍ فَأَحْيَا بِهِ الْأَرْضَ بَعْدَ مَوْتِهَا وَبَيَّنَّ فِيهَا مِنْ كُلِّ دَابَّةٍ وَتَصْرِيفِ الرِّيْحِ وَالسَّحَابِ الْمُسَخَّرِ بَيْنَ السَّمَاءِ وَالْأَرْضِ لَآيَاتٍ لِّقَوْمٍ يَعْقِلُونَ ﴿١٦٤﴾

Meaning: In the creation of the heavens and the earth; in the alternation of night and day; in the ships that sail the oceans for the benefit of mankind; in the water that God sends down from the sky,

and revives the earth with it after it had died, and scatters in it all kinds of creatures; in the changing of the winds, and the clouds disposed between the sky and the earth; are signs for people who understand.

EL-Baqara: 2-184.

In this verse GOD simplifies fasting for us. In many ways, the daily normal activity can be practiced, also, many excuses enable not to fast as travelling. At the end of the verse its clear that fasting is better for us both in life and afterlife!

Fasting has many benefits on weight management and on the immune system by various mechanisms as:

Autophagy Activation: Fasting encourages autophagy, a process where the body cleans out damaged cells and regenerates newer, healthier ones. This can enhance immune function by removing compromised cells that may otherwise hinder immunity.

Reduced Inflammation: Fasting may help lower levels of inflammatory markers in the body. Since chronic inflammation can impair immune function, reducing inflammation can help maintain a more effective immune response.

Enhanced Immune Cell Production: Some studies suggest that fasting can stimulate the production of certain immune cells. For example, fasting may boost the levels of lymphocytes, which are critical for adaptive immunity

Improved Insulin Sensitivity: Fasting is known to improve insulin sensitivity, which can lead to better metabolic health. Good metabolic health supports overall immune function, as high blood sugar and insulin resistance can lead to chronic inflammation

Gut Health: Fasting may promote a healthier gut microbiome. Since the gut plays a crucial role in the immune system, maintaining gut health can enhance immune responses.

Stress resistance: Fasting can induce a mild stress response that may improve the body's resilience to stress.

Weight reduction: It has a significant impact mainly if repeated intermittently as in Muslims fasting, which forces stored fat to be used as a source of energy, hence, increasing metabolism.

أَيَّامًا مَّعْدُودَاتٍ فَمَنْ كَانَ مِنْكُمْ مَّرِيضًا أَوْ عَلَى سَفَرٍ فَعِدَّةٌ مِنْ أَيَّامٍ أُخَرَ وَعَلَى الَّذِينَ يُطِيقُونَهُ فِدْيَةٌ طَعَامُ مِسْكِينٍ فَمَنْ تَطَوَّعَ خَيْرًا فَهُوَ خَيْرٌ لَهُ وَأَنْ تَصُومُوا خَيْرٌ لَكُمْ إِنْ كُنْتُمْ تَعْلَمُونَ ﴿١٨٤﴾

Meaning: Permitted for you is intercourse with your wives on the night of the fast. They are a garment for you, and you are a garment for them. God knows that you used to betray yourselves, but He turned to you and pardoned you. So approach them now, and seek what God has ordained for you, and eat and drink until the white streak of dawn can be distinguished from the black streak. Then complete the fast until nightfall. But do not approach them while you are in retreat at the mosques. These are the limits of God. God thus clarifies His revelations to the people, that they may attain piety.

Japanese cell biologist Yoshinori Ohsumi, discovered the mechanisms of autophagy, a process where cells recycle damaged components. His research, using yeast, showed that stress-induced states like fasting or starvation activate this crucial "self-eating" cleanup mechanism, promoting cellular renewal and health Research indicates that autophagy is essential for preventing diseases like cancer and neurodegenerative conditions (e.g., Alzheimer's) by removing toxic waste. It is also crucial for aging, immunity, and cellular adaptation to starvation. Fasting therefore is not only behavior restraint or purification, it can be measurable by its biological consequences noted by 2016. However, this was in Qur'an 14 centuries earlier!

El-Baqara: 2-205:

Hypocrites have common, recurring traits that can be identified, including frequent lying and flattery of those in power. Those traits may be found in a specific group, and GOD has warned us against them. For example, certain political groups in power leading to igniting wars & human atrocities, all over history (till now!). This verse gives a

close example as what happened in GAZA by constant efforts to destroy, ruin, and starve others. No wonder now that this Surah is named Heifer (Baqra) that mainly describes this behavior! (what is intended to be done after sacrificing this red heifer is horrific!!)

وَإِذَا تَوَلَّى سَعَىٰ فِي الْأَرْضِ لِيُفْسِدَ فِيهَا وَيُهْلِكَ الْحَرْثَ وَالنَّسْلَ ۗ وَاللَّهُ لَا يُحِبُّ الْفُسَادَ ﴿٢٠٥﴾

Meaning: When he gains power, he strives to spread corruption on earth, destroying properties and lives. God does not like corruption.

El-Baqara: 2-213:

In this noble verse, God explains to us that monotheism was the foundation of the first era on earth. In the Stories of Prophet Muhammad (Peace be upon him) by Al-Tabari, on the authority of Ibn Abbas, he said: **ذكر من قال ذلك: في قصص الأنبياء للطبري و** عن ابن عباس, قال

كان بين نوح وأدم -عليهما السلام- عشرة قرون, كلهم على شريعة الحق, فاختلفوا, فبعث الله النبيين مبشرين و منذرين, قال و كذلك هي في قراءه عبد الله: "كان الناس أمه واحده فاختلفوا" و في هذا يتضح أنه دين واحد حتى في وقت المصريين القدماء وفيهم أول نبي معروف لدينا -سيدنا إدريس- (أوزوريس-إخنوخ)

"There were ten centuries between Noah and Adam, peace be upon them, and they were all on the right path. Then they differed, so GOD sent prophets as bearers of good tidings and warners."

It turns out that it was one religion of monotheism even in the time of the ancient Egyptians, who included the first known prophet to us - Idris - (Osiris-Enoch) As is also mentioned: And to Seth are the lineages of all the children of Adam today This is because the lineage of the children of Adam - other than the lineage of Seth - became extinct and perished, and not a single one of them remained. So the lineages of all people today go back to Seth, peace be upon him.

From this it becomes clear to us that the incident of killing the son of Adam, according to verse 32 of Surat Al-Ma'idah, as has been shown to us throughout history: The direct relation between the first killing

on earth & the Israelites, even in times of pure monotheism. even with the well-known hadith on the authority of Abdullah bin Masoud, he said: What the Prophet Muhamad, may God bless him and grant him peace, said:

“There is no soul killed unjustly except that the first son of Adam will bear a share of it.” ما من نفس تقتل ظلماً إلا كان على ابن آدم الأول كفل منها

كَانَ النَّاسُ أُمَّةً وَاحِدَةً فَبَعَثَ اللَّهُ النَّبِيِّنَ مُبَشِّرِينَ وَمُنْذِرِينَ وَأَنْزَلَ مَعَهُمُ الْكِتَابَ بِالْحَقِّ لِيَحْكُمَ بَيْنَ النَّاسِ فِي مَا اخْتَلَفُوا فِيهِ وَمَا اخْتَلَفَ فِيهِ إِلَّا الَّذِينَ أُوتُوهُ مِنْ بَعْدِ مَا جَاءَتْهُمْ الْبَيِّنَاتُ بَغْيًا بَيْنَهُمْ فَهَدَى اللَّهُ الَّذِينَ آمَنُوا لِمَا اخْتَلَفُوا فِيهِ مِنَ الْحَقِّ بِإِذْنِهِ ۗ وَاللَّهُ يَهْدِي مَنْ يَشَاءُ إِلَى صِرَاطٍ مُسْتَقِيمٍ ٢١٣

Meaning: Humanity used to be one community; then God sent the prophets, bringing good news and giving warnings. And He sent down with them the Scripture, with the truth, to judge between people regarding their differences. But none differed over it except those who were given it—after the proofs had come to them—out of mutual envy between them. Then God guided those who believed to the truth they had disputed, in accordance with His will. God guides whom He wills to a straight path.

Al-Baqara: 2-264.

Regarding the biblical Exodus, recounting the liberation of the Israelites from slavery in ancient Egypt under the leadership of Moses. This narrative is central to Jewish identity and faith, describes a miraculous escape and journey to the Promised Land.

Let's discuss: It is not logic theoretically, as after winning over Pharoah and his soldiers, drowned, which is written in all religious scripts, its more logic that they return to their homes in Egypt. Somehow, this was delayed for 40 years, as Moses got very angry from his people after they worship the "Cow" during his absence! Also, GOD punished them for that, so they got lost for these 40 years and didn't go to the promised

land even in all Moses life (It is said that 40 years are the period for that generation to be replaced by another generation with more faith)

So, where did they go then? By logic, as they're victorious to their homes in Egypt. In response to GOD's command for them to fight those blasphemies to raise GOD's words, they said "why not, as we were once expelled out of our homes". GOD states in the same verse, that when they were ordered to fight, most of them didn't respond!

Again, the question: Where did those non responders Jews go to?

Egypt, as it is even evident in the following verses to this one, that they repeated this refusal action to many of their Prophets. The majority of them, by logic, will return back and didn't respond to orders given by GOD or his Prophets, till Prophet David won with very few of them, and got to the promised land.

Evidences: First: The past tense to say they were (during Pharaoh's time) expelled out from there homes. - Second: Constant stating by GOD in this Surah verses (246-250) that the majority of the Jew didn't follow the commands, hinting that they preferred to stay at their homes in Egypt. Third: In spite of many archeological research in Sinai, even during the Jewish occupation (1967-1973), they didn't find any archeologic remains to substantiate their claims. - Fourth: In other verses - Surah Al-Hashr (59-2) as will be noted, that expulsion of the jews out of the Arabian peninsula, after repeatedly breaking the covenant with Prophet Muhammad (peace be upon him) leading to many wars with early Muslims, this is referred to by GOD as the first Jew exodus, surprisingly this one doesn't count in the Jewish history books!!

The second usage of the term according to their beliefs is to more recent periods of Jewish emigration and displacement. As they say have faced persecution, discrimination, and violence, leading to their expulsion or voluntary departure from various countries. Examples include the expulsion of Jews from Spain in 1492, not mentioning that this time it was for monotheists, Muslims & Jews, not only Jews. That both Muslims & Jews faced the same atrocity by that time.

Recently, the mass emigration from Eastern Europe in the late 19th and early 20th centuries driven by pogroms and economic hardship & the Holocaust, a systematic genocide perpetrated by Nazi Germany, as they say (they do now that in Gaza!) All these were reaction to the Jewish behavior in these countries even Britain, as was later described, there overuse of usury (lending money at unreasonably high rates of interest), destroyed many countries economy, in addition to many vice behaviors as propagation of pornography industry. So, according to their bias behavior, European countries even the winning after WWII, helped the Jewish expulsion to Palestine in 1948!!

On the other hand: When Moses went to Madyan, he spoke easily with the 2 ladies trying to drink their cattle (Surah el-Qasas 22,23) it actually appears as if they spoke the same language or at least understood each other. Since the common language known for this area is the south Arabian language (Hameryan) which was also spoken in Yaman. Following the road south near the river Nile was much easier & safer to Moses (it will be more difficult to trace his foot prints - compared to the desert in Sainai) with sufficient water & food supply This road to Yaman was frequently encountered by that time. In Surah El-Mu'minon verse 20 is another clue for this as the Chea tree doesn't grow in Sainai, but only in central Africa, El-Tor mountain is in Abyssinia.

In the book: "Egypt in ancient near east" by Prof. Dr. Mohamed Bayomi Mahran: Prof. of Egyptology & ancient history who stated in his book: " It is historically known that the word "Pharaoh" in its ancient Egyptian form (Per-A) meant "the high house" or "the great house," which is one of the ways it refers to the royal palace and not to its inhabitants. Then, during the reign of Thutmose III (1436 BC), the term "Per-Au" or "Per-Ra" began to be used for the king as a synonym for "His Majesty." Based on this, the use of the word "Pharaoh" for any king before the era of Thutmose III is an error in the chronology of events, as the word "Pharaoh" became a respectful expression that meant the majesty of the king since the era of the Eighteenth Dynasty.

Thus, it seems clear that the use of the Torah in the stories of our master Abraham and our master Joseph, peace be upon them, is a historical error. Accordingly, everything written, especially in (Genesis 7 -4:50, 26-1:47, 42:15, 14-1:41, 21-40:2, 39:1, 20-13:14) are questionable!

Our master Joseph lived in Egypt during Hyksos era (approximately 1725 BC - 1575 BC). The ruler of Egypt at that time was called "king," as stated in the Holy Quran. While the name "Pharaoh" refers to the ruler only at the time of Moses.

Each of these instances, whether rooted in religious narrative or historical reality, reflects the complex and often turbulent relationship between Jewish people and the societies in which they have lived, even till now by controlling the political leadership of the countries in power as what happened to Britain with Benjamin Disraeli, 1st Earl of Beaconsfield (21 December 1804 - 19 April 1881) was a British statesman, politician and writer who twice served as Prime Minister of the United Kingdom at the reign of the British empire.

Nowadays, AIPAC is believed to be doing the same again over the united states government. AIPAC, the American Israel PublicAffairs Committee, is a pro-Israel lobbying group in the United States.

أَلَمْ تَرَ إِلَى الْمَلِكِ مِنْ بَنِي إِسْرَءِيلَ مِنْ بَعْدِ مُوسَى إِذْ قَالُوا لِنَبِيِّ لَهُمْ ابْعَثْ لَنَا مَلِكًا نُقَاتِلَ فِي سَبِيلِ اللَّهِ قَالَ هَلْ عَسَيْتُمْ إِنْ كُتِبَ عَلَيْكُمُ الْقِتَالُ أَلَّا تُقَاتِلُوا قَالُوا وَمَا لَنَا أَلَّا نُقَاتِلَ فِي سَبِيلِ اللَّهِ وَقَدْ أُخْرِجْنَا مِنْ دِيَارِنَا وَأَبْنَاءِنَا فَلَمَّا كُتِبَ عَلَيْهِمُ الْقِتَالُ تَوَلَّوْا إِلَّا قَلِيلًا مِّنْهُمْ وَاللَّهُ عَلِيمٌ بِالظَّالِمِينَ ﴿٢٤٦﴾

Meaning: Have you not considered the notables of the Children of Israel after Moses? When they said to a prophet of theirs, "Appoint a king for us, and we will fight in the cause of God." He said, "Is it possible that, if fighting was ordained for you, you would not fight?" They said, "Why would we not fight in the cause of God, when we were driven out of our homes, along with our children?" But when fighting was ordained for them, they turned away, except for a few of them. But God is aware of the wrongdoers.

Allah- there is no deity except Allah, the ever-living the sustainer of all existence. Neither drowsiness overtakes Him nor sleep. This is the start of this verse that is considered to be the heart of the Qur'an. Most likely, this noble verse indicates that there can be other intelligent creatures different than us in the universe who have a lot of knowledge that can even affect us! The evidence is the - plural form- in "the heavens", but the "earth" is -single form-for mankind, then "they" - meaning all creatures, do not encompass- for everyone. Another aspect, its like a Palindrome verse! it consists of 9 sentences, the first sentence is related to the last, 2 to 8, 3to 7, 4 to 6. The fifth sentence is exactly in the middle " يعلم ما بين أيديهم و ما خلفهم " meaning that GOD knows what's in our hands denoting the present time or our will, meanwhile our past described as what's behind them, so this part as its position - at the center- of the verse can tell that all GOD's creatures are exposed to GOD in every aspect. Knowledge is the corner stone, to which many things can be related. In other religions, for example, Adam & Eve ate from the so called tree of knowledge, accordingly,, People are told that GOD wanted them with less knowledge! that is one of the reasons why in there is nearly. In most other religions, there is no correlation between science and religion.

Satan worshippers claim that knowledge is the most important thing that he got, that man can benefit from **استغفر الله العظيم**, In other experiments for quantum physics observation effects described in verse (17:44) its actual explanation is also stated in sentence 6 in this verse. In Islam, to start with its a simple fruit tree put as a test for Adam & Eve, later GOD taught Adam some words to forgive him. The first word in Qur'an told to prophet Mohamed was "read", which denotes that Mankind is encouraged to learn.

اللَّهُ لَا إِلَهَ إِلَّا هُوَ الْحَيُّ الْقَيُّومُ لَا تَأْخُذُهُ سِنَّةٌ وَلَا نَوْمٌ لَهُ مَا فِي السَّمَوَاتِ وَمَا فِي الْأَرْضِ مَنْ ذَا الَّذِي يَشْفَعُ عِنْدَهُ إِلَّا بِإِذْنِهِ يَعْلَمُ مَا بَيْنَ أَيْدِيهِمْ وَمَا خَلْفَهُمْ وَلَا يُحِيطُونَ بِشَيْءٍ مِنْ عِلْمِهِ إِلَّا بِمَا شَاءَ وَسِعَ كُرْسِيُّهُ السَّمَوَاتِ وَالْأَرْضَ وَلَا يَئُودُهُ حِفْظُهُمَا وَهُوَ الْعَلِيُّ الْعَظِيمُ
{٢٥٥}

Meaning: God! There is no god except He, the Living, the Everlasting. Neither slumber overtakes Him, nor sleep. To Him belongs everything in the heavens and everything on earth. Who is he that can intercede with Him except with His permission? He knows what is before them, and what is behind them; and they cannot grasp any of His knowledge, except as He wills. His Throne extends over the heavens and the earth and their preservation does not burden Him. He is the Most High, the Great.

AL-Imran: 3-46:

One of the stunning miracles of Jesus is speaking to people while he is still in the cradle, the second time mentioned in this verse is to preach people while he is old! This can tell that: he will not be present on earth in between those two periods. In fact he was not present by the age 33, also gives a clue that he was not killed and that he was raised to GOD while he was young.

Knowing that he disappeared by this young age, according to this verse, he will come back to earth as an elder. The return of Christ, also known as the Second Coming or Second Advent, is a central Christian belief referring to the future return of Jesus Christ to Earth after his ascension to Heaven. This event is expected to be visible and physical, with Jesus returning from heaven on the clouds to bring final judgment and salvation. It's a core tenet of most Christian eschatology's.

In Islamic eschatology, Jesus (‘Īsā ibn Maryam) is also believed to return at the end times. According to Islamic belief, he will descend from Heaven to defeat the false messiah (al-Masih ad-Dajjal), restore justice, and reaffirm monotheism. His return is regarded as one of the major signs of the Day of Judgment, and he is viewed as a revered prophet, not divine, in Islamic theology. In Islam, Jesus (or Isa; Arabic: عيسى ‘Īsā) is considered to be a Messenger of GOD and the masih (messiah) who was sent to guide banī isrā’īl (the Israelites) with a new scripture, the Injīl (Gospel). The belief in Jesus (and all other messengers of God) is required in Islam, and a requirement of being a Muslim. However, Muslims believe that Jesus was never crucified or resurrected, instead ascending directly into heaven. Additionally, they do not recognize Jesus as the Son of God, as they believe God has no equals, but rather that he was a prophet. It's all one religion for the same GOD.

وَيُكَلِّمُ النَّاسَ فِي الْمَهْدِ وَكَهْلًا وَمِنَ الصَّالِحِينَ ﴿٤٦﴾

Meaning: What is striking here in most of the accepted Gospels is the disappearance of any sermons or accounts of Jesus Christ between the ages of 12 and 30, and his (sudden) appearance in Jerusalem after the age of 30. Tawahedo Bible in Ethiopia is the only Bible stating Jesus between the ages of 12 and 30? also, stating the miracle to speak while in the cradle

Al-Imran: 3-68:

Our father Abraham has clear traces in every place he lived or traveled to, and even in his prayers, which we still witness being fulfilled by GOD to this day—"a truthful reputation among others." " " لسان صدق في الآخرين Despite this, we find many who outwardly claim to follow him but do not adhere to his teachings. Even later, the Jews considered themselves his followers, contrary to the explicit verse in the same chapter (3:65): "O People of the Scripture, why do you argue about Abraham when the Torah and the Gospel were not revealed until after him? Then will you not reason?" This is in addition to the clear prophetic tradition. The one who said this is mentioned by al-Tabari in his stories of the prophets, on the authority of Abu Dharr, who said: The Messenger of God, Muhammad, said:

"The first of the prophets of the Children of Israel was Moses, and the last of them was Jesus" "أول أنبياء بني اسرائيل موسى، و آخرهم عيسى"

On his way to Egypt, Prophet Abraham passed through Palestine and met Prophet Lot, then went with his people to Egypt. Historical research indicates this was around 1900 BC. In the tomb murals of ancient Egypt, from around this time, there is a mural in a tomb in Beni Hasan in Minya that commemorates an event like this: A group of Canaanites (all their men with prominent beards and their women in clothing different from the style of the Egyptians at that time) visited, bringing gifts and roasted calves, and were warmly welcomed and treated with hospitality. It is known that ancient Egyptians would record good deeds and virtuous acts in their tombs to facilitate their

reckoning in the afterlife. Therefore, it is highly probable that the Egyptian king at the time, who hosted them, knew that he was a noble prophet along with his followers. Continuing with the story of Prophet Joseph, as we will mention, it becomes clear that the rulers of Egypt adhered to pure monotheism. Another piece of evidence is the marriage of Prophet Abraham to the Egyptian princess Hagar, with whom, by divine command, Prophet Abraham and his son, Prophet Ishmael, went to a barren valley, they built the Sacred Mosque upon its foundations. Later, many of the Sabians of Harran الصابئه الحرائيين pilgrimed to it, responding to the call of our father Abraham. Caba كعبه Is there a depiction of our father Abraham on the wall of this tomb

إِنَّ أَوْلَى النَّاسِ بِإِبْرَاهِيمَ لَلَّذِينَ اتَّبَعُوهُ وَهَذَا النَّبِيُّ وَالَّذِينَ ءَامَنُوا وَاللَّهُ وَلِيُّ الْمُؤْمِنِينَ ﴿٦٨﴾

Meaning: The people most deserving of Abraham are those who followed him, and this prophet, and those who believe. God is the Guardian of the believers

Depiction for Abraham & his tribe?!- beard men, different cloth for women- non-Egyptian style.

Al-Imran: 3-96

In general, numerical aspects or ratios are numerous in Qur'an, but this new one is really amazing! The golden ratio, often denoted by the Greek letter phi (ϕ), is an irrational number approximately equal to 1.618. Far from being a mere mathematical curiosity, it has been hailed as a fundamental principle underlying the aesthetics of beauty and balance in art, architecture, and the natural world. Defined as the ratio where the sum of two quantities is to the larger quantity as the larger quantity is to the smaller, it manifests in geometric forms like

the golden rectangle and the Fibonacci sequence, where each number is the sum of the two preceding ones.

Its purported presence in structures like the Parthenon and works like Leonardo da Vinci's Mona Lisa has cemented its place in artistic discourse. While some argue that the application of the golden ratio is intentional and contributes to the perceived harmony, others suggest its prevalence is overstated, resulting from post-hoc analyses and subjective interpretation. Regardless, the golden ratio's presence in nature, from the spiral arrangement of sunflower seeds to the branching patterns of trees, offers compelling evidence of its significance in natural growth and organization. The golden ratio remains a subject of ongoing debate. Whether it is a deliberate design principle or a naturally occurring phenomenon, its enduring allure lies in its ability to connect seemingly disparate fields like mathematics, art, and the natural sciences, prompting continued exploration into the underlying principles that govern our perception of beauty and order.

In parallel, recently, NASA revealed that the global position of Mecca in relation to the North pole (7400 km.), South poles (12350 km), simply by dividing these 2 numbers, we get the golden ratio of 1.6! same if measured for land component from east to west! In this verse GOD states Mecca by its first name known Becca. Among the most cited pre-Islamic names for Mecca is "Bakkah," a term that appears in the Quran itself. Even in ancient Egypt it was known by that name, what is even more surprising is the old name for that region (حجاز) harbors the meaning of pilgriming to the city of light! raising another possibility of the same rituals in ancient Egypt! While the relationship between Bakkah and Mecca remains debated, some scholars suggest it represents a specific area within the city, potentially referencing the location of the Kaaba. Other suggested predecessors include "Umm al-Qura" (Mother of Settlements), emphasizing Mecca's role as a central hub for surrounding communities, and potentially earlier, more obscure designations now lost to time. As mentioned in this verse it can be the first place that Adam, or his siblings were on earth, Surprisingly, we can find also this golden ratio in this verse! As the

number of words and أدوات الاشارة in arabic preceding " بكة " is 8, following it is 5, by simple devision we get the number 1.6! which is actually the debatable ratio all over history! hinting to its possible Devine nature.

إِنَّ أَوَّلَ بَيْتٍ وُضِعَ لِلنَّاسِ لَلَّذِي بِبَكَّةَ مُبَارَكًا وَهُدًى لِّلْعَالَمِينَ ﴿٩٦﴾

Same ratio in snails, ear cochlea, sun flower, whorls of galaxies.....

Meaning: The first house established for mankind is the one at Bekka; blessed, and guidance for all people

This verse also hints that the Kaba in bekka (Makkah) was the first worship place to humans on earth. This can mean that there are other sacred places not to mankind and before even Adam's creation, البيت

المعمور مثلا, hinting to another spieces before mankind! A final note: The name "Bakkah" (known to the ancient Egyptians) is used, not "Mecca," the name used at the time of the revelation of the Holy Quran. Did the ancient Egyptians (the Pharaohs) make pilgrimages to Bakkah? It is astonishing how many words are similar even to the spoken Arabic of today and the hieroglyphic language. For example, "Heg" in hieroglyph "light", "As" means "going towards", pilgrims were referred to as going towards the city of light "hegas", till now this same expression is the name of that region in Arabic "Hegaz" حجاز Indeed, this region was annexed to Egypt many times throughout history, starting with the ancient Egyptians. Throughout history, many Egyptians fled there during the decline of Egypt, such as the Harranian Mandaeans الصابئه الحرائيين (during the sixth dynasty and the fourteenth dynasty during the Hyksos era), in addition to the Mandaean الصابئه المندائيين who headed to Mesopotamia and are said to be the wise men of Egypt, but it is more likely that they were the ones fleeing with the religion of monotheism from the priests of Pharaohs and his followers أو كهنه آمون

Al-Imran: 3-97.

Following the verse (2-125), revealing the impact of our masters Abraham & Ishmael rebuilding of this sacred home. In this verse it is directly stated that there are divine evidences at the site where Abraham used to pray - shrine. In surah Al-Baqaraa verse -125- and in this verse, the writing on Abraham shrine can tell that this is the pilgrimage site for monotheists, Muslims as named by Abraham. Another, moral and physical miracle at this place is the well of "Zamzam". As after "Hager"- Abraham's wife & the mother of Ishmael was ordered to stay alone with Ishmael while he is still a baby crying out of thirst, with no one around, trying to bring him water, she ran 7 times between "Safa" & "Marwa" then she got tired.

At that same time, the well of "Zamzam" erupted! supplying them by healthy water, which is still supplying anyone till the present day by

clear and fresh water (of unknown origin till now!! The other physical memory for this is walking between "Safa & Marwa" 7 times during Pilgrimage or Umrah. The other physical miracle, could the greatest name of GOD, be present at this site? As what is written on Abraham's shrine?! The moral aspect, "Hager" did every effort to get water for her child but she couldn't. In return GOD supplied both of them & all mankind till the present day by a miraculous well. This can be a sign for us not to save our effort to achieve our goals, meanwhile ask for GOD to make it fruitful, then the outcome will be great

فِيهِ ءَايَاتٌ بَيِّنَاتٌ مَّقَامُ إِبْرَاهِيمَ وَمَنْ دَخَلَهُ كَانَ ءَامِنًا وَلِلَّهِ عَلَى النَّاسِ حِجُّ الْبَيْتِ مَنِ اسْتَطَاعَ
إِلَيْهِ سَبِيلًا وَمَنْ كَفَرَ فَإِنَّ اللَّهَ غَنِيٌّ عَنِ الْعَالَمِينَ ﴿٩٧﴾

Meaning: In it are evident signs; the Station of Abraham. Whoever enters it attains security. Pilgrimage to the House is a duty to God for all who can make the journey. But as for those who refuse—God is Independent of the worlds

Al-Nisa': 4-56:

This verse is specific for athiests, surprisingly it also harbors a deep scientific fact that was recently discovered! The skin is made up of three primary layers, each serving distinct functions and containing various sensory neurons

1. **Epidermis:** This is the outermost layer of skin, providing a barrier against the environment. It's primarily composed of keratinocytes, which produce keratin, a protein that helps waterproof the skin. The epidermis also contains melanocytes (which produce pigment), Langerhans cells (immune response), and Merkel cells (touch receptors).
2. **Dermis:** Located beneath the epidermis, the dermis is thicker and contains connective tissue, blood vessels, sweat glands, sebaceous (oil) glands, and hair follicles. This layer is crucial for thermoregulation and provides the structural integrity of the skin. The dermis houses a rich network of sensory neurons, particularly those associated with touch, pressure, and pain, including: Meissner's corpuscles: Sensitive to light touch. Pacinian corpuscles: Detect deep pressure and vibration. Ruffini endings: Sense skin stretch and sustained pressure. Free nerve endings: Respond to pain and temperature.
3. **Hypodermis (sub-cutaneous):** This innermost layer consists of loose connective tissue and fat, providing insulation and cushioning for underlying structures. It also anchors the skin to underlying tissues and allows for flexibility. It mainly serves as a storage site for fat and a passage for larger blood vessels and some nerves.

The interplay between these layers and the sensory neurons enables the skin to respond effectively to various stimuli, allowing us to sense touch, pressure, temperature, and pain. In deeper layers in human

anatomy as in deep fascia or muscles, sensory neurons for feeling temperature or pain are not present! So, deep dermal burns are painless! GOD describes this scientific fact upon punishing atheists by burning, that their skin will atrophy by rise in temperature, so it will be replaced by a newer skin, so that they will feel the pain all along as they stay in hell eternally, to suffer all the time in hell. For an Atheist, is this punishment his/her worth behavior in life!!

إِنَّ الَّذِينَ كَفَرُوا بِآيَاتِنَا سَوْفَ نُصْلِيهِمْ نَارًا كُلَّمَا نَضِجَتْ جُلُودُهُمْ بَدَّلْنَاهُمْ جُلُودًا غَيْرَهَا لِيَذُوقُوا الْعَذَابَ إِنَّ اللَّهَ كَانَ عَزِيزًا حَكِيمًا ﴿٥٦﴾

Meaning: Those who reject Our revelations—We will scorch them in a Fire. Every time their skins are cooked, We will replace them with other skins, so they will experience the suffering. God is Most Powerful, Most Wise

Al-Nisa': 4:97

Throughout the ages, the oppressed people on earth have been a source and an aid to tyrants, and Glory be to God, the Most Merciful described them as oppressing themselves and even gave them an alternative solution so that they would not help the tyrants, which is emigration. The consequence of submitting to tyrants is truly frightening. In life they help the tyrants to develop and oppress people more. They are like the infidels; their abode is Hell and a miserable fate! So, bad fate can be for oppressed people is according to their choices, they will not benefit by helping tyrants. Two big examples prophet Muhammed gave for this action, the first by letting early Muslims to go to Abyssinia (Ethiopia), the second is the big move of all Muslims from Mekka to Medinah known as El-Higra. So, early Muslims managed to escape all the oppression they had in Mekka till they were in a better condition, even to let Islam prevail worldwide. In this way, there will be no help for the tyrants, Justice can prevail.

إِنَّ الَّذِينَ تَوَفَّيْنَاهُمُ الْغَالِبِينَ ظَالِمِينَ أَنْفُسِهِمْ قَالُوا فِيمَ كُنْتُمْ قَالُوا كُنَّا مُسْتَضْعَفِينَ فِي الْأَرْضِ قَالُوا أَلَمْ تَكُنْ أَرْضُ اللَّهِ وَسِعَةً فَهَاجِرُوا فِيهَا قَالُوا لَكَ مَاؤُهُمْ جَهَنَّمُ وَسَاءَتْ مَصِيرًا ﴿٩٧﴾

Meaning: While the angels are removing the souls of those who have wronged themselves, they will say, “What was the matter with you?” They will say, “We were oppressed in the land.” They will say, “Was God’s earth not vast enough for you to emigrate in it?” Their refuge is Hell. What a wretched retreat.

Al-Nisa': 4-119

Genetic engineering, while holding immense promise for advancements in medicine and agriculture, is not without potential side effects and faults. One primary concern lies in the unintended consequences of gene manipulation. Altering an organism's genetic makeup can lead to unforeseen and potentially detrimental effects on its development, physiology, or interaction with the environment. For example, genetically modified crops, designed for pest resistance, might inadvertently harm beneficial insects or disrupt local ecosystems.

Another significant risk is the potential for off-target effects. Current gene-editing technologies, while increasingly precise, are not perfect. There is a possibility that the editing tool might modify genes other than the intended target, leading to unpredictable and potentially harmful mutations. Furthermore, the long-term effects of genetic modifications are not always fully understood. Changes at the genetic level can have cascading effects over generations, and it is difficult to predict all the potential outcomes. The potential for misuse, such as the creation of biological weapons or the exacerbation of social inequalities through genetic enhancement, raises serious concerns.

In reality many of the harms of genetic engineering is quite evident. In this verse, GOD told us that this is going to happen driven by Satan. What needs more attention is scheme that he will follow to misguide humans. First, he will mislead us to choose wrong paths. Second, he will decorate this path with pleasant wishes. Third, and the strangest thing told in this verse is to order us to completely amputate the cattle ears! this actually can be comprehended within genetic engineering,

but what is the moral of this? In deeper thinking, this is a way that Satan acts. In many other verses he didn't mention human or Adam once, only refers to us by "THIS", so his vanity figured to him that we are created from clay, the main reason Satan feels that he is better than us & disdains humans. Following this way, he will not let a chance for the deceived people to hear what is right, in order to follow only the wrong path. What is more serious is that he believes that all humans are as cattle to him, this is more evident in the rest of the same verse & in Surah Al-Israa' (62) as Satan states that he will guide mankind by putting bridle into their mouth to drive us as the cattle!!

Actually, the next Surah "Al-Anaam" refers to cattle, the question is:

Is it in our prospective or in Satan's?!

Extreme hate & envy from Satan to mankind!

وَلَا ضِلَّاهُمْ وَلَا مَنِيَّةَهُمْ وَلَأْمُرُهُمْ فَلْيَبْيُكِّنْ عَادَانَ الْإِنْعَامَ وَلَأْمُرُهُمْ فَلْيَغَيِّرُنْ خَلْقَ اللَّهِ وَمَنْ يَتَّخِذِ الشَّيْطَانَ وَلِيًّا مِّنْ دُونِ اللَّهِ فَقَدْ خَسِرَ خُسْرَانًا مُّبِينًا ﴿١١٩﴾

Meaning: “And I will mislead them, and I will entice them, and I will prompt them to slit the ears of cattle, and I will prompt them to alter the creation of God.” Whoever takes Satan as a lord, instead of God, has surely suffered a profound loss

Al-Nisa': 4-157

Archeological discoveries can be amazing. In December 1945 in Nage' Hammadi (in upper Egypt), an Egyptian farmer named Muhammad al-Samman discovered a buried pottery vessel containing 12 papyri with 52 articles, being hidden in an exotic cave. Later known as the Nage' Hammadi manuscripts or scrolls, they are written in Coptic and include three works belonging to the Hermes texts and a partial translation of some of Plato's work. However, the most important of them is a document highlighting the sayings of Jesus, son of Mary, which was written by the brother or look-alike of Jesus. It is known as the Gospel of Thomas. It was written by Didmas Judas Thomas (Didmas means twin in ancient Greek) and (Thomas means twin in

Aramaic) and contains 114 sayings of the living Christ. Found in upper Egypt can this mean that:

Jesus was living for at least part of his life in Egypt. Is this a further proof that he is the son of Merit-Aton (Maryam)?! As we will discuss later. Surprisingly, the story of a baby born by the virgin Merit (By divine order & not by marriage) is carved on one of walls at Luxor temple! Does Jesus Christ have a brother? Did he has a brother or, Is a person who looks so similar to him considered a brother? Only GOD knows. In some similar gospels, the same events are mentioned, including the infancy gospels and the resurrection of the bird by Jesus Christ at a young age, by GOD's permission. But in fact, this verse refers to this look-alike whom the Jews killed according to the context of the verses before this one.

وَقَوْلِهِمْ إِنَّا قَتَلْنَا الْمَسِيحَ عِيسَى ابْنَ مَرْيَمَ رَسُولَ اللَّهِ وَمَا قَتَلُوهُ وَمَا صَلَبُوهُ وَلَكِنْ شُبِّهَ لَهُمْ
وَإِنَّ الَّذِينَ اخْتَلَفُوا فِيهِ لَفِي شَكٍّ مِّنْهُ مَا لَهُمْ بِهِ مِنْ عِلْمٍ إِلَّا اتِّبَاعَ الظُّلُمِ وَمَا قَتَلُوهُ يَقِينًا
{١٥٧}

Meaning: And for their saying, “We have killed the Messiah, Jesus, the son of Mary, the Messenger of God.” In fact, they did not kill him, nor did they crucify him, but it appeared to them as if they did. Indeed, those who differ about him are in doubt about it. They have no knowledge of it, except the following assumptions. Certainly, they did not kill him.

This is a translated text of the book of Enoch, Ethiopian bible to begin by where it was found? This! The Greek Version has only in part been preserved. Chapters iXXX. 6 and XiX. 3-Xxi. 09 in a duplicate form were discovered in 1886-1887 at Akhmim by the Mission Archcologique Francaise at Cairo, published by M. Bouriant in 1892. Bouriant, Fragments #recs du livre Enoch. JMamorres Bpublids bar les membres de la JMfissiow arcfiéolorigique frantaiaie au Caire.

This means that the original place for this material was in Egypt! That the Book of Enoch was originally written in a Semitic language is now universally admitted. But that language is still in dispute! This is a copy of part of the Enoch book- translation from Ethiopian bible

"I look not for this generation but for the distant one that is coming" I speak about the elect ones and concerning them.', * And I took up with a parable¹¹ (saying), "The God of the universe, the Holy Great One, will come forth from his dwelling" Pure monotheism is noted.

"This is the book of the words of righteousness and the chastisement of the eternal Watchers, in accordance with how the Holy and Great One had commanded in this vision. # I saw in my sleep what I now speak with my tongue of flesh and the breath of the mouth which the Great One has given to man (so that) he (man) may speak with it —and (so that) he may have understanding with his heart as he (the Great One) has created and given it to man. • Accordingly he has created me and given me the word of understanding" so that I may reprimand the Watchers, the children of heaven"

"Examine all the activities which take place) in the sky and how they do not alter their ways, (and examine) the luminaries of heaven, how each one of them rises and sets; each one is systematic according to its respective season; and they do not divert from their appointed order.0 «And look at the earth and turn in your mindd concerning the action which is taking place in herf from the beginning to the end: how all the work of GOD as being manifested does not change. »And behold* the summer and the winter how the whole earth is filled with water and clouds and dew and he causes rain to rest upon her" Again, pure monotheism*

In other section, narrative about Satan (azazel) is described:

"As for Enoch, he proceeded and said to Azaz'el, There will not be peace unto you; a grave judgment has come upon you. • They will put you in bonds, and you will not have (an opportunity for) rest and supplication/ because you have taught injustice and because⁶ you have shown to the people deeds of shame, injustice, and sin"

This can tell that Enoch & Jesus are messengers of GOD portion of many messengers ending by Muhammed.

Al-Ma'eda: 5-27:

This noble verse explains a general approach to the fundamentals of how to serve GOD, based on one's actions. Beginning with the sons of our master Adam, one son's piety toward GOD and the other's not obeying GOD rules led to a difference in their offerings. Therefore, the offerings of the pious were accepted, while those of the wicked were not. This is clearly shown in the following verses in the dialogue between them, and that the pious one will not extend his hand to kill, and that is out of fear of God, while the wicked one will plot to kill, not realizing that he will meet the fate of the oppressors. God shows us mainly in verses 33 & 35 the specific offspring intended by this pattern, which is the children of Israel. It has become clear throughout Qur'an & history that they are the people who most defy GOD's laws on earth and kill prophets, and even now their cold-blooded massacres in Gaza indicate that they are the same faction mentioned above. In this book, this noble prophetic hadith about the poisoned sheep, to show us the ease of killing among the Jews, and that they are from the lineage of our master Adam that kills easily (according to their own justification), and that the story of Cain and Abel is one of the false Israelite stories. It signifies that the jews tried to kill prophet Muhammed as they did to others.

﴿وَأَتَىٰ عَلَيْهِمُ نَبَأُ ابْنَيْ آدَمَ بِالْحَقِّ إِذْ قَرَّبَا قُرْبَانًا فَتُقُبِّلَ مِنْ أَحَدِهِمَا وَلَمْ يُتَقَبَّلْ مِنَ الْآخَرِ ۚ قَالَ لَأَقْتُلَنَّكَ ۖ قَالَ إِنَّمَا يَتَقَبَّلُ اللَّهُ مِنَ الْمُتَّقِينَ ﴿٢٧﴾﴾

Meaning: And relate to them the true story of Adam's two sons: when they offered an offering, and it was accepted from one of them, but it was not accepted from the other. He Said, "I will kill you." He Said, "God accepts only from the righteous"

Throughout history we sometimes find strange interference of politics in religion!! Perhaps the most famous and influential of them is what happened at the Council of Nicaea, which was an important ecumenical church council held in the city of Nicaea (currently Iznik in Türkiye) in the year 325 B.C It is considered the first ecumenical council in Christian history, where bishops from all over the Christian world gathered. The council was held upon instructions of Emperor Constantine.

To study the disputes in the Church of Alexandria between Arius and his followers on the one hand, and Alexander I and his followers, on the other hand, questioned whether the nature of Jesus was the same as the nature of GOD or of human nature. Arius denied the eternity of Jesus, believing that there was a time when Jesus did not exist. He considered him superior among GOD's creations and his creation. He also considered the Holy Spirit to be a creation of GOD. Meanwhile, Alexander I (Pope of Alexandria) asserted that the nature of Christ is the same as the nature of GOD, and the view of Alexander I (Pope of Alexandria) prevailed By ballot, Arius and two priests steadfastly refused to sign. Arius's books were burned, his doctrine was called the Arian heresy, and his followers are still labeled enemies of Christianity. The Council also agreed to celebrate Easter and its date, to be announced annually by the Patriarch of Alexandria. The Council of Nicaea produced the first forms of the Christian Creed, and the Church's relationship with authority began to take shape, having previously been a purely religious entity.

Hence, the main reason for what Emperor Constantine sought becomes clear: To consolidate power and control over people by ruling through religion. This continued until the Middle Ages all over Europe. After three centuries of the development of Christian thought and its free intermingling with surrounding ideas and religions in each nation, the unified church became the reference and authority in determining who is included in the Christian faith or, not. Then

another Caesar arose, and during his time the Christians would pray in cellars and houses, fearing the Romans.

They inflicted upon the Christians a great calamity and painful torment, a severity beyond description, including killing, torture, the violation of women and property, and the killing of thousands of Christians. They tortured Saint George with all kinds of torture. Then they killed him. During their time, Peter, the Patriarch of Alexandria, was beheaded. He had two disciples. During his time, Arius maintained that the Father alone was GOD, while the Son was created. This situation continued until the arrival of Islam in Egypt, which facilitated the mission of Amr ibn al-As and those with him (only 4,000) to enter Egypt and assist the Egyptians against the Romans' oppression. But the witness is that what Constantine adopted at this council was adopted! This is the opposite of what some Christians are saying now, that GOD is one.

Something similar happened recently. In 1909 lawyer Cyrus Scofield wrote a memoir about the Bible, "the Palestinian or land covenant" which gave rise to Christian Zionism, in which he promised the Zionists that they were God's chosen people and that they had the right to the land of Palestine!! What's even worse is that some Americans implemented it (even presidents?!).

لَقَدْ كَفَرَ الَّذِينَ قَالُوا إِنَّ اللَّهَ ثَالِثُ ثَلَاثَةٍ وَمَا مِنْ إِلَهٍ إِلَّا إِلَهُ وَاحِدٌ وَإِنْ لَمْ يَنْتَهُوا عَمَّا يَقُولُونَ لَيَمَسَّنَّ الَّذِينَ كَفَرُوا مِنْهُمْ عَذَابٌ أَلِيمٌ ﴿٧٣﴾

Meaning: They disbelieve those who say, "GOD is the third of three." But there is no deity except the One God. If they do not refrain from what they say, a painful torment will befall those among them who disbelieve.

This is a commentary about Saint Mark: St. Mark was a native of the North African county of Egypt. He was born in the city of Cyrene in Pentapolis, The western part of Libya, west of the border of Egypt. St. Mark was born of Jewish parents three years after the birth of our Lord and Saviour, Jesus Christ. His original name was John and his surname was Mark, Egypt." And when he {Peter} came to himself, he {Peter}

came to the house of Mary the mother of John, whose surname was Mark, where many gathered together praying” (acts 12:11-12); and ” Barnabas determined to take with them John, whose surname was Mark” (acts 15:37); “And Barnabas and Saul returned from Jerusalem, when they had fulfilled their ministry, and took with them John, whose surname was Mark” (acts 12:25). St. Mark’s parents, Aristopolos his father and Mary his mother, migrated to Palestine shortly after the birth of St. Mark because of the Berber attacks on their town and property. They settled in Cana of Galilee not far from Jerusalem A few years later St. Mark’s father died and Peter Simon { St. Peter}, who was married to a relative of St. Mark’s father took care of St. Mark and considered him a son: “The Church that is in Babylon, elected together with you, salutes you and so does Marcus {Mark} my son”; (1 Peter 5:13). Peter Simon saw to it that St. Mark got a good education. St. Mark studied law and the classics, he was martyred in Alexandria in 68AD. So, its Egypt, Ethiopia & Palestine are the main regions for most of the events as we shall see mainly for Mark & Matthew.

By knowing that Jesus spent part of his life in Egypt & Palestine, so the missing years of his story between 12-30 must have been in Abyssinia as we will mention later (Tawahedo Bible) meaning monotheism, as in St. Mark storey with Ananias. Matthew is mentioned in Matthew 9:9 and Matthew 10:3 as a tax collector (in the New International Version and other translations of the Bible) who, while sitting at the "receipt of custom" in Capernaum, was called to follow Jesus. He is also listed among the Twelve Disciples, but without identification of his background, in Mark 3:18, Luke 6:15 and Acts 1:13. In passages parallel to Matthew 9:9, both Mark 2:14 and Luke 5:27 describe Jesus's calling of the tax collector Levi, the son of Alphaeus. They do not associate it with the name Matthew, but all three passages are remarkably similar. Early Church Fathers such as Irenaeus (Against Heresies 3.1.1) and Clement of Alexandria say that Matthew preached the gospel to the Jewish community in Judea, before going to other countries. Ancient writers are not in agreement as to which other countries these are, but almost all sources mention Ethiopia. The Catholic Church and the Orthodox Church each hold the tradition

that Matthew died as a martyr and the Babylonian Talmud appears to report his execution in Sanhedrin 43a., while preaching in Ethiopia!

Anyway, in the same Surah verse 46, there is a message as Qur'an given to Jesus (Injil), but Where is it? It's clear that what is written by "the disciples" is no more than a narrative by its authors! The Tawahido bible in modern day Ethiopia can now be regarded as the genuine most complete revelation (88 books) and what happened in Nicea 325 A.D was just a political move that affected badly theology. In passages parallel to Matthew 9:9, both Mark 2:14 and Luke 5:27 describe Jesus's calling of the tax collector Levi, the son of Alphaeus. They do not associate it with the name Matthew, but all three passages are remarkably similar. Early Church Fathers such as Irenaeus (Against Heresies 3.1.1)

The Gospel of Luke does not name its author The Gospel was not, nor, written by direct witness to the reported events, unlike Acts beginning in the sixteenth chapter. However, in most translations the author suggests that they have investigated the book's events and notes the name (Theophilus) of that to whom they are writing. The earliest manuscript of the Gospel (Papyrus 75 = Papyrus Bodmer XIV-XV), dated c. AD 200, ascribes the work to Luke; as did Irenaeus writing c. AD 180, and the Muratorian fragment, a 7th-century Latin manuscript thought to be copied and translated from a Greek manuscript as old as AD 170, meaning did not meet Jesus! The Gospel of Luke and the Acts of the Apostles make up a two-volume work which scholars call Luke-Acts. Together they account for 27.5% of the New Testament, the largest contribution by a single author. Simply, this can't be taken as a reference to where Jesus lived & travelled. John his identity is still in dispute, the exact identity of John – and the extent to which his identification with John the Apostle, John of Patmos and John the Presbyter is historical – is disputed between Christian tradition and scholars. The Gospel of John refers to an otherwise unnamed "disciple whom Jesus loved", who "bore witness to and wrote" the Gospel's message.

Major discovery of Psalms in Egypt occurred in 1984 with the unearthing of the oldest complete Book of Psalms (Psalter) in the village of Al-Mudil (near Beni Suef), dating to the 4th century AD, found under a child mummy, showcasing early Coptic Christianity and manuscript production in a unique wooden-bound codex. Additionally, the Amherst Papyrus 63, found in Egypt in the late 19th century, contains ancient Israelite psalms in Aramaic revealing ancient connections between Egyptian and biblical traditions. A portion of the Codex of the Psalms, made of papyrus and ink within the Roman empire, written in Greek. "...Christian communities in the Mediterranean world preserved Bible texts in codices.

These were folded sheets, first of papyrus, later of parchment or vellum, that were tucked inside each other to make a quire, stitched, and bound between wooden boards covered with leather. The scribes who copied the texts habitually wrote sacred names as abbreviations with a line over them...found in Dishna, Egypt, preserves Psalms 18:45 - 19:13". Per the Museum of the Bible in Washington, D.C., USA where this 3rd-4th century AD artifact that was discovered in 1952 in Egypt was on temporary display. However, website lists it as being currently not on view!! Historians of ancient Egyptian literature also believe that around the 10th century BC, four centuries after the spread of Akhenaten's call, the Jews followed the priests of Amun, and obliterated the remnants of Akhenaten's faith. Accordingly, no one had known about his (One God Hymns), until they were found in Tell el-Amarna. So, they add a new aspect to the Psalms of David and raise a new question:

Had David been chanting ancient Pharaonic hymns, or did the anonymous 49 psalms belong to Akhenaten? Papyrus rolls found in Tell el-Amarna revealed the full texts of more than a psalm of the Book of Psalms written in ancient hieroglyphs, and which preceded the Psalms of David written in Hebrew. Together with historians from Berlin Museum, Egyptian Egyptologist, Selim Hassan, found three pages of Akhenaten's "The Great Hymn to the Aten" written to the

sundisk deity Aten, which were perfectly identical to those of the Books of the Torah in spite of preceding the Psalms of David by more than seven centuries!!

They were inscribed on a right-side wall in Ay's tomb at Tell el-Amarna, on 13 vertical columns at the entrance to the tomb. Curiously, American archaeologist and Egyptologist, James Henry Breasted (famous Egyptologist), believes that Akhenaten's poem that dates back to the 14th century BC is quite similar to Psalm 104 & have its same order!! Accordingly, some historians of ancient Egyptian literature believe that the monotheistic call advocated by Akhenaten of the 18th Dynasty of Egypt, was obliterated by priests of Amun and others! Priests of Amun had also urged the people to fight that call, fearing of the downfall of their faith, and thus, diminishing of their power in the country. Hence, it's evident that Akhenaten & Tutankhamun can also be descendants within the same kingdom of earlier Prophets mainly David & Solomon, all calling for monotheism for the same GOD within the same area- Egypt. What's more surprising is what theoretically happened afterwards, as Tutankhamen can also have been a Prophet (Yehia or Yeha) which was within the time period just before Jesus! all these Prophets were in the same area (Egypt) dealing with Israelites.

Was Jesus born in Egypt within this time lapse?!

لُعِنَ الَّذِينَ كَفَرُوا مِنْ بَنِي إِسْرَءِيلَ عَلَى لِسَانِ دَاوُدَ وَعِيسَى ابْنِ مَرْيَمَ ذَلِكَ بِمَا عَصَوْا
وَكَانُوا يَعْتَدُونَ ﴿٧٨﴾

Meaning: Cursed were those who disbelieved from among the Children of Israel by the tongue of David and Jesus son of Mary. That is because they rebelled and used to transgress.

As mentioned in this verse the Israelites were still in Egypt, after Moses, imposing their impact over Prophets & people to the limit that they were cursed by the Prophets living among them mainly: David & Jesus. So, exodus of the Jews from Egypt, is questionable. In a particular city Alexandria. The history of the Alexandrian Jews dates

from the foundation of the city by Alexander the Great, 332 BCE, at which they were present.

The Ptolemies assigned them a separate section, two of the five districts of the city, to enable them to keep their laws pure of indigenous cultic influences. The Alexandrian Jews enjoyed a greater degree of political independence than elsewhere. While the Jewish population elsewhere throughout the later Roman Empire frequently formed private societies for religious purposes, or organized corporations of ethnic groups like the Egyptian and Phoenician merchants in the large commercial centers, those of Alexandria constituted an independent political community, side by side with that of the other ethnic groups.

Strabo reported that the Jews of Alexandria had their own ethnarch, who managed community affairs and legal matters similarly to a head of state. The Hellenistic Jewish community of Alexandria translated the Old Testament into Greek. This translation is called the Septuagint.

Jesus Christ preaching in Palestine was evident only in his last three years, where was he before that?

The translation of the Septuagint itself began in the 3rd century BCE, was completed by 132 BCE initially in Alexandria, but in time elsewhere as well. It became the source for the Old Latin, Slavonic, Syriac, Old Armenian, Old Georgian, and Coptic versions of the Christian Old Testament.

Was the Hellenistic religion a precursor of Christianity?!

Or./ Did Christianity begin in Egypt, before Hellenism?! Can this mean that the early Christian theology emerged in Egypt?! Many archeological & historic evidence support this, very few in Palestine.

Plan of Alexandria city 30 BCE displaying a complete Jewish quarter nearby to the ruler palace! (this emphasis that there was no Exodus, on the contrary the Jews affected the rulers policy since then)

- Photo in the Grand Egyptian museum showing Akhenaten-Ekhnaton beside carved stone bricks that were in his temple before it was removed from tal-Amarna, Strangely these stones were used - not displaying the carving, only showing the blank side- in another temple in Luxor!! (were found recently in the internal structure of a wall in Luxor temple! Indicating being of a good quality used but well-hidden nature & history! Who did that?)

Al-Maeda: 5-111.

In this verse GOD is clarifying that the name disciples is NOT only related to the followers of the Christ during his life. As is stated in this verse these group of people followers of HOR أَتْبَاعُ حور as symbol of the righteous (In ancient Egypt is Son of Isis and Osiris, he famously defeated his uncle Set -evil symbol- to avenge his father and rule Egypt.

His symbol, the Eye of Horus, represents protection and restoration. Accordingly, the adjective of HOR in Arabic حواريين will be the same for what is known in English as disciples. Hence, GOD is ordering this group of people to believe in GOD and his messenger: the Christ, they replied instantly by doing so, and admitting that they surrender to this issue as followers of the same path of HOR (in Arabic submission to GOD is as the surrender = مسلم In fact this is the adjective they said about their nature instantly (being Muslims = surrenderers to GOD (مسلمون)

وَإِذْ أَوْحَيْتُ إِلَى الْخَوَارِجِ أَنْ آمِنُوا بِي وَبِرَسُولِي قَالُوا ءَامِنَّا وَأَشْهَدُ بِأَنَّنَا مُسْلِمُونَ ﴿١١١﴾

Meaning: And when I inspired those who accompany the Christ (disciples): 'Believe in Me and in My Messenger.' They said, 'We have believed, so bear witness that We have submitted.

Al-Maeda: 5-119:

This verse is a reply to the just previous verses, that on the day of Judgement, GOD will reward the monotheistic righteous by giving

them immortality in paradise, then GOD mentions something beyond our imagination, that GOD will be pleased-satisfied by them & they will be also pleased and satisfied by GOD. Is it a mutual relation?!

As the meaning of one of the geometric shapes used in early Islam, six-pointed star formed by two overlapping equilateral triangles, which later became a symbol of Jewish identity, 17th century!

In Islam, the six-pointed star is traditionally known as the "Seal of Solomon" (Khatam Suleiman) or sometimes Najmat Dawud (Star of David). It is a historical symbol representing the prophets Solomon and David, frequently used in Islamic art, architecture, and on historical coins. It was not exclusively a Jewish symbol until modern times. Stars in Symmetry Stars in Symmetry +1

The Seal of Solomon: The hexagram is more commonly called the "Seal of Solomon," symbolizing wisdom and protection. Architectural Feature: The symbol is found in many historical mosques, on the walls of Jerusalem's Old City, and on buildings from the Mamluk period. Use in Flags and Art: The star was used by medieval Muslim empires, such as the Anatolian Beyliks and by the Ottoman admiral Hayreddin Barbarossa. It was also found on the Moroccan flag until 1945. Symbolism: It often represented the union of opposites—heaven and earth, or spiritual and material—similar to its use in other traditions, but tailored to Islamic, spiritual contexts. Modern Context The symbol's usage in the Islamic world has significantly decreased, becoming rare, due to its association with the flag of Israel and the Zionist movement in the 20th century.

This makes it clear that whatever we do on earth will be reflected upon us in heaven. Also, apparently there no relation between this symbol and the Jews.

قَالَ اللَّهُ هَذَا يَوْمٌ يَنْفَعُ الصَّادِقِينَ صِدْقُهُمْ ۚ لَهُمْ جَنَّاتٌ تَجْرِي مِنْ تَحْتِهَا الْأَنْهَارُ خَالِدِينَ فِيهَا أَبَدًا ۖ رَضِيَ اللَّهُ عَنْهُمْ وَرَضُوا عَنْهُ ۚ ذَلِكَ الْفَوْزُ الْعَظِيمُ

Meaning: God will say, “This is a Day when the truthful will benefit from their truthfulness.” They will have Gardens beneath which rivers

flow, wherein they will remain forever. God is pleased with them, and they are pleased with Him. That is the great attainment.

Hexagonal star in Islamic architecture with "Allah الله" meaning GOD written in Arabic at the star center.

Al-Anaam: 6-125:

In this Verse there is a strange resemblance for those who go away of Islam to those who go up in the atmosphere where they will suffer chest tightness! Lately, this was evident in mountain climbers and astronauts due to lack of oxygen which is important for breathing & life in general. This is another example of a verse that has a simple meaning can be accepted 14 centuries ago and another deeper recent scientific explanation. Meanwhile, a resemblance on the same verse mimicking non- Islam believers to those who lack the fundamentals of life!

فَمَنْ يُرِدِ اللَّهُ أَنْ يَهْدِيَهُ يَشْرَحْ صَدْرَهُ لِلْإِسْلَامِ وَمَنْ يُرِدْ أَنْ يُضِلَّهُ يَجْعَلْ صَدْرَهُ ضَيِّقًا حَزًّا كَأَنَّمَا يَصْعَدُ فِي السَّمَاءِ كَذَلِكَ يَجْعَلُ اللَّهُ الرِّجْسَ عَلَى الَّذِينَ لَا يُؤْمِنُونَ ﴿١٢٥﴾

Meaning: Whomever God desires to guide, He spreads open his heart to Islam; and whomever He desires to misguide, He makes his heart narrow, constricted, as though he were climbing up the sky. God thus lays defilement upon those who do not believe.

Al-anaam:6-133:

GOD confirms to us in this verse that we are indeed successors from the descendants of another people or species who transgressed against themselves and - as mentioned in Surah Al-Baqarah, verse 2 - disobeyed the command of their Lord. Our known history, which can be traced, extends back at most ten thousand years. However, there is indeed abundant evidence worldwide that confirms the existence of traces or remains of people who lived long before this date, and this has been proven by radiocarbon dating.

Another witness to this matter is that our master Idris, was one of the prophets sent to us after our master Adam. In the Torah, he is Cainan, son of Enosh, son of Seth, son of Adam, as in the Book of Genesis. It was also said that he was Idris, son of Jared, son of Mahalalel, and his

lineage goes back to Seth, son of Adam, and his name among the Hebrews. (Enoch) In the Arabic translation (Akhmakh), he is one of the ancestors of Noah. Ibn al-Jawzi mentioned his full lineage: Idris, peace be upon him, and his name is Enoch, son of Jared, son of Mahalalel, son of Cainan, son of Enosh, son of Seth, son of Adam. He was mentioned in Qur'an surah Mariem verses (56 & 57) He was the first of Adam's sons to be given prophecy after Adam and Seth. Ibn Ishaq mentioned that he was the first to write with a pen and he lived three hundred and eight years of Adam's life, "Idris," and scholars differed about his birth and upbringing. Some of them said that he was born in Palestine, and some of them said Egypt. When he grew up, GOD granted him prophethood.

He forbade the corrupters among the children of Adam from disobeying the law of Adam and Seth. A few obeyed him, but a large group did not. So he intended to leave them. He ordered those who obeyed him to do so. The burden of leaving their homelands was too much for them, so they said to him, "Where will we find, if we leave, a place like Babylon?" So he went out and they went out until they reached the land of Egypt and saw the Nile. He stood on the Nile and glorified GOD, it is said that Idris got the knowledge of ancestors. It is most likely that what is known as the Pyramid Texts has its origin in the scrolls sent to Idris, as they contain pure monotheism for GOD Almighty. Now its clear that even in ancient Egyptian times the struggle between right & wrong was present (as always), This is evident even among the ancient Egyptians after our master Idris - for example, Akhenaten - who was fought over despite being the king of Egypt, and Tutankhamun, the son of King Akhenaten (Amenhotep IV), Eighteenth Dynasty of Egypt in the history of ancient Egypt, and he was the King of Egypt from 1334 BC to 1325 BC The mystery surrounding the circumstances of his death has been a subject of much debate. Many consider his death at such a young age to be un-natural, especially given the evidence of fractures in his femur and skull, and his minister's marriage to his widow after his death and his subsequent appointment as a king! All these mysterious events...Some consider it one of the oldest assassinations in human history. Tutankhamun died

young and was buried in his tomb - KV 62 - in the Valley of Kings."...to be noted that all scrolls within his tomb were stolen.

Actually, this verse emphasis El-Baqaraa verse (2-30), that GOD already did that, and that we're descendants of other pre- historic Mankind who got extremely corrupted and didn't obey GOD's order, so there sudden extinction was a result.

GOD in this verse also assures that he doesn't need our response to his messengers, as his supreme nature being way above that. On the other hand, we're the ones who need to follow his instructions for our own good in life & afterlife.

وَرَبُّكَ الْغَنِيُّ ذُو الرَّحْمَةِ إِنْ يَشَأْ يُدْهِبْكُمْ وَيَسْتَخْلِفْ مِنْ بَعْدِكُمْ مَا يَشَاءُ كَمَا أَنْشَأَكُمْ مِنْ ذُرِّيَةِ
قَوْمٍ ءَاخَرِينَ ﴿١٣٣﴾

Meaning: Your Lord is the Rich Beyond Need, the Possessor of Mercy. If He wills, He can do away with you, and substitute whomever He wills in your place, just as He produced you from the descendants of another people.

Al-Araaf: 7-137:

Following what happened after the drowning of Pharaoh and his soldiers, GOD Almighty explains to us that the Israelites were inherited the East and West of the land (Egypt). Inherited Pharaoh & his kingdom = **No Exodus**.

Here it is clear from the location they were in after the drowning of Pharaoh that if they headed west, it would be in Egypt, or towards north if they were in Abyssinia, any way this negates the story of Exodus of the Israelites from Egypt. In the same verse context, it confirms the return of Israelites to Egypt and the destruction of all traces of Pharaoh and his people.

The question: Why were the monuments of ancient Egypt, preserved even after Islam?

Answer: Ancient Egyptian monuments were not to be worshipped and the temples were places of worship for a monotheistic religion. It is clear in the history of the ancient Egyptians, as in every era, that the struggle between good and evil also had a doctrinal aspect, meaning that some priests deviated from the monotheistic faith. There is no better evidence for this than the killing of Tutankhamun, the son of Akhenaten, who openly called for monotheistic worship

وَأَوْرَثْنَا الْقَوْمَ الَّذِينَ كَانُوا يُسْتَضَعُونَ مَشْرِقَ الْأَرْضِ وَمَغْرِبَهَا الَّتِي بَلَرْنَا فِيهَا وَتَمَّتْ
كَلِمَتُ رَبِّكَ الْحَسَنَىٰ عَلَىٰ بَنِي إِسْرَٰءِيلَ بِمَا صَبَرُوا وَدَمَرْنَا مَا كَانَ يَصْنَعُ فِرْعَوْنُ
وَقَوْمُهُ وَمَا كَانُوا يَعْرِشُونَ ﴿١٣٧﴾

Meaning: And We made the oppressed people inherit the eastern and western parts of the land, which We had blessed. Thus the fair promise of your Lord to the Children of Israel was fulfilled, because of their endurance. And We destroyed what Pharaoh and his people had built, and what they had harvested

There are many stories and myths in ancient Egyptian civilization that may have some truth or may reflect an aspect of a real story. This is evident, for example, in the story of Isis and Osiris. The rivalry between Horus and Set for the throne of Egypt is depicted in two different versions. The scenes from each version date back to the Pyramid Texts, which are considered the oldest source of this myth. Some of the spells of these texts state that Horus is the son of Osiris, that Set is his uncle and brother of Osiris, and that the assassination of Osiris is the main driving force behind this conflict. Other ancient Egyptian sources also depict Horus and Set as siblings.

This contradiction in relationship between Horus and Set persisted in many later sources, though the relationship between them is considered sibling in some instances and paternal in others! Therefore, we find that this story is similar to the story of the two sons of Adam, which is interspersed with many Israelite narratives, to the point that the names of Cain and Abel and the reason for the fighting between them are only found in Israelite narratives. According to the different names and dialects, and some of the stories and myths transmitted, it is possible that:

- Atum is the synonym for our master Adam. - Osiris is the synonym for our master Idris. - Seth is the synonym for the killer of the son of Adam. In ancient Egypt, Set was one of the most important figures in the myth of Isis and Osiris. He killed his brother Osiris, and thus became a demigod, or representative of evil and violence. Set was considered responsible for the desert, storms, violence, chaos, and darkness! He married his sister Nephthys and was killed by Horus, the son of his nephew Osiris. We find in this verse a close representation of these meanings in the graphic story. The representation of Set in the statues of the ancient Egyptians is with the head of a black dog! This is consistent with what is mentioned in the verse, and it is a depiction of an internal characteristic within him. Just as a dog panting, this evil one has a tendency to harm or seduce people, his nature!

وَلَوْ شِئْنَا لَرَفَعْنَاهُ بِهَا وَلَكِنَّهُ أَخْلَدَ إِلَى الْأَرْضِ وَاتَّبَعَ هَوَاهُ فَمَثَلُهُ كَمَثَلِ الْكَلْبِ إِنْ تَحْمَلَ
عَلَيْهِ يَلْهَثُ أَوْ تَتْرُكْهُ يَلْهَثُ ذَلِكَ مَثَلُ الْقَوْمِ الَّذِينَ كَذَّبُوا بِآيَاتِنَا فَاقْصُصْ الْقِصَصَ لَعَلَّهُمْ
يَتَفَكَّرُونَ ﴿١٧٦﴾

Meaning: Had We willed, We could have elevated him through them; but he clung to the ground, and followed his desires. His metaphor is that of a dog: if you chase it, it pants; and if you leave it alone, it pants. Such is the metaphor of the people who deny Our signs. So tell the tale, so that they may ponder.

Al - Tawbah: 9-36:

The division of the year into twelve months is a convention rooted in a combination of historical observations and mathematical considerations, primarily linked to the lunar cycle and its approximation of the solar year. Ancient civilizations, particularly the Mesopotamians, Egyptians, and Romans, played key roles in shaping our modern calendar. In Islam timekeeping system is lunar, tracking the phases of the moon. A lunar month, the time it takes for the moon to orbit the Earth, is approximately 29.5 days. Twelve lunar cycles amount to roughly 354 days, which is close to, but not quite, the length of a solar year (approximately 365.25 days). The adoption of a twelve-month system represents a compromise between lunar and solar cycles (which were mainly used in earlier civilizations). While not perfectly aligned with either, it provided a reasonably accurate framework for tracking seasons and agricultural cycles. The Romans, for instance, initially had a ten-month solar calendar, which was later reformed to include twelve months. Subsequent adjustments, such as the Julian and Gregorian calendars, further refined the system to better synchronize with the solar year, adding leap days and accounting for discrepancies. Here in this verse, denotes that GOD constructed this timekeeping system from the cradle of humanity, even when the lunar calendar became the Islamic one, giving a hint that a great change will happen. GOD constructed this timekeeping system In another way this verse tells us that there is relation between the solar and the lunar calendars. The rough estimate for this is about 12. In an astonishing way modern astronomy can tell us that the proximity of the sun to the moon happens nearly 12 times in a year! while each is rotating in his own orbit. How this was known 14 centuries ago?!

إِنَّ عِدَّةَ الشُّهُورِ عِنْدَ اللَّهِ اثْنَا عَشَرَ شَهْرًا فِي كِتَابِ اللَّهِ يَوْمَ خَلَقَ السَّمَوَاتِ وَالْأَرْضَ مِنْهَا أَرْبَعَةٌ حُرُمٌ ذَلِكَ الَّذِينَ الْفَتِمَ فَلَا تَظْلِمُوا فِيهِنَّ أَنْفُسَكُمْ وَقَتِّلُوا الْمُشْرِكِينَ كَافَّةً كَمَا يَقْتُلُونَكُمْ كَافَّةً وَأَعْلَمُوا أَنَّ اللَّهَ مَعَ الْمُتَّقِينَ ﴿٣٦﴾

Meaning: The number of months, according to God, is twelve months—in the decree of God— since the Day He created the heavens and the earth, of which four are sacred. This is the correct religion. So do not wrong yourselves during them. And fight the polytheists collectively, as they fight you collectively, and know that God is with the righteous

Younes: 10-79:

Science and knowledge are crucial for dominance in general, mainly kings and leaders made use of that. In ancient Egypt, at pharaoh's time he ordered that the best magicians to come so that they can defeat Moses as they thought he had only magic! Strangely, in Qur'an true magicians were linked to vast knowledge, both spiritual and scientific. Actually, this was quite evident, on the day they challenged Moses following pharaoh orders to beat Moses magic!

It started by each throwing sticks and ropes to mimic the cobra snake which is a symbol of dominance of the king, then Moses threw his stick that swallowed all the others. In shadow of there vast knowledge they immediately believed in Moses GOD, and knew that this is the truth. In this aspect they were the first true believers for this new religion, they were Egyptian (so not only israelites who believed in Moses GOD). Their faith was even deeper than the Israelites (worshipped a monument at Moses time!!). They didn't fear pharaoh punishment (by amputating their arms or legs or even killing them) Even after he killed them he sent their bodies to their cities, Till this day Egyptians praised this by giving their names to their cities in their memory. Of the 17 cities carrying those believers names are:

Benha, Isna, Sohag, Qena, Barshot, Asuite, Manfalote, Dairote, Samalot, Deshna, Ahnasia, Gerga, Beba. Till this day, these are the names of famous Egyptian cities.

وَقَالَ فِرْعَوْنُ أَتَأْتُونِي بِكُلِّ سَاحِرٍ عَلِيمٍ ﴿٧٩﴾

Meaning: Pharaoh said, "Bring me every experienced sorcerer

Yusuf: 12-4:

This Surah starts and ends by a dream one can understand that the second one is the answer or fulfilment to the first one! Actually, the first one tells about 11 planets, the Sun & the moon prostrating to Yusuf! There are eight recognized planets in our solar system. They are, in order from the Sun: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus & Neptune.

However, there are large asteroids like planets in the solar system, several large asteroids exhibit characteristics that make them similar to planets. These are primarily found in the asteroid belt between Mars and Jupiter. as: - Ceres: The largest object in the asteroid belt and classified as a dwarf planet. Ceres has a diameter of about 940 kilometers (584 miles) and is spherical due to its own gravity. - Vesta: The second-largest asteroid, with a diameter of about 525 kilometers (326 miles). Vesta is not spherical but has a differentiated structure, including a crust, mantle, and core. - Pallas: The third-largest asteroid, with a diameter of about 512 kilometers (318 miles). Like Vesta, Pallas is irregularly shaped but has a significant size. - Hygia: Diameter: Approximately 434 kilometers (270 miles). The fourth-largest asteroid in the belt, Hygiea is almost spherical and is considered a candidate for dwarf planet status. To sum up those 12 planets (or planet like) in addition to the sun & moon can they symbolize Jakob, his wife and 11 brothers of Yusuf?

Along this Surah there is a link between symbols in some dreams & reality!! Maybe, sleep is a portal for other dimensions where even souls can communicate!! Its a strange expression for us, that was used in Qur'an for dreams, أحاديث if you google translate its Hadith (same Arabic word!), meaning conversations or whispers! In this context dreams can be divided into أضغاث أحلام رؤى meaning dreams with no actual meaning that we can all express as when we have dyspepsia or thirst, just before sleep we can have near similar vague dreams,

mounting to nightmares! Or, response to non-surrounding stimuli as a dream that can tell something in particular is going to happen in the future!! so we can really be in a portal that communicates with all these aspects, usually more than one dream or dimension responding even to the unknown!!

For Prophets (in Islam) this last type is an order from GOD, as in Ibrahim dream to slaughter his son Ismail, which was a test to Ibrahim, on starting to do so, GOD brought to him a nice sheep to sacrifice instead of Ismail, later this was a feast for Muslims. For us, we can all have this type as a *deja' vu*, this means that something you can see in your dreams can be in reality afterwards! What's more strange, there can be various dreams on one night responding to various stimuli, based on many things, wish further points to the nature of the person at that period. For example, longing for a dead parent or a friend, you can have a dream about that with a full discussion or simple request! On the other hand, it can be an expression of thinking about certain things or satanic effect as in erotic sexual dreams.

One of the Muslim prayers is to ask GOD to clarify things for them for choosing a specific mater called *صلاه إستخاره*. What is really astonishing, that the response for this choice can be in a dream. Actually, this destroys any materialistic theory for our existence, somewhere what will happen is known in advance (but, for whom?). No explanation among Athiests for this phenomena, as it simply means that in GOD's knowledge this will happen. On the other hand, in this verse there is a contradiction with previous Pegan beliefs as they worshiped only Sun or one of the stars usually Saturn, here there is mentioning of the moon which denotes Yusuf mother, also, shift to the feminen impact and attention to women wrights that got great success in Islam (also hints to relation of the menstrual cycle for women to the moon- around 28 days).

One major very nice dream that only few had all over history, is to dream of prophet Muhammed (peace be upon him), only for those who are kind hearted & worship GOD properly, then this dream is a reward with good omens in both life and after life. These various

stimuli during dream, if we associate them as in Qur'an أحاديث these can be as waves to which we respond, surrounding or non-surrounding, positive or negative. We can be in an intermediate phase, during our sleep, between life & death so we inter-communicate with both meanwhile! Clearly, this is a dimension we all pass by daily, nearly quarter of our life. However, science knows nearly nothing about! Some studies show that certain brain activity patterns during sleep may resemble those observed shortly after death, particularly in the transition phases.

إِذْ قَالَ يُوسُفُ لِأَبِيهِ يَا أَبَتِ إِنِّي رَأَيْتُ أَحَدَ عَشَرَ كَوْكَبًا وَالشَّمْسَ وَالْقَمَرَ رَأَيْتُهُمْ لِي سَاجِدِينَ ﴿٤٦﴾

Meaning: When Joseph said to his father, “O my father, I saw eleven planets, and the sun, and the moon; I saw them bowing down to me.”

Yusuf: 12-20

By any means GOD will give us a hint to keep seeking the truth. This verse states the currency by which master Yusuf was traded, which is Derhams which was the currency of southern Arabian peninsula, not the currency of the north Arabic peninsula at that time. The second remark is that this trade was done quickly by people who can at least understand each other, or have a common language. At that time the southern Arabian language which is referred to as Hameryan language was present in that region. So, Did master Yusuf came from Yemen?

وَشَرَوْهُ بِثَمَنٍ بَخْسٍ دَرَاهِمَ مَعْدُودَةٍ وَكَانُوا فِيهِ مِنَ الزَّاهِدِينَ ﴿٢٠﴾

Meaning: And they sold him for a cheap price—a few coins, Derhams—they considered him to be of little value.

Yusuf: 12-76:

This one of the most beautiful stories in Qur'an. Joseph (Arabic: يوسُف, Yūsuf) is regarded by the Quran as a prophet (Quran 6:84), and a whole chapter Surah Yusuf 12 is devoted to him, the only instance in the Quran in which an entire chapter is the complete story of a

person & his society. It is described in the Quran as 'the best of stories'. Joseph is said to have been extremely handsome, which attracted his Egyptian master's wife to attempt to seduce him. Muhammad is believed to have once said, "One half of all the beauty God apportioned for mankind went to Joseph and his mother; the other one half went to the rest of mankind." The story has a lot in common with the biblical narrative, but with certain differences. In Qur'an the brothers ask Jacob ("Yaqub") to let Joseph go with them. Joseph is thrown into a well, then was taken as a slave by a passing caravan. When the brothers claimed to the father that a wolf had eaten Joseph, he observed with patience. His brothers brought an untorn chemise to their father (with blood on) claiming that

this is of Joseph when the wolf ate him. When Jacob learned their story after their return, he cried in grief for so long that he lost his eyesight because of sorrow. He thus charged his sons to go and inquire about Joseph and his brother and despair not of God's mercy. Joseph at that time, after being sold as a slave, was brought up at the King's house. The King's wife tried to seduce him, though his chemise was torn not from the front but from the back (this was the proof needed for his innocence, even though, he was sent to prison! At the prison he explained the king's repeated strange dream, which was the reason to get out of jail and be an important member in ruling Egypt. It was during this return to Egypt that Joseph disclosed his real identity to his brothers. He admonished and forgave them, he sent also his garment which healed the patriarch's eyes as soon as it was cast unto his face. The remaining verses describe the migration of Jacob's family to Egypt and the emotional meeting of Jacob and his long lost son, Joseph. The family prostrated before him hence the fulfilment of his dream aforetime. Lessons to learn from Joseph story:

- Criminals sometimes wear the clothes of advisers. Satan said to your father Adam, "Shall I direct you to the tree of immortality?" And your brothers said to your father Jacob, "Indeed, we are sincere to him." "And we are to him." To protect you!"

- Good and evil are not in things, but rather in the way we comprehend. Your shirt was once a tool of lying, once it was evidence of innocence, and sometimes It's a sign for good news!
- It is a very materialistic world; everything can be for sale!
- Noble people don't betray. A free man does not return kindness with evil.
- Obeying GOD at ease times, GOD will support during rough times.
- There are many oppressed people in prison. Injustice is long-standing among History.
- The taste of faith overcomes the bitterness of life. Had you betrayed GOD, the whole palace would have been for you.
- Corruption often results from poor management, not from lack of resources. When you saved people of Egypt from drought, you did not need new resources, but with only new administrative mentality for the same resources. Applicable currently for all countries!

The evidence in the story of Joseph is that: the ruling style in Egypt differs from the time of "Pharaoh, therefore the ruler was given the King title in Qur'an.

Indeed, it is logical that it is a just monotheistic worship and hence the call of Josef for his brother to enter the religion of the king. Otherwise, GOD wouldn't mention the king's religion except that this was the wright one (in Islam there is only one religion explained by many messengers). This is close to the belief of the ancient Egyptians, which was explained in the: "Book of the Dead" and the: "Texts of the pyramids". This gives clue to calling them the "Ancient Egyptians" not the "Pharaohs" which is pure slander. Perhaps the earliest form of a monotheistic theology also emerged in Egypt, with the rise of the Amarna theology (or Atenism) of Akhenaten (14th century BC). This is close to the belief of the ancient Egyptians, which was explained in the: "Book of the Dead" and the: "Texts of the pyramids".

This gives clue to calling them the "Ancient Egyptians" not the "Pharaohs" which is pure slander. Perhaps the earliest form of a monotheistic theology also emerged in Egypt, with the rise of the Amarna theology (or Atenism) of Akhenaten (14th century BC). Quotations are taken from Christian Jacq, *The Living Wisdom of Ancient Egypt*. "Great is the Law (Maat)." (p. 24) "All conduct should be so straight that you can measure it with a plumb-line." (p. 27) "Injustice exists in abundance, but evil can never succeed in the long run." (p. 32) "Punish with principle, teach meaningfully. The act of stopping evil leads to the lasting establishment of virtue." (p. 32) "The human race never accomplishes anything. It's what God commands that gets done." (p. 41) "Those whom God guides do not go wrong. Those whose boat He takes away cannot cross." (p. 43).

فَبَدَأَ بِأَوْعِيَّتِهِمْ قَبْلَ وَعَاءِ أَخِيهِ ثُمَّ اسْتَخَرَهَا مِنْ وَعَاءِ أَخِيهِ كَذَلِكَ كِدْنَا لِيُوسُفَ مَا كَانَ لِيَأْخُذَ أَخَاهُ فِي دِينِ الْمَلِكِ إِلَّا أَنْ يَشَاءَ اللَّهُ نَرْفَعُ دَرَجَاتٍ مَن نَّشَاءُ وَفَوْقَ كُلِّ ذِي عِلْمٍ عَلِيمٌ ﴿٧٦﴾

Meaning: So he began with their bags, before his brother's bag. Then he pulled it out of his brother's bag. Thus We devised a plan for Joseph; he could not have detained his brother under the king's law, unless God so willed. We elevate by degrees whomever We will; and above every person of knowledge, there is one more learned.

Yusuf: 12-82

The story of Joseph took place mostly in Egypt. Within this section, we find many words that originate from ancient Egyptian (hieroglyphics) and not Arabic! This verse clarifies this meaning, as it is unreasonable for Joseph's brother to take the cattle as a witness العير. The strangest thing is that the word "ar-her" in hieroglyphics means "attende," and "her" is a form of respect! (Wallace Budge's *Egyptian-Hieroglyphic Dictionary*, p. 65) We find numerous examples of this throughout Surah Yusuf, such as the word "sa'a," صواع meaning a drinking vessel (same dictionary, p. 592). And what the wife of Al-'Aziz said, such as "heet, هيت" which means in hieroglyphics "I took off my clothes." The other word she said was "hashas," meaning "ignite" or

"clarify. It is astonishing that Qur'an used previous languages words! Another meaning is to show the justice of the king of Egypt in this era, which differs from the time of Pharaoh (not Egyptian), and that the monotheistic faith is closest to the ancient Egyptians (the Pyramid Texts and the Book of the Dead).

وَسَلِّ الْفَرِيَّةَ الَّتِي كُنَّا فِيهَا وَالْعِيرَ الَّتِي أَقْبَلْنَا فِيهَا وَإِنَّا لَصَادِقُونَ ﴿٨٢﴾

Meaning: Ask the town where we were, and the caravan in which we came. We are being truthful.

Yusuf: 12- 84

In the medical field we can comprehend white eyes as corneal opacity or cataract Hypertensive cataract refers to cataracts that develop as a result of chronic hypertension (high blood pressure). High blood pressure can lead to changes in the eye's cornea or lens, which may contribute to blindness. Here are some key points regarding hypertensive effects for both conditions: Causes: - Chronic Hypertension Long-term high blood pressure can affect the vascular supply to the eye, contributing to lens opacification or corneal opacity. - Increased oxidative stress related to hypertension may damage lens proteins or cornea layers, leading to vision dimness. In a very smooth nice way Qur'an tells us that Jackob was stressed and got hypertension since he lost Yusuf, this evolved to cataract or corneal opacity appearing as if white eye when he knew that his other son was accused of robbery Again, along centuries there can be more profound meaning for the same verse! white eyes as corneal opacity or cataract!

وَتَوَلَّى عَنْهُمْ وَقَالَ يَا أَسْفَىٰ عَلَىٰ يُوسُفَ وَأَبْيَضْتُ عَيْنَاهُ مِنَ الْحُزَنِ فَهُوَ كَظِيمٌ ﴿٨٤﴾

Meaning: Then he turned away from them, and said, "O my bitterness for Joseph." And his eyes turned white from sorrow, and he became depressed.

Yusuf: 12-100:

In this verse, GOD explains that Yusuf dream at the beginning of the surah & story came true. However, there is one very important meaning in this verse that the prostration by his Father (Prophet), mother & brothers was in the Known ancient Egyptian way, mentioned & image in verse 17-107, where the face is facing the messenger (king) meaning that they admit their faith in him, not that they worship him, this was crucial in ancient Egyptian theology.

Prophet Jacob knew that his son now became a messenger of GOD, that's why he prostrated to him by the face up looking to that messenger or king as they believed what he's saying.

In fact, the way Muslims prostrate now, with face down towards earth, this means belief in only the creator of this earth (extremely different meaning).

This can also tell that ancient Egyptians didn't worship their kings this was only a sign of obeying this king or Prophet. Another remark, is the link between his mother and the moon different nature than the others (woman- menstrual cycle), In the Surah beginning he saw the Sun (father-Jacob), moon (Mother), 11 planets (brothers).

وَرَفَعَ أَبَوَيْهِ عَلَى الْعَرْشِ وَخَرُّوا لَهُ سُجَّدًا وَقَالَ يَا أَبَتِ هَذَا تَأْوِيلُ رُؤْيَايَ مِنْ قَبْلُ فَقَدْ جَعَلَهَا رَبِّي حَقًّا وَقَدْ أَحْسَنَ بِي إِذْ أَخْرَجَنِي مِنَ السِّجْنِ وَجَاءَ بِكُمْ مِنَ الْبَدْوِ مِنْ بَعْدِ أَنْ نَزَغَ الشَّيْطَانُ بَيْنِي وَبَيْنَ إِخْوَتِي إِنَّ رَبِّي لَطِيفٌ لِمَا يَشَاءُ إِنَّهُ هُوَ الْعَلِيمُ الْحَكِيمُ

Meaning: And he elevated his parents on the throne, and they fell prostrate before him. He said, “Father, this is the fulfillment of my vision of long ago. My Lord has made it come true. He has blessed me, when he released me from prison, and brought you out of the wilderness, after the devil had sown conflict between me and my brothers. My Lord is Most Kind towards whomever He wills. He is the All-knowing, the Most Wise.”

This beautiful verse signifies that Monotheism was the dominant concept in ancient Egypt At the time of Yusuf. As there are many characters in the verse, all showing the same concept except his 2 companions at the prison. To be noted that even the King upon knowing that Yusuf was a very honest righteous person, he got him out of the prison and appointed him as the prime minister, this tells about the nature of ancient Egyptian kings which is exactly the (leader of the invaders- Hyksos) One valuable remark also is that the ancient Egyptian kingdom didn't invade other nations, bit only some battles to secure its borders. Similar only to one big nation at its most which is Islamic spread (9th century), this also didn't depend on military invasion but to live in harmony with others even free religion only paying (el-gezia . الجزية) This is a totally different perspective to invaders of the later empires like the Roman, Spanish, European then the British and the American.. Some of those Empires even forced Religion of the empire to be only the one they chose, as in Spain during the 15th century overthrowing Muslims & Jews as in the Reconquista

لَقَدْ كَانَ فِي قَصَصِهِمْ عِبْرَةٌ لِّأُولِي الْأَلْبَابِ مَا كَانَ حَدِيثًا يُفْتَرَىٰ وَلَكِن تَصْدِيقَ الَّذِي بَيْنَ يَدَيْهِ وَتَفْصِيلَ كُلِّ شَيْءٍ وَهُدًى وَرَحْمَةً لِّقَوْمٍ يُؤْمِنُونَ ﴿١١١﴾

Meaning: In their stories is a lesson for those who possess intelligence. This is not a fabricated tale, but a confirmation of what came before it, and a detailed explanation of all things, and guidance, and mercy for people who believe.

Al-Ra'd: 13-2:

One of the nice things about the Holy Qur'an is that it suits people in each era. For example, at the time of the revelation of this noble verse, people could understand that the heavens are raised without pillars, which can be regarded as a miracle. Recently in the current era, it is possible to understand that the dark matter in the universe or black holes the that we do not see are the mainstay of raising the sky, which can give the same explanation in the opposite way- presence of unseen pillars!!

The later part of the verse is possible to understand because the sun and the moon strive for their named purpose, and recently it has been possible to know that the stars, planets and moons have orbits so that it appears as if they are running up and down and have life cycles until they grow old and die to be transformed to other forms among them are black holes. The complexity of planets rotation that is not random but is extremely precise following a rather elliptical pattern, with up and down movement, surprisingly the same movement as if one is running in a track! with up and down motion as he/she steps! All these evidences are made by GOD in order to comprehend that GOD exists and similarly you will be running throughout all your life, and after you die you be resurrected to meet GOD.

اللَّهُ الَّذِي رَفَعَ السَّمَوَاتِ بِغَيْرِ عَمَدٍ تَرَوْنَهَا ثُمَّ أَسْتَوَىٰ عَلَى الْعَرْشِ وَسَحَّرَ الشَّمْسَ وَالْقَمَرَ كُلٌّ يَجْرِي لِأَجَلٍ مُّسَمًّى يُدَبِّرُ الْأَمْرَ يُفَصِّلُ الْآيَاتِ لَعَلَّكُمْ بِلِقَاءِ رَبِّكُمْ تُوقِنُونَ ﴿٢﴾

Meaning: God is He who raised the heavens without pillars that you can see, and then settled on the Throne. And He regulated the sun and the moon, each running for a specified period. He manages all affairs, and He explains the signs, that you may be certain of the meeting with your Lord.

Ibrahim: 14-37:

Our master Abraham is one of the most revered prophets in all heavenly religions. In a unique and significant incident, our master Abraham, his Egyptian wife Hagar, and their infant son Ismail traveled by divine command to Bakkah in a desert valley. There was no crops or water. According to this order, he left them to their fate in this valley, which, by modern standards, amounts to a death sentence! But the opposite happened.

First, Hajar asked him to ascertain whether this was a divine command. When Abraham answered yes, she agreed, left him, and sought water first by walking between Safa and Marwa, completing seven circuits between them. The answer to her prayers was instant as the well of Zamzam came with profuse water at that place and will remain till the day of Judgement for everyone who goes there!

Considering the Quranic expression “the hearts of some people yearn for them,” we can understand from this that this place was a destination for worship for some righteous people and not for ordinary travelers, as evidenced by the purpose in the same verse, which is the establishment of prayers. In Surah Al-Ma'idah, verse 69, God mentions the Sabians with those who believed and did righteous deeds. Knowing that the Sabians were Harranians (those who fled with their religion from Egypt at a time of oppression by the rulers), this could be a reference to the worship or pilgrimage of the Egyptians to this place even before Islam! This idea is supported by the fact that the Hejaz region itself was named after the ancient Egyptian language (and written in Hieroglyphs) meaning “heading towards the light.” (Hajj means light and Az means “heading towards.”) In addition to the many drawings in ancient temples of people prostrating on their chins, and they even have imams, nowadays known in arabic to be the prayer leader. The inscriptions on the Maqam Ibrahim itself are in the colloquial dialect of ancient Egyptian (hieratic).

Were they written by Hagar or a Sabian? After Hajar's running between Safa and Marwa and her infant son, our master Ismail, crying, the first miracle happened, the well of Zamzam gushed forth at the place where he set foot so that they could drink from it, and so that this supplication of our master Abraham would remain answered until the Day of Judgment. To honor and commemorate this event, every pilgrim and Umrah performer still performs these rituals while worshipping at the Sacred House. It is a sign of GOD Almighty's generosity that when He answered the call of our master Abraham, his call extends to all believers to this day.

The noble prophetic hadith that explains the prophets and messengers of the Children of Israel so that we can be certain that among them: **is not our master Abraham, our master Jacob, or our master Joseph**, peace be upon them, and that all of that is can be only a Jewish narrative. Al-Tabari, in Stories of the Prophets, on the authority of Abu Dharr, said: The Messenger of GOD, may GOD bless him and grant him peace, said:

“The first of the prophets of the Children of Israel was Moses, and the last of them was Jesus.”

Thus, our master Muhammad - God bless him and grant him peace - is the call of Abraham, the prophecy of Moses, the song of David, and the good news of Jesus

رَبَّنَا إِنِّي أَسْكَنْتُ مِنْ ذُرِّيَّتِي بِوَادٍ غَيْرِ ذِي زَرْعٍ عِنْدَ بَيْتِكَ الْمُحَرَّمِ رَبَّنَا لِيُقِيمُوا الصَّلَاةَ
فَأَجْعَلْ أَقْنَدَةً مِنَ النَّاسِ تَهْوِي إِلَيْهِمْ وَأَرْزُقْهُمْ مِنَ الثَّمَرَاتِ لَعَلَّهُمْ يَشْكُرُونَ ﴿٣٧﴾

Meaning: Our Lord, I have settled some of my offspring in a valley of no vegetation, by Your Sacred House, our Lord, so that they may perform the prayers. So make the hearts of some people incline towards them, and provide them with fruits, that they may be thankful.”

Ibrahim: 14-24:

This Aya, has a known meaning That the words of monotheism لا إله إلا الله has an instant good reflection on the same person and later in heavens and afterlife. However, a new meaning came after Dr. Masaru Emoto, (Japanese scientist) which suggests that water possesses the ability to respond to human consciousness, intentions, words, and vibrational frequencies that water molecules act as a "biological computer," capable of storing and reflecting environmental energy. By utilizing high-speed microscopic photography of frozen water crystals, he demonstrated positive stimuli such as the words "love" and "gratitude" or classical music result - aesthetically in symmetrical hexagonal structures. Conversely, negative stimuli like hateful words or heavy metal music produce chaotic and fragmented formations!

This finding is analyzed within a spiritual framework, suggesting a scientific basis for the effects of Quranic recitation and prayer. 70% of Our bodies consists of water, now one understands the effect of self encouragement by good words, even to others. We can now comprehend the effect of Supplication, on our lives, as GOD fortifies this effect.

أَلَمْ تَرَ كَيْفَ ضَرَبَ اللَّهُ مَثَلًا كَلِمَةً طَيِّبَةً كَشَجَرَةٍ طَيِّبَةٍ أَصْلُهَا ثَابِتٌ وَفَرْعُهَا فِي السَّمَاءِ ﴿٢٤﴾

Meaning: Do you not see how God presents a parable? A good word is like a good tree—its root is firm, and its branches are in the sky.

Words effect upon water crystals.

El-Hagar: 15-15:

It is confusing how this verse & the one preceding it (15-14), describe what will happen if one ascends in the sky (as if disbelievers do so). What was logic since 14 centuries was ascending in the sky by daylight, will be in a linear pathway towards brighter light (nearer to sun). However, in these two verses the exact opposite was stated (typical to the most recent available scientific knowledge). Upon ascending in sky one follows a curvy route (to avoid gravitational and magnetic stellar fields). Also, it becomes significantly darker upon ascending into space. While Earth's sky appears bright blue due to sunlight scattering off atmospheric particles, outer space is a near-perfect vacuum that does not scatter light, resulting in a pitch-black appearance, even when the Sun is visible. On Earth, air molecules (nitrogen, oxygen) scatter sunlight, creating a bright blue sky during the day.

In space, there is no air or dust to scatter the light, so the sky appears as a black void. The void effect: Without matter to reflect light into your eyes, space looks like absolute darkness (black), even though the Sun is shining nearby. Gradual Transition: As you ascend in altitude, the atmosphere becomes thinner, and the sky gradually shifts from blue to a dark blue, then purple, and finally black. High contrast: In space, there is no atmosphere to disperse light, creating harsh, intense contrasts between direct, blinding sunlight and deep shadow. Visibility of stars: Because the, sky is no longer bright blue, stars are visible in space even during the "daytime". To add to the mystery the following verse (15-16) actually hints to this sequence and that the stars will be always visible as a guide. This verse matches even with physics centuries ago, as bright light is needed for the clarity of vision! Same text, varying correct explanations along history!! Miracle.

لَقَالُوا إِنَّمَا سُكِّرَتْ أَبْصَارُنَا بَلْ نَحْنُ قَوْمٌ مَّسْحُورُونَ ﴿١٥﴾

Meaning: They would still say, "Our eyes are hallucinating; in fact, we are people bewitched

El-Nahl: 16-66.

The gut barrier membrane, a critical interface between the host and the external environment, plays a vital role in maintaining overall health. This semi-permeable structure, composed of a single layer of epithelial cells connected by tight junctions, selectively allows the absorption of essential nutrients while preventing the passage of harmful substances, such as bacteria, toxins, and undigested food particles.

Disruption to the gut barrier's integrity, often referred to as "Leaky Gut," can lead to systemic inflammation and contribute to the pathogenesis of various disorders, including autoimmune diseases, metabolic syndrome, and even neurological conditions. Factors such as diet, stress, and the gut microbiota can significantly impact the gut barrier's function. The same applies to the blood-brain barrier, preserving the integrity of these delicate membranes is paramount for maintaining homeostasis and preventing disease. It is astonishing in view of this verse to mention that protective barriers have role in preserving blood from harmful gut contents then another semi-permeable membrane regulates milk secretion in cows! Cutting edge scientific facts highlighted since 14 centuries!

وَإِنَّ لَكُمْ فِي الْأَنْعَامِ لَعِبْرَةً ۚ تُسْقَوْنَ مِنْ بَطْنِهِۦ ۖ مِنْ بَيْنِ فَرْثٍ وَدِمِّ لَبَنًا خَالِصًا سَابِغًا
لِّلشَّرِبِينَ ﴿٦٦﴾

Meaning: And there is a lesson for you in cattle: We give you a drink from their bellies, from between waste and blood, pure milk, refreshing to the drinkers

El-Nahl: 16-69:

In this verse a closer look to the Bee life which the whole Surah or chapter has the name. A more specific detail is to the way bee honey is processed. First, it sucks variant flowers nectar according to its environment, this, has impact to the color of honey (various colors as

stated in the same verse). Actually this fluid is stored not in the bee stomach, but in a special diverticulum known as the crop. It's a specialized part of a bee's digestive system that stores nectar before it is converted into honey. When bees collect nectar from flowers, they store it in this organ, which is located near their throat, in order not to be digested! In the same verse GOD is giving a hint how bees return to their hives, by marks on their way they will memorize! Once they return to the hive, they regurgitate the nectar from the honey stomach to other worker bees, who then process it further by mixing it with enzymes and evaporating water to create honey.

This is a crucial aspect of how bees produce honey and store food for the colony. A structural puzzle to this verse is noted: that bees are addressed at the beginning of the verse in a single form, then suddenly to the plural form when they excrete honey from their crops! " يخرج من بطونها " Very recently, this was noted on studying the bee life, that another group of bees process this nectar to give the full characteristics of honey! Another astonishing example of the group work in bees life! Bee honey offers a variety of health benefits for humans due to its natural properties (Nutritional, wound healing, sore throat therapy, digestive health, energy boost, skin benefits & allergy relief) The other thing in this verse is how or where the bee extracts the honey, amazingly its in a hexagonal bee comb. This consistent, nearly universally similar, hexagonal structure of honeybee combs has long fascinated scientists and mathematicians. This shape provides the optimal ratio of storage volume to perimeter, minimizing the amount of wax required for construction and maximizing space for honey and brood

ثُمَّ كُلِي مِنْ كُلِّ الثَّمَرَاتِ فَاسْلُكِي سُبُلَ رَبِّكِ ذُلًّا يَخْرُجُ مِنْ بُطُونِهَا شَرَابٌ مُخْتَلِفٌ أَلْوَنُهُ فِيهِ شِفَاءٌ لِلنَّاسِ إِنَّ فِي ذَلِكَ لَآيَةً لِقَوْمٍ يَتَفَكَّرُونَ ﴿٦٩﴾

Meaning: Then eat of all the fruits, and go along the pathways of your Lord, with precision. From their bellies emerges a fluid of diverse colors, containing healing for the people. Surely in this is a sign for people who reflect.

Migratory birds undertake remarkable journeys spanning vast distances, navigating with impressive accuracy. This feat has prompted considerable scientific inquiry into the mechanisms underlying their navigational abilities. While the notion of migratory birds possessing a literal Global Positioning System (GPS) is inaccurate, their navigational prowess relies on a sophisticated suite of biological tools. Research suggests that birds utilize a combination of cues, including the Earth's magnetic field, solar position, and star patterns, to orient themselves. Specialized sensory receptors allow them to detect magnetic fields, providing a compass-like sense of direction. Some researchers say that they have crypto-chrome pigments in their eyes that can see magnetic fields! The position of the sun and stars offers additional reference points, particularly during daylight and nighttime migration, respectively.

Furthermore, some species appear to possess an innate sense of direction, passed down through generations, which guides their initial migratory routes. Some migratory birds use their sense of smell (olfaction) as a guide, often described as an "olfactory map" to navigate. Research indicates that birds when flying in groups it is usually in an astonishing aerodynamic pattern to reduce air resistance. Birds may use smell to identify specific, consistent, or familiar odours, such as sea spray or coastal vegetation, to help them navigate during long-distance flights. (ScienceDaily ScienceDaily +7). What is astonishing is that all these ideas are combined in this verse, denoting that through these factors or powers combined, GOD compels birds through their journeys to specific destinations. This remark was given more than 14 centuries ago!

أَلَمْ يَرَوْا إِلَى الطَّيْرِ مُسَخَّرَاتٍ فِي جَوْ السَّمَاءِ مَا يُمْسِكُهُنَّ إِلَّا اللَّهُ إِنَّ فِي ذَلِكَ لَآيَاتٍ لِّقَوْمٍ
يُؤْمِنُونَ ﴿٧٩﴾

Meaning: Have they not seen the birds, flying in the midst of the sky? None sustains them except God. In this are signs for people who believe

Al-Israa: 17-1:

This verse is telling about **GOD** almighty capability and knowledge throughout time and space. First the Isra' of prophet Muhammed, which means his space & time travel from Mekkah (Kaaba) to Aqsaa (Farthest) mosque (the place it will be in) in Jerusalem, only in an overnight, this can be a miracle for believers, as no body witnessed. Now we can begin to understand this in view of Einestein's theory of relativity and breaking of the space and time fabric, as **GOD** is the only one who can do so in this way, by breaking all physics laws. In the second part of the verse this is more evident as **GOD** emphasis this meaning by blessing around the Aqsaa mosque. This can be comprehended as **GOD** has sent nearly all his messengers around this place. If we consider Judaism, Christianity & Islam as the main revelations sent by **GOD** to mankind, this area has a common history shared by all of them. Throughout history, this is more manifest at Omar ibn Khattab the second Islamic Khalifa where he ordered that the Jews to be brought again to this area, after being expelled from it (being the new ruler of this region), so that Muslims, Christians & Jews live together. Again, this happened at Saladin time, even throughout history, many wars till the present time (war on Gaza) took place to evaluate people behavior, again space & time! In a way, it can be understood that **GOD** points that those revelations are sent by the same one **GOD** for all people.

Actually, this is directly stated in the Qur'an (Verses 2: 130- 140) that Ibrahim, Ismail, Isaac, Jakob, Moses, Jesus & the tribes, in addition to other messengers are all Muslims (in Arabic is an adjective that means surrender in Qur'an means submit to **GOD**). It is not known exactly when Al-Aqsa Mosque was first built, but it is mentioned in the hadiths of our Master Muhammad (peace and blessings be upon him) that it was built by Adam 40 years after the Kaaba was built. After the era of Adam, news of the mosque ceased due to the lack of dating

during that period. Historical information was recorded about the first group of humans. 1550 BC (a Canaanite tribe اليوسيون, who built the city of Jerusalem) (it is said that they were origin of the Arabs) - who came to Jerusalem and inhabited it. They are the Jebusites) 3000 AD. Remains of the Jebusites' antiquities even remain in the walls of Al-Aqsa Mosque, according to some researchers.

During that period, Abraham migrated to the city of Jerusalem, renovated the mosque, and prayed in it. His son Isaac and his grandson Jacob did the same after him. After that, the city of Jerusalem and Al-Aqsa Mosque was transferred to ancient Egyptians 1550-1000 B.C, the most powerful kingdom at that time. Then to "The Giant People", who took control of it - after which Prophet David (Tuhtmose I?) took control & expanded the city, and renovated Al-Aqsa Mosque.

Then his son Solomon took over the rule, and he renovated the mosque. It is noteworthy that this period is consistent with what we will mention later, that our master David (most likely Thutmose I) was a military commander who led a successful campaign to secure the city, as did our master Solomon who inherited this city among the empire (most likely Thutmose III) (Surah An-Naml 15-17) He also was a military genius and support from humans and jinn who helped him build a kingdom that no one after him could have (in response to his call), as is clear from the monuments (beyond human ability) that he left behind in his kingdom that extended to Abyssinia (will be described later in Surah Al-Naml) where an ancient Bible was discovered dating about 2000 years ago, containing picture of Solomon temple, contrary to what is currently told by the Jews Al-Aqsa Mosque has remained the focus of great events. Hadith by Prophet Muhamad commenting on this event:

ثم استلم الحكم ابنه سليمان (تحتمس الثالث؟!)، فعمر المسجد وجده مرة أخرى، ويروي النبي محمد ذلك فيقول: «لما فرغ سليمان بن داود عليهما السلام من بناء بيت المقدس سال الله عز وجل ثلاثاً أن يؤتیه حكماً يُصاویفُ حکمه وملکاً لا ینبغی لأحد من بعده وأنه لا یأتی هذا المسجد أحدٌ لا یُریدُ إلا الصلاة فيه إلا خرج من ذنوبه كيوم ولدته أمه» فقال «النبي محمد: «أما اتنننن فقد أعطيهما وأرجو أن يكون قد أعطي الثالثة.

During the reign of Umar ibn al-Khattab, the second of the Rightly-Guided Caliphs, he ordered the return of the Jews to Jerusalem after they were expelled by the Romans, so that Muslims, Christians, and Jews could live together in peace. This happened again during the time of Saladin Ayyubi after the liberation of Jerusalem. Today, we witness the continuation of conflict in this region, such as the war on Gaza, which makes us realize that this spot of land has been and continues to be a focus of human testing throughout time. The concepts of justice and injustice, faith and tyranny are revealed, as if time and place act as factors to highlight human behavior before the eyes of history within the scope of this noble verse. Unity of Messages in the Qur'an which clearly confirms that all prophets came with the same message of monotheism. One strange thing about this verse that GOD points to Aqsa mosque in Jerusalem in Arabic as the farthest mosque... can this be an indication that there will be (in the future to this verse), another mosque in between those mosques (Mekah & Aqsa), which actually happened afterwards (El- Nabawi mosque in Madinah), so, there will be to more holy mosques related to the main Mekka mosque.

سُبْحَانَ الَّذِي أَسْرَىٰ بِعَبْدِهِ ۖ لَيْلًا مِّنَ الْمَسْجِدِ الْحَرَامِ إِلَى الْمَسْجِدِ الْأَقْصَا الَّذِي بَارَكْنَا حَوْلَهُ ۚ لِنُرِيَهُ مِّنْ ءَايَاتِنَا ۚ إِنَّهُ هُوَ السَّمِيعُ الْبَصِيرُ ﴿١﴾

Meaning: Glory to Him who journeyed His servant by night, from the Sacred Mosque, to the Farthest Mosque, whose precincts We have blessed, in order to show him of Our wonders. He is the Listener, the Beholder.

Isra': 17-4:

The strange thing about Surat Al-Isra' is that it was revealed in the tenth year of Muhamed's mission, that is before any real conflict with the Jews.

Just as this promise came in the Torah, it came in the Holy Qur'an, and they continued to kill the prophets and distort the word of GOD, and in fact they proved that they do not take lessons. Praise GOD Almighty's telling of people of Israel, that they will cause corruption in

the land twice indicates that their corruption extended to the rest of the earth through their control of the world power at that time, including the Eastern Roman empire before Islam, and what is apparent historically for this period is that the corruption was not military But most of it was ideological, such is mentioned in Qur'an. This gives clue that the corruption in the first time was to Christianity, for the second time to Christianity & Islam.

This influence continues until there are servants of GOD with great courage who expose their falsehood (and ideologically) and end their rule in the country in which their falsehood is based (this can apply also to the Arabian peninsula as the Jewish presence & effect was prominent at that time). Then the second corruption and superiority can be in an economic, media or military forms, comes with the presence of the Jewish effect around same region and all over the globe, as in the present time, so, the promise is fulfilled. This is manifest mainly by their over use of usury and spreading of prostitution, these two factors are the main reason for their repeated expulsion from Europe.

وَقَضَيْنَا إِلَىٰ بَنِي إِسْرَءِيلَ فِي الْكِتَابِ لُتْفُسُدْنَ فِي الْأَرْضِ مَرَّتَيْنِ وَلِتَعْلَنَ عُلُوًّا كَبِيرًا

Meaning: And We conveyed to the Children of Israel in the Scripture: You will commit evil on earth twice, and you will rise to a great height.

Israa: 17-6:

The word “We extended to you our supplies” more clearly indicates that these supplies (weather money or power) given to the Israelites, is not from their own work, but rather a follower of you, as if you (Jews) were their leaders or bosses.

From this, you find that the number of Jews in the world is small, but those who follow their ideas and work for them is a lot! Specific application is the Jews money power, is mainly in usury, which is forbidden by most revelations, and they misused this all the past centuries, that was also the reason for their expulsion from one place to the other as said in the verse. As the verse notifies, the Jews money

& power will dominate again with main control over the media (which happened lately). Was this a future revelation to what the Jews will do & what will happen accordingly!

ثُمَّ رَدَدْنَا لَكُمُ الْكَرَّةَ عَلَيْهِمْ وَأَمْدَدْنَاكُمْ بِأَمْوَالٍ وَبَنِينَ وَجَعَلْنَاكُمْ أَكْثَرَ نَفِيرًا ﴿٦﴾

Meaning: Then We gave you back your turn against them, and supplied you with wealth and children, and made you more numerous.

Israa': 17-7:

What can be clear here is that we are now in the stage of “make your faces look worse” which is concerned with exposing the falsehood of the Jews (despite their different colors), and that the word “afterlife” can also mean the second time in Arabic, as evidenced by the multiple mention of corruption before it, and it is the stage that precedes entering Al-Aqsa Mosque. The strange thing is that at the time of this verse revelation, there was no Al-Aqsa Mosque, and that it was built at its location after Yarmouk battle (where Muslims defeated the Romans), but its place was preserved (what's even more strange is that at the time the Romans handed over Jerusalem to Omar bin Al-Khattab, this place was deserted and the city was evacuated of the Jews!!

Caliph Umar ibn al-Khattab entered Jerusalem to accept its surrender in 637-638 CE, bringing the city under Muslim rule peacefully. He signed a treaty known as the Pact of Umar with Patriarch Sophronius, guaranteeing safety and religious freedom for the city's inhabitants. Significance: His entry marked the end of over 500 years of restriction on Jewish residence in the city. The Pact: Umar established a covenant, now known as the "Pact of Umar" or "Al-Uhda al-Umariyya," which provided security to Christians for their lives, property, and churches. He is famous for refusing to pray inside the Church of the Holy Sepulchre to prevent it from being converted into a mosque, choosing to pray outside instead. He cleaned the empty land near to it by his own hands to be a mosque. The Times of Israel +3 .

إِنْ أَحْسَنْتُمْ أَحْسَنْتُمْ لِأَنْفُسِكُمْ وَإِنْ أَسَأْتُمْ فَلَهَا فَإِذَا جَاءَ وَعْدُ الْآخِرَةِ لِيُسْـَٔلُوا وُجُوهَكُمْ وَلِيَدْخُلُوا الْمَسْجِدَ كَمَا دَخَلُوهُ أَوَّلَ مَرَّةٍ وَلِيُتَبِّرُوا مَا عَلَوْا تَتْبِيرًا ﴿٧﴾

Meaning: If you work righteousness, you work righteousness for yourselves; and if you commit evil, you do so against yourselves. Then, when the second promise comes true, they will make your faces filled with sorrow, and enter the Temple as they entered it the first time, and utterly destroy all that falls into their power.

Israa: 17-8:

Many of Qur'an verses gave frank predictions which is not surprising, that all came true, even in science (we discovered that after many centuries) as we elicited in this book.

Can this verse be one of them? as the Iranian war is still on, following the preceding verses, does this mean that many Israelites will flee out of Palestine as is described in the verse to the limit that they will no longer have control, again, as in verse, if they return (to this land or their aggression as they treat all others as -Goyem- animals (not humans according to their beliefs!)), GOD will punish them again.

عَسَىٰ رَبُّكُمْ أَنْ يَرْحَمَكُمۢۖ وَإِنْ عُثِرْتُمْ عُذَّتْنَا وَجَعَلْنَا جَهَنَّمَ لِلْكَافِرِينَ حَصِيرًا ﴿٨﴾

Meaning: Perhaps your Lord will have mercy on you. But if you revert, We will revert. We have made Hell a prison for the disbelievers.

Israa: 17-44

This is one of the seemingly ordinary verses, but in reality can be very difficult to understand or interpret! According to various strange experiments in quantum physics starting to wonder if observation, has an impact on the outcome observation of an experiment! Surprise!! There is and proven in many experiments Can this mean that we are living in an intelligent inter-active universe?!!! The observer effect in quantum physics refers to the phenomenon where the act of observation affects the behavior of a quantum system. Below are some key experiments that illustrate this effect:

1. **Double-Slit Experiment Overview:** This is the first and basic to observe this effect: When light or particles (like electrons) pass through two closely spaced slits, they create an interference pattern on a screen, suggesting wave-like behavior. However, if one tries to observe which slit the particle goes through, the interference pattern disappears, and the particles behave like classical particles, not waves! Significance: This experiment shows that the act of measurement alters the outcome, highlighting how the observer affects the system
2. **Quantum Eraser Experiment Overview:** This experiment builds on the double-slit setup. After particles have gone through the slits, information about which path they took can be "erased." ! When the path information is erased, an interference pattern re-emerges!!!, suggesting that the past behavior of particles can be influenced by later measurements!!! Significance: It illustrates that an observer's knowledge—or lack thereof—about a system can fundamentally change the way that system behaves! very strange and astonishing
3. **Stern-Gerlach Experiment Overview:** This experiment involves sending particles (like silver atoms) through a non-uniform magnetic field, which splits them into different paths based on their spin states (up or down). Observing the spin state collapses the wave function into a definite state. Significance: The act of measuring the spin changes the state of the particles, demonstrating the observer effect in action!!
4. **Bell's Theorem Experiments Overview:** These experiments test the predictions of quantum mechanics against local realism by measuring entangled particles. The results show correlations that cannot be explained by classical physics or local hidden variables. Significance: While not strictly about the observer effect in the traditional sense, the outcomes challenge our understanding of measurement and observation at a quantum level, suggesting that the act of measuring one particle instantaneously affects the state

of the other other, regardless of distance in between!! very strange!! قرين

5. **Delayed Choice Experiment Overview:** This series of experiments, including variations of the double-slit experiment, show that decisions made about how to measure a particle's path can retroactively influence its past behavior! For example, if a measurement is made after the particle has passed through the slits, it can still affect whether an interference pattern is observed. Significance: This highlights the non-intuitive nature of time and observation in quantum physics, suggesting that observation can influence events even after they have occurred!!

Conclusion: These experiments demonstrate that at the quantum level, the act of observation is not just a passive process but actively influences the behavior of particles! even in a retrograde fashion! These experiments can be by us, or for us!! Generally, these verify a limited type of knowledge is for us, we are not allowed to have it all, which is directly stated in verse (2:255) Actually this can prove that there is an extreme intelligence present in our universe, with precise simultaneous actions to what we do and observing our actions!! بالحق This meaning is actually in this verse denoting that everything in the universe is praising GOD in a way that we don't know يسبحون

تُسَبِّحُ لَهُ السَّمَوَاتُ السَّبْعُ وَالْأَرْضُ وَمَنْ فِيهِنَّ وَإِنْ مِنْ شَيْءٍ إِلَّا يُسَبِّحُ بِحَمْدِهِ وَلَكِنْ لَا تَفْقَهُونَ تَسْبِيحَهُمْ إِنَّهُ كَانَ حَلِيمًا غَفُورًا ﴿٤٤﴾

Meaning: Praising Him are the seven heavens, and the earth, and everyone in them. There is not a thing that does not glorify Him with praise, but you do not understand their praises. He is indeed Forbearing and Forgiving.

Israa: 17-50.

After death, bones can undergo a process called mineralization, potentially resulting in fossilization, where the organic material is replaced by minerals over a long period. This process can make bones

very hard and similar to stone, particularly in environments conducive to fossil formation, like sedimentary deposits. Here's a brief overview of how that happens:

- **Decomposition:** Initially, the organic components of the bone start to decompose after death.
- **Mineral Infiltration:** Minerals in groundwater can infiltrate the remaining bone structure.
- **Replacement:** Over thousands to millions of years, the organic material can be slowly replaced by minerals, often silica, calcite, or iron, turning the bones into a stonelike material. So, while bones don't literally turn into stone immediately or directly after death, under the right geological conditions, they can eventually become fossilized and resemble stone.

Actually, this exact example is given in this verse stating for those who deny resurrection that before the day of judgement some of them, their skeletons, will be earlier transformed to stones or iron! And they say just in the verse “When we have become bones and fragments, shall we really be resurrected as a new creation?” Now we can actually see those fossilized bodies mainly after volcanoes. Something like that was unimaginable 14 centuries ago!

﴿قُلْ كُونُوا حِجَارَةً أَوْ حَدِيدًا﴾ ٥٠

Meaning: Say, “Even if you become rocks or iron”

Israa: 17-107

Since the time of our master Adam, GOD has sent many messengers and prophets to revive religion from interference by Satan and man. Throughout known history, there has always been some intervention to change the fundamentals of religion. Beginning with the ancient Egyptians, who had "Dio" meaning five and "N" meaning religious ritual (a five-part religious ritual), "Waa Waa Nns Nu" in the Pyramid Texts means "One & Only with no second" (Waa = one, Nu = two), "Bar Dawa" = ablution الوضوء. There are murals depicting King Mina behind him, a servant with a vessel and a "slipper", a hieroglyphic word

for what is worn on the foot! Meaning that he is preparing for ablution! Unlike the murals that depict prostration on the chins. Fasting, as mentioned in Surat Yusuf, was known to the ancient Egyptians: "Fasting is prescribed for you as it was prescribed for those before you." The pilgrimage to the Kaaba, "Kaaba" or "Bakkah," in hieroglyphs, "Hajj" means light, and "Az" means "heading toward," which became "heading toward the light." Migration there occurred during the Sixth Dynasty (a period of decline) and the Fourteenth Dynasty (the Hyksos Wars). Many of the wise men of Egypt الصائبه migrated to the Hijaz, and they are the Mandaeans, or to Mesopotamia - the Tigris and Euphrates - and they are the Mandaeans. Indeed, they were described in the Quran with the believers: "Indeed, those who have believed and those who were Jews or Christians or Sabeans - those who believed in Allah and the Last Day and did righteousness - will have their reward with their Lord. No fear will there be concerning them, nor will they grieve. "Maw" means zakat, and from it we understand "ma'un" الماعون (since the letter "nun" is a religious ritual). It's strange that the ancient Egyptians were known to have a pagan faith! and were called "Pharaohs" (personal names)!! It's more likely that the devils among mankind and satan intervened to bring about change whenever possible. As noted in verse (12-100) prostration with the face up means believing what this Prophet or king is saying, not worship, that's why also in the verse its clear that there were messengers of GOD, to whom is the prostration.

During the transfer of civilization from Egypt to Greece, for example, GOD instead of being one with many names became multiple!

قُلْ ءَامِنُوا بِهِ ءَوْ لَا تُؤْمِنُوْاۤ اِنَّ الَّذِيْنَ اُوْتُوا الْعِلْمَ مِنْ قَبْلِهٖۤ اِذَا يُتْلٰى عَلَيْهِمْ يَخِرُّوْنَ لِلْاَذْقَانِ
سُجَّدًا ﴿١٠٧﴾

Meaning: Say, "Believe in it, or do not believe." Those who were given knowledge before it, when it is recited to them, they fall to their chins, prostrating

Al-Kahf: 18-25

The polytheists of Mecca, after consulting with the people of the Book, tested Muhammad by asking him three questions, and Surah Al-Kahf was sent down in answer to them. They inquired about the: 1- Identity of the Sleepers of the Cave? 2- The real story of Khidr? 3- Dhu al-Qarnayn? King or traveler or ...

In this book chapter a spot for each will be highlighted. For the story of the cave sleepers there is stunning mark about the era they went into the cave and the time they woke up, politically and chronologically As the story starts during the persecutions by the Roman emperor Decius, around AD 250, seven young men were accused of following Christianity. They were given some time to recant their faith, but they refused to bow to Roman idols. Instead, they chose to give their worldly goods to the poor and retire to a mountain cave to pray, where they fell asleep.

The emperor, seeing that their attitude towards paganism had not improved, ordered the mouth of the cave to be sealed. Decius died in 251, and many years passed during which Christianity went from being persecuted to being the state religion of the Roman Empire. At some later time—usually given as during the reign of Theodosius II (408–450)—in AD 447 when heated discussions were taking place between various schools of Christianity about the resurrection of the body in the day of judgement and life after death, a landowner decided to open up the sealed mouth of the cave, thinking to use it as a cattle pen. He opened it and found the sleepers inside. They awoke, imagining that they had slept but one day, and sent one of them to Ephesus to buy food, with instructions to be careful Upon arriving to the city, this person was astounded to find buildings with crosses attached; the townspeople for their part were astounded to find a man trying to spend old coins from the reign of Decius. The bishop was summoned to interview the sleepers. What is evident in this verse is that they woke

up in a different era where they found their faith accepted, after around 300 years that were increased by 9!!!! How was this calculation known since 14 centuries! This can also, tell that there will be a shift from the solar to the Lunar calendar. As the Solar year was the formal year in the Roman empire. There are 11 days gap between the Solar & Lunar years, if we multiply this by 300 = 3300 days, then if we divide this by 354 days (the lunar year) = 9 years!! This matches exactly the current counting in both calendars!! This is astonishing also in a political way as by the time of revelation of Qur'an, this will be the way you (Muslims) will dominate and have your own (Lunar) calendar, and there will be a big shift compared to the era of the seven sleepers.

وَلَبِثُوا فِي كَهْفِهِمْ ثَلَاثَ مِائَةٍ سِنِينَ وَازْدَادُوا تِسْعًا ﴿٢٥﴾

Meaning: And they stayed in their cave for three hundred years, adding nine

Al-kahf: 18-86

Does the extreme temperature difference mentioned in the noble verse (in Ham'a eyeor- extremely hot eye) means that the sun rays at this area, which is more hot than its surroundings, being extremely cold or snowy? Does the "hot spring" refer to an extreme temperature difference? "عين حمئة" One possible explanation is that this "hot spring" refers to an area with an extreme temperature difference, where the sun's rays are in a hotter environment than in the surrounding areas. But could it also mean that this region was extremely cold, like the South or North Pole? When looking at some of the optical phenomena that occur in the polar regions, such as the "solar corona" or the sun halo, which is the result of light refraction by ice crystals suspended in cold air. This halo sometimes takes the form of a bright circle that looks like a "flaming eye" in the sky. This may be similar to what the verse describes. Was this sunset at the South Pole? If Dhul-Qarnayn had reached the South or North Pole, the sunset conditions there were radically different from anywhere else in the world. In these regions This may be similar to what the verse describes. Was this sunset at the South Pole? If Dhul-Qarnayn had reached the South or

North Pole, the sunset conditions there were radically different from anywhere else in the world. Looking at this picture taken from a video clip by an amateur during his trip to Antarctica, we can notice that there is a spectrum around the sunlight (the temperature around it is 30 below zero at best) in the form of a circle, which in its final shape looks like an eye-hot eye! this picture from a video clip This verse tells about this phenomena while "zou al-qarnin" (most probable leader in history to be him is Alexander the great) was there. Was that sunset at the south pole?!

photo from a video of a traveller showing what's it like at the south pole where at winter the sun set appears (as in figure) surrounded by a darker halo. The sun never totally disappears in winter.

حَتَّىٰ إِذَا بَلَغَ مَغْرِبَ الشَّمْسِ وَجَدَهَا تَغْرُبُ فِي عَيْنٍ حَمِئَةٍ وَوَجَدَ عِنْدَهَا قَوْمًا قُلْنَا يَا الْقَارِئِينَ
إِمَّا أَنْ تُعَذِّبَ وَإِمَّا أَنْ تَتَّخِذَ فِيهِمْ حُسْنًا ﴿٨٦﴾

Meaning: Until, when he -Alexander the great- reached the setting of the sun, he found it setting in a murky spring (what looks like a hot eye), and found people in its vicinity. We said, “O Zul-Qarnain, you may either inflict a penalty, or else treat them kindly.

This verse, in the order of the verses in the surah, comes in the middle of the journey when Dhul-Qarnayn reached towards north pole and the sun was shining (land of midnight sun) and the south pole as described in the previous verse. Most historians and commentators agree that Dhul-Qarnayn is Alexander the Great.

Indeed, we find that Egypt is located approximately in the middle of the described distance. It is well known that Alexander the Great entered Egypt peacefully, without any battle with Egyptians. This verse tells us that he found monotheists were he treated them kindly, which is what he did during his stay in Egypt. It is even said that he founded the city of Alexandria in 332 BC with the hope that he would settle there later (which did not happen, as he died at the age of 33). Was this wish because he found monotheism!? This time in history is corrupted as we know it. Monotheism was prevailing more in Egypt mainly after Akhenaten إخناتون. Immediately after killing of Akhenaten, Tutankhamen & Nefertiti in addition to the escape of Merit Aton something drastic happened in history! that is still conceived or intentionally hidden.

The solid proof for this is that Egyptian king's names were more Greek! Egypt was divided governed by 2 capitals! A new religion came in focus: Hellenistic religion The concept of Hellenistic religion as the late form of Ancient Greek religion covers any of the various systems of beliefs and practices of the people who lived under the influence of ancient Greek culture during the Hellenistic period and the Roman Empire (c. 300 BCE to 300 CE). There was much continuity in Hellenistic religion: people continued to worship the Greek gods and to practice the same rites as in Classical Greece. Change came from the addition of new religions from other countries, including the Egyptian deities Isis and Serapis, and the Syrian gods Atargatis and Hadad, which provided a new outlet for people seeking fulfillment in both the present life and the afterlife. The worship of deified Hellenistic rulers also became a feature of this period, most notably in Egypt, where the Ptolemies adapted earlier Egyptian practices and

Greek hero-cults and established themselves as Pharaohs within the new syncretic Ptolemaic cult of Alexander III of Macedonia. Elsewhere, rulers might receive divine status without achieving the full status of a god and goddess. Many people practiced magic, and this too represented a continuation from earlier times. Throughout the Hellenistic world, people would consult oracles, and use charms and figurines to deter misfortune or to cast spells.

Was it the only religion that emerged at this period, or as we shall see: Christianity was there already in Egypt, but oppressed! Did the Greeks & the Romans rush to Egypt to save their Gods!! in the form of this Hellenistic religion? The question remains:

Did Alexander the great ذو القرنين found a pure monotheistic worship to which he was a messenger? or follower? that's why he went to consult the famous oracle of Amun-Ra at the Siwa Oasis in the Egypt west desert, at which he was pronounced the follower of the deity monotheism?!. During his stay in Egypt, he founded Alexandria, which would become the prosperous capital of the Ptolemaic Kingdom after his death. Control of Egypt passed to Ptolemy I (son of Lagos), the founder of the Ptolemaic Dynasty (305–30 BC) after the death of Alexander. As in the verse he will be very kind to the righteous.

Did Christianity emerge in Egypt before Alexander was there?!

وَأَمَّا مَنْ ءَامَنَ وَعَمِلَ صَالِحًا فَلَهُ جَزَاءُ الْحُسْنَىٰ وَسَنَقُولُ لَهُ مِنْ أَمْرِنَا يُسْرًا ٨٨

Meaning: But as for him who believes and acts righteously, he will have the finest reward, and We will speak to him of Our command with ease.

Al-Kahf: 18-90:

One of the amazing features of the Holy Quran is its suitability for all times and places, so that it is compatible with the scientific belief for every era. In Thu-Qarnayn's (mostly: Alexander the great) journey until he reached the sunrise, is it possible that he headed towards north

pole?! At the summer time, for example, above the Polar Circle, the sun remains present throughout the day, and indeed the curtain that exists between us and daylight is the night darkness, due to the Earth's rotation around itself, and given that there is A tilt with the Earth's axis.

In theory, the sun will still be shining at this time because the North Pole will be facing the sun. In Arabic, the presence of the sun rises **تطلع** and present all the time (different from dawn **تشرق**), and this could be an indication of its presence throughout the day, not just after dawn. In a very smooth way this noble verse indicate the tilt of the Earth's axis & rotation around this axis to be a barrier from sun in the rest of the globe during night time! GOD knows best

حَتَّىٰ إِذَا بَلَغَ مَطْلِعَ الشَّمْسِ وَجَدَهَا تَطْلُعُ عَلَىٰ قَوْمٍ لَّمْ نَجْعَلْ لَّهُمْ مِّنْ دُونِهَا سِتْرًا ﴿٩٠﴾

Meaning: Until, when he reached the rising of the sun, he found it rising on a people for whom We had provided no shelter from it.

Maryam: 19-12:

It is noteworthy that prophets of GOD are not mentioned the explicitly in the murals or even the papyri of ancient Egypt! in spite of the fact that ancient Egyptians were keen to record minute details! The most likely explanation is to conceal, deliberately omit, or distort any evidence of that, of course, to falsify history, (Israelites are famous for this work). Some well-known historians have pointed out that a large portion of ancient Egyptian history was falsified. For example, in his book, "The History of al-Tabari, Part Two," al- Tabari states that the Jews falsified 1,000 years (we have proven more than that) just before the birth of Jesus Christ! Most likely to conceal their crimes. On the other hand, at the rign of ancient Egyptian history, Tutankhamun was one of the kings of the 18th Dynasty, from 1347 BC to 1339 BC.

Tutankhamun was nine years old when he became the king of ancient Egypt. His name in the ancient Egyptian language is "the greatest representative of the ancient Egyptian GOD" (as the popular Israeli traditions claim). "The living image of the GOD Amun" in ancient Egyptian means... Tutankhamun lived during a transitional period in the history of ancient Egypt, as he came after Akhenaten, who tried to spread monotheism in ancient Egypt. Tutankhamun is considered one of the most famous pharaohs for reasons not related to his achievements or the wars he won, the most prominent reason, is the discovery of his tomb and its treasures in full, without any damage. The mystery surrounding circumstances of his death, as many considered the death of the Pharaoh at such a young age to be un-natural, especially given the evidence of fractures in his femur and skull, and the marriage of his minister to his widow after his death and his appointment as king. All these mysteries & not to find any Papyrus to tell about frank robbery. His life, raises more doubt! For a tomb that was discovered for an ancient Egyptian king, as was said in full lacking all Papyrus papers, to tell about this king's life, this leads us to think of

a Another striking thing about his story is that his name contains the key to life (Ankh = Yahya = life). The ancient Egyptian kings had about five names. In this, we find a great similarity between Tutankhamun and our master (Prophet) Yahya, at least in some aspects: - This name was not given to anyone before lacking all Papyrus papers frank robbery. Both governed at a very young age Both were killed Both had a name symbolizing life The Holy Qur'an reminds us of the story of our master John (Yehia), which is closely related to the story of Zechariah, peace be upon them. He was an intelligent young boy. God strengthened his mind and gave him wisdom as a child, loving worship. It is clear that the whole family were monotheistic Muslims But the major question is: Was Zechariah- Smenkh-kare the father of & the king before Tutankhamun?

يٰٓيَحْيٰى خُذِ الْكِتٰبَ بِقُوَّةٍ وَّءَاتَيْنٰهُ الْحَكْمَ صَبِيًّا ١٢١

Meaning: “O John, hold on to the Scripture firmly,” and We gave him wisdom in his youth

The strangest artifact hidden in Tutankhaten's shroud, which he treasured, is a magnificent golden dagger with an iron blade (this iron was meteoric and crafted with great skill), although the ancient Egyptians did not find any evidence of the use of iron until five hundred years later, and it was not meteoric!! Is this dagger inherited from his grandfather Thutmose I (or our master David, known to have this power & skill? Also, the throne had lion heads as a symbol of protection, though there are no lions in Egypt. Is this a hint that the kingdom spread to central Africa?! Beneath the hands of throne are the wings as that in the Arc of the Covenant?! It is noteworthy that something momentous happened in ancient Egyptian history during this period, and it is even more evident that what happened was distorted or falsified. After the Eighteenth and Nineteenth Dynasties, we find that the titles or names of the ancient Egyptians familiar to us have disappeared, and even the keys to knowledge from murals or papyri have become very few.

History supports this theory as From the twenty-first dynasty, Egypt was ruled from two separate capitals!! Tanis in the north & Thebes in south! After that, the star of the ancient Egyptian Empire began to decline. Even the names of the kings were written as if they were foreign, with no mention of any invasion!!! It is worth noting that in the list of Manetho of Samnoud (the ancient Egyptian historian), he mentioned seven kings of this dynasty, despite the fact that only five of them have been traced back to the few traces, and their names were...

- Smendes (1089-1036 BC)
- Psusennes I (1059-981 BC)
- Amenemoebi (1033-978 BC)
- Serkhor (984-959 BC)
- Si-Amun (978-945 BC)
- Psusennes II (959-945 BC)

Interestingly, if we comprehend Tut-Ankh-Amon to be Prophet Yehia, then Jesus was born in nearly the same period. Was Merit-Aton = Maryam? Then after that, the Libyans invaded from the west and formed the 22nd dynasty, including Shoshenq (Shoshenq), then other dynasties followed until the 31st dynasty, the Ptolemies, then the Roman invasion.

Continuing from what was presented in the previous verse, this verse draws attention to what her (Maryam) people said to her after she gave birth to Jesus: " Sister of Aaron" As is evident from the verses of the Holy Quran, our master Aaron was a half-brother of our master Moses (Surah Al-A'raf, verse 150), which indicates that they were not from the same father. Furthermore, the Children of Israel considered him an enemy, as our master Aaron asked our master Moses not to let the Children of Israel gloat over him.

Therefore, we can conclude that the Israelites were patient with Moses (as they suffered before and after his arrival) because he was one of them. However, it is clear that Aaron was Egyptian (Egyptian father) and not from the Israelites. In this context, we can conclude that the people of Mary were not Israelites, but rather Egyptians. Moreover, the escape and disappearance of Meritaten—Tutankhamun's sister—at a young age was due to her knowledge that the priests of Amun, or the Jews, harbored nothing but hatred and animosity toward this monotheistic family {The murder of our master Yahya (Tutankhaten) - the concealment and defacement of all the murals and temples of Akhenaten and Nefertiti} However, there is a mummy of a woman in the Valley of Kings tombs with a deformed skull (a sign of her murder), and it is possible that it is also Nefertiti.

Furthermore, there are remains of broken and used stones in the internal structure of the Luxor temple, so that the excavations on them are not obvious with strong possibility that it belong to the Temple of Akhenaten. On the other hand, the Gospel in the Church of Abuna-Yamata (as we will mention later) states that the Holy Family's journey was between Asyut and Abyssinia. This could be more logic, as the further they head towards north and the Sinai desert, the easier it will be to track and kill them, especially since it will be an arduous journey. To have better chances in their journey, they will head south towards greenery (providing continuous sources of food and water and making it easier to conceal their tracks).

Surprisingly in one of the walls in the delivery room at Luxor temple there is description of a story like that of Maryam & the Christ! It is worth noting that one of the names of Virgin Mary, even till today, in some Egyptian churches is: Merit! Can this mean: Jesus (Isa) was born in Egypt then moved to Abyssinia, then at a later age travelled to Jerusalem?!

يَلَأَحْتْ هَلُرُونَ مَا كَانَ أَبُوكَ أَمَرًا سَوَاءً وَمَا كَانَتْ أُمُّكَ بَغِيًّا ٢٨

Meaning: “O sister of Aaron, your father was not an evil man, and your mother was not a whore”

Similarity between an Egyptian ancient temple carving & that for Jesus

The character of Jesus Christ in most of the Gospels is consistent in the fundamental traits of a kind, loving, and sermon-filled personality. Meanwhile, there is a period of uncertainty in the life of Jesus Christ, a period of more than ten years after the age of thirteen! Only in the Gospel of Luke do we find a brief account of the childhood of Jesus Christ, a period generally shrouded in mystery, except in the (Tawehedo bible) Ethiopian Gospel. Written in Ge'ez, it contains 88 books, unlike the King James Bible, which contains only 66 books, and from which several books were removed at the Council of Nicaea in 325 AD. It is noteworthy that the Ethiopic Gospel is considered

complete from the first century AD, written in the language of the Ge'ez people who lived during that period and recorded its events in this gospel. This contrasts with other gospels, which were written several decades after the ascension of Jesus Christ, and even in a different language (Aramaic) than the one spoken by Jesus Christ, and were written in Latin! The Book of Enoch and the Infancy Gospel retain these sections, unlike the other Gospels, including his early training in carpentry. Was Ethiopia's distance from the Roman Empire preserve this Gospel from alteration or deletion?, Answer: **Yes!**

It is clear that the rest of the Roman Empire's provinces adopted Christianity as the state religion, with the exception of Ethiopia, where Christianity had existed since its inception in an uncorrupted form. Ethiopia was never colonized but was only part of the ancient Egyptian empire (1400-1100 B.C), lots of evidences say that Christianity emerged within that period & location.

This part of the world could have been the first Christian nation, no foreign power imposed its version of Christianity, that's why we find more complete un-edited Bible. Furthermore, spiritual traditions their say that Menelik the first believed to be the son of Solomon & the queen of Shiba, even bringing the arc of the covenant that's why they had to preserve everything so they worked independently from the far away Roman Empire specifically escaping the council of Nicaea 325 A.D. Complete books as that of Enoch & Jubilee is found there saved in Gaeze language. It is written in the book of the covenant within the 40 days period between Isa resurrection & his ascension known as the heavenly scrolls, even what is said there (supposed to be by Isa himself) is not comfortable, over time people will twist his words, future corruption of the world, he even predicts wars to take place under his banner!! Advised to build the kingdom of God inside the human soul not in temples. Didascalia apostolorum (warning against false leaders!) gives even more instructions as to pray constantly, fast regularly, stay away from corrupt leaders!

In the 6th century AD, the monk, traveler, and historian Cosmos was able to confirm that the primary religion of Axum in Ethiopia was

Christianity, even before the Roman Empire! He supported this claim with the existence of non-traditional churches, unlike anything else in Europe at that time.

The perplexing question: Did Jesus Christ spend a period of his life in Ethiopia? The logical answer: **Yes.**

The only point of agreement in the story of Jesus Christ between the Vatican and the Ethiopian Unitarian Gospel is about the presence of the Virgin Mary when Jesus Christ was in the manger in Upper Egypt and then their escape after that. From this point, we can begin, and it's easy to believe that this escape wasn't from the Roman state, but rather from the Jews and the priests of Amun. Therefore, it's more likely they fled south along the Nile River, where they had a source of food and water throughout the journey (unlike the Sinai Desert, where movement was more difficult and they could be easily tracked). To kill them (from this we can understand why Christianity was present early in Ethiopia before his return to Jerusalem at an older age, where the narratives of the other Gospels begin!). Another possible belief, given that history was deliberately distorted during this period, is that: Was Meritaten, the Virgin Mary? It is amazing why all the known historians of the first century AD, didn't write anything about Jesus Christ and didn't even mention that in their books!! Among these historians:

Philon d'Alexandrie (20 BC - 50 AD), Great philosopher, but didn't mention Jesus once though as a historian who wrote about various things for that time & presumably this was the exact time for this major event!! Philo of Alexandria (/ˈfaiˌlɒʊ/; Ancient Greek: Φίλων c. 20 BCE – c. 50 CE), also called Philō Judæus, was a Hellenistic Jewish philosopher who lived in Alexandria, in the Roman province of Egypt. The only event in Philo's life that can be decisively dated is his representation of the Alexandrian Jews in a delegation to the Roman emperor Caligula in 40 CE following civil strife between the Jewish and Greek communities of Alexandria. Philo was a leading writer of the Hellenistic Jewish community in Alexandria, Egypt. He wrote expansively in Koine Greek on philosophy, politics, and religion in his time; specifically, he explored the connections between Greek

Platonic philosophy and late Second Temple Judaism. For example, he maintained that the Greek-language Septuagint and the Jewish law still being developed by the rabbis of the period together serve as a blueprint for the pursuit of individual enlightenment.

Flavius Josephus (born Yosef ben Mattityahu; c. AD 37 - c. 100) was a Roman-Jewish historian and military leader. Best known for writing The Jewish War, he was born in Jerusalem—then part of the Roman province of Judea—to a father of priestly descent and a mother who claimed Hasmonean royal ancestry. He initially fought against the Roman Empire during the First Jewish-Roman war as general of the Jewish forces in Galilee, until surrendering in AD 67 to the Roman army led by Vespasian after the six-week siege of Yodfat. No mention of Jesus in his original work!!

Justus of Tiberias (or Juste de Tibériade) was a 1st-century Jewish historian and rival to Flavius Josephus, known primarily through criticism in Josephus's Autobiography. Fosios in Constantinople later said about him that he didn't mention any event in the life of Jesus!! What can be even more surprising, even the athiest historians of that time as Lucian in syria, Bilatis, & in particular: Suetonius (AD 69 - AD 122), a Roman historian who wrote during the early Imperial era of the Roman Empire. His most important surviving work is De vita Caesarum, commonly known in English as The Twelve Caesars, a set of biographies of 12 successive Roman rulers from Julius Caesar to Domitian. Other works by Suetonius concerned the daily life of Rome, politics, oratory, and the lives of famous writers, including poets, historians. Seneca (4 BC - AD 65), was a Stoic philosopher of Ancient Rome, a statesman, a dramatist, and in one work, a satirist, from the post-Augustan age of Latin literature. Tacitus (c. AD 56 - c. 120), was a Roman historian and politician. Tacitus was widely regarded as one of the greatest Roman historians by modern scholars.

All of these historians didn't write about Christianity, as it could have emerged much earlier then somehow blended to Hellenism. To add to the puzzle, that even ancient Greek philosophers as Plutarch (before AD 50 - after 120) was a Greek and later Roman Middle Platonist

philosopher, historian, biographer, essayist, and priest at the Temple of Apollo in Delphi. He is known primarily for his *Parallel Lives*, a series of biographies of illustrious Greeks and Romans, and *Moralia*, a collection of essays and speeches, but nothing about Jesus! Only GOD knows

Pliny the Elder was a Roman author, naturalist, scientist, naval and army commander of the early Roman Empire, procurator, and friend of the emperor Vespasian. Pliny wrote the encyclopedic *Naturalis Historia* (Natural History), a thirty-seven volume work covering a vast array of topics on human knowledge and the natural world, which became an editorial model for encyclopedias. He spent most of his spare time studying, writing, and investigating natural and geographic phenomena in the field, nevertheless not one word about Jesus!

Later, Christianity appeared in written history by historians .. but also surprisingly attacked! Porphyry (234 – c. AD 305) was a Phoenician. Neoplatonic philosopher born in Tyre, Roman Phoenicia, during Roman rule. He edited and published the *Enneads*, the only collection of the work of Plotinus, his teacher. He wrote original works in the Greek language on a wide variety of topics, ranging from music theory to Homer to vegetarianism. His *Isagoge* or *Introduction*, an introduction to logic and philosophy, was the standard textbook on logic throughout the Middle Ages in its Latin and Arabic translations. Porphyry was, and still is, also well known for his anti-Christian polemics. Through works such as *Philosophy from Oracles* and *Against the Christians* (which was banned by Constantine the Great), he was involved in a controversy with early Christians! Actually, some believe as the Roman empire was beginning to weak then emperor Constantine just changed the strategy instead of crushing faith he decided to control it in the council of Nicea by legalising & reshaping Christianity, erasing the gospels that didn't serve his political goal, ancient roman tempels were turned into Churhes, Pegan festivals had Holy names faith became the language of power!

But why did Rome abandon the extra books in the Tawahedo Bible?

First: is political control -> fewer books = fewer questions.

Second: mysticism, demonic wars, spiritual battles & power in invisible dimensions, this makes institutions having less power over people.

Third: Fear, If people can connect directly to GOD this means less control of the religious institutions & the state!

Maryam: 19-37:

Along history there are various intentions to obscure the historical real story. Among many reasons as those who achieve victory write history! So, simply what we know as history is not the whole truth. Taking Qur'an as a reference in this aspect, dramatic shifts can be obtained, likewise in religion. No other religion, that emerged and disappeared during a crucial point in history, is weird as the Hellenistic religion. In written history: by AI:

Hellenistic religion (c. 300 BCE–300 CE) was a diverse, syncretic blend of Greek polytheism with Eastern, Egyptian, and Mesopotamian traditions following Alexander the Great's conquests. It was characterized by the rise of personal, emotional devotion, mystery cults, the deification of rulers, and a shift toward universal, philosophical ideas (like Stoicism) over local city-state cults. Change came from the addition of new religions from other countries, including the Egyptian deities Isis and Serapis, and the Syrian gods Atargatis and Hadad, which provided a new outlet for people seeking fulfillment in both the present life and the afterlife. The worship of deified Hellenistic rulers also became a feature of this period (c. 300 BCE to 300 CE) most notably in Egypt, where the Ptolemies adapted earlier Egyptian practices and Greek hero-cults and established themselves as Pharaohs within the new syncretic Ptolemaic cult of Alexander III of Macedonia! Elsewhere, rulers might receive divine status without achieving the full status of a god and goddess. Many people practiced magic, and this too represented a continuation from earlier times. Throughout the Hellenistic world, people would consult oracles, and use charms and figurines to deter misfortune or to cast

spells. The complex system of Hellenistic astrology developed in this era, seeking to determine a person's character and future in the movements of the Sun, Moon, and planets. The systems of Hellenistic philosophy, such as Stoicism and Epicureanism, offered a secular alternative to traditional religion, even if their impact was largely limited to educated elites. Key aspects of Hellenistic religion include:

- Syncretism and New Cults: Greek gods merged with local deities (e.g., Zeus-Ammon, Serapis). Popular mystery cults offering personal salvation and afterlife hope grew, such as the cults of Isis, Mithras, and Cybele.
- Deification of Rulers: Hellenistic kings were deified, with ruler cults used to cement political loyalty.
- "Mystery" Religions: Unlike public civic religion, these were initiatory, secret rituals focusing on a personal connection with a savior deity.
- Philosophy as Spirituality: Philosophical schools like Epicureanism and Stoicism acted as spiritual paths, with some offering rationalistic, materialist, or monotheistic views of the divine.
- Continuity and Change: While old, traditional Olympian gods continued to be worshipped, religious focus shifted from merely ensuring the city's success to personal, emotional, or philosophical fulfillment.
- The Individual's Journey: There was a strong, dualistic focus on escaping the material world and returning to a divine, celestial home. This era was a major period of spiritual evolution that bridged classical antiquity and the rise of Christianity.

Britannica Britannica +3 With the emergence of Christianity near this time, and most likely before the known date, we find many Greeks and their great philosophers—Plato, for example— peacefully visiting Egypt before the establishment of the Ptolemaic state This gives a stronger impression of an intellectual and ideological shift.

Egyptian religion which follows Isis was the most famous of the new religions The religion was brought to Greece by Egyptian priests, initially for the small Egyptian communities in the port cities of the Greek world. Although the Egyptian religion found only a small audience among the Greeks themselves, her popularity spread under the Roman Empire, and Diodorus Siculus wrote that the religion was known throughout almost the whole inhabited world. Almost as famous was the cult of Serapis, an Egyptian deity despite the Greek

name, which was created in Egypt under the Ptolemaic dynasty. Serapis was patronized by the Greeks who had settled in Egypt. This religion involved initiation rites like the Eleusinian Mysteries. Strabo wrote of the Serapeion at Canopus near Alexandria as being patronized by the most reputable men

By logic:

1. During this afore mentioned period, Isis & Osiris were quite ancient in Egypt and was not a new religion of that period.
2. There were no Egyptian priests at that period unless Christianity had already been in Egypt centuries before the stated date.
3. After the 19th dynasty in Egypt, many of the kings names were foreigners to the known ancient Egyptian!
 - 1) Egypt was ruled by 2 capitals, denoting deep reform.
 - 2) The carving in Luxor temple showing how {{Jesus}} was created by GOD through his mother, with no father at a much earlier date, than the known calendar! (more than 1300 years).
 - 3) Search for any remains or scrolls for early Christianity in Palestine or Lebanon didn't find evidences to support at least early Christianity, however this was found in more than one place one of them is: is a collection of early Christian and Gnostic texts discovered near the Upper Egyptian town of Nag Hammadi in 1945 (Twelve leather-bound papyrus codices (and a tractate from a thirteenth) buried in a sealed jar were found by an Egyptian farmer named Muhammed al-Samman and others in late 1945. The writings in these codices comprise 52 mostly Gnostic treatises but also three works belonging to Corpus Hermeticum and a partial translation/alteration of Plato's Republic)
 - 4) Within this period in history there was no other emerging religion, unless: Christianity had emerged in Egypt at a date much earlier than what is mentioned in history.

The contents of the codices were written in the Coptic language. The best-known of these works is probably the Gospel of Thomas, of which the Nag Hammadi codices contain the only complete text. After the discovery, scholars recognized that fragments of these sayings attributed to Jesus appeared in manuscripts discovered at Oxyrhynchus in 1898 (P. Oxy. 1), and matching quotations were recognized in other early Christian sources. Most interpreters date the writing of the Gospel of Thomas to the second century, but based on much earlier sources. The buried manuscripts date from the 3rd and 4th centuries. The Nag Hammadi codices are now housed in the Coptic Museum in Cairo, Egypt

Codex II, one of the most prominent Gnostic writings found in the Nag Hammadi library. Shown here are the end of the Apocryphon of John and the beginning of the Gospel of Thomas which shows part of early life of Jesus.

In surah Maryam this verse describes this scenario as it hints to the various beliefs within this period, it also gives a clue why Julius Caesar conquered Egypt (48B.C) and destroyed all the evidences by burning the Bibliotheca Alexandrina and as usual writes history that suites! Meanwhile, during the same era in Greece there were emerging philosophical leaders to cope with these changes as Plato by AI:

Plato was significantly affected by Egyptian civilization, both through potential, though debated, direct travel and through deep admiration for Egyptian intellectual, political, and religious traditions (even the newly emerging!). Ancient sources and Plato's own dialogues describe Egypt as a premier source of wisdom, with many key elements of his philosophy—such as the theory of forms and political structures—showing strong ties to Egyptian thought

Evidence of Influence and Connection Study in Egypt: While some modern scholars debate the details, there is a strong ancient tradition (recorded by Strabo, Plutarch, and others) that Plato spent time in Egypt, with some accounts suggesting up to 13 years, studying with priests in Heliopolis

Admiration for Stability: In his work *Laws*, Plato expresses deep admiration for the rigidity and stability of Egyptian society, suggesting that their methods of art, music, and education—which remained unchanged for thousands of years—should be adopted to create a stable state.

The "Childish" Greeks: In *Timaeus*, Plato cites Egyptian priests telling Solon that "you Greeks are always children," implying that Egyptian civilization held a much deeper, older, and more mature understanding of history and wisdom.

Philosophical Foundations: Plato references Egypt in his dialogues to ground his ideas

He attributes the invention of numbers, arithmetic, and letters to the Egyptian deity Thoth.

Political Structure: Some interpretations of *The Republic* argue that Plato's ideal, hierarchical state, with a strict division of classes (especially the ruler-priest class), was inspired by the Egyptian social structure and the principle of Ma'at (divine order).

Potential Impact on Core Ideas:

Theory of Forms: Some scholars suggest that the Egyptian concept of a single, unchanging, divine reality

(often associated with the sun god or Amun) influenced Plato's own Theory of Forms, which posits an unchanging, higher reality behind the sensible world. Soul and Immortality: Plato's engagement with Egyptian religious beliefs, particularly those regarding the afterlife and the journey of the soul, likely influenced his own metaphysical views on the soul's immortality. Mathematical Importance: Similar to Pythagoras, who also studied in Egypt, Plato emphasized the importance of mathematics in education, a practice he explicitly attributed to the Egyptian educational system. To conclude: While Plato is a major figure in Greek & western philosophy, he was not operating in a vacuum. He frequently positioned Egypt as a "cradle of wisdom" and incorporated its perceived stability, theological concepts, and intellectual traditions into his own philosophical framework.

Featuring what happened in this era, we can also conclude there were emerging concepts or religion that led to changing beliefs to the limit that even in Egypt many Greeks came and were trying to merge with ancient Egyptian theology to the limit of body mummification after death (the only difference was a portrait of their face over the mummy) within the Ptolemaic dynasty.

Ptolemaic Empire was an ancient Greek polity based in Egypt during the Hellenistic period. It was founded in 305 BC by the Macedonian Greek general Ptolemy I Soter, a companion of Alexander the Great, and ruled by the Ptolemaic dynasty until the death of Cleopatra VII in 30 BC. Reigning for nearly three centuries, the Ptolemies were the longest and final dynasty of ancient Egypt, heralding a distinct era of religious and cultural syncretism between Greek and Egyptian theology & culture, This is matching to what we will say later mainly at Tutankhamen 18th dynasty era.

However, the final conclusion is that ancient Greeks tried to peacefully merge with this emerging religion (Christianity?!) as evident in the Ptolemaic dynasty in Egypt. Meanwhile, the Roman empire was at its peak which then refused Christianity at the beginning (leading to much blood shed, mainly at Alexandria-Egypt), then accepted later, only on their terms after Nicea 325 A.D. What happened then was

astonishing: The Hellenistic religion disappeared!! Is the influence of politics & power that magnificent upon history?! Correlation of this verse to its preceding verses tells in a very simple way about all this dilemma at this era!

فَاخْتَلَفَ الْأَحْزَابُ مِنْ بَيْنِهِمْ فَوَيْلٌ لِلَّذِينَ كَفَرُوا مِنْ مَّشْهَدِ يَوْمٍ عَظِيمٍ ﴿٣٧﴾

Meaning: But the various factions differed among themselves. So woe to those who disbelieve from the scene of a tremendous Day

Taha: 20-12:

Tuwa valley is the place where GOD Almighty spoke to Moses for the first time, and it is clear that this place has a special sanctity to GOD, as He commanded Moses to take off his sandals when he approached it. It is logic that this place will be sacred all over time. To preserve this, it would most likely be located in an untrodden area. But where could this valley be?

The evidence in the story of Moses, is that there was a light or fire guiding people to this place. Is this still the case today? The answer is: most probably: yes First, we must know what the Torah and the Bible say about this event. In the Torah, this mountain is described as radiant or flame-filled. The first description of this place in the Bible is Midian, after the word "yam" in the Bible, and this applies to a region in Nubia or northern Sudan today, on the edge of the desert (the Sahara Desert in Africa), and following that southward -Horeb- Firey Mountain, also known as the burning mountain, is located near the Ethiopian Rift (Dabbahu fissure) and close to a mountain called Mount Sina in the same area, which also contains a volcano called The Erta Ale.

The Old Testament refers to the glowing mountain! This is further evidence of the route Moses took to escape Pharaoh, as we will discuss later. Interestingly, this mountain is 613 meters high, while it was on this mountain that Moses received the Ten Commandments and 613 laws in the Torah.

Did the intense heat at the top of the towering mountain, as a form of divine protection, drive all of humanity away from this valley?! By logic it's still divine that even Moses there, was ordered to take off his slippers.

إِنِّي أَنَا رَبُّكَ فَاحْلَعْ نَعْلَيْكَ إِنَّكَ بِالْوَادِ الْمُقَدَّسِ طُوًى ﴿١٢﴾

Meaning: I—I am your Lord. Take off your shoes. You are in the sacred valley of Tuwa.

TaHa: 20-39

In this verse we can interpret that Moses as a baby was put in a box in a rapidly flowing river, so that this rapid flow of water will through his box towards Pharoah's palace, which really happened. We can go further in this verse to think that this high river tide is nearer to its origin (Upper Egypt – Sudan included). Considering that Pharoah told in another verse "these rivers flow beneath me" we can think that this place is nearer to Abyssinia (present day Sudan, actually ancient Egypt borders was till Abyssinia). This can further strengthen the idea that Moses and the Israelites escaped from Pharoah and his army to the south (Abyssinian highlands) In verse Araaf (136) it is stated that Pharoah and his army drowned in "Yam" this can be the same or similar to "Yam" that Moses were thrown into, so its a Nile Branch near Abyssinia not towards the red sea! Meanwhile, in this verse, the water flow will through the box of Moses to the shore, this means that there no waves (throwing Moses outside), so it is also more likely a branch of the river Nile.

أَنۢ أَفۡذِیۡهِ فِی النَّابُوتِ فَأَفۡذِیۡهِ فِی الۡیَمِّ فَلۡیَلۡقِیۡهِ الۡیَمُّ بِالسَّجَلِ یَاۡخُذُهُ عُدُوۡ لَیۡ وَعُدُوۡ لَهُۥ وَالۡقِیۡثُ
عَلَیۡكَ مَحَبَّةٌ مِّنۡیَّ وَلَتُصَنِّعَ عَلَی عَیۡنِیۡ ۝۳۹

Meaning: Put him in the chest; then cast him into the river. The river will wash him to shore, where an enemy of Mine and an enemy of his will pick him up. And I have bestowed upon you love from Me, so that you may be reared before My eye.

Ta-Ha: 20-51:

Anatomically modern humans appeared around 300,000 years ago in Africa, and 70,000 years ago gradually supplanted the "archaic" human varieties. Non-modern varieties of Homo are certain to have survived until after 30,000 years ago, and perhaps until as recently as 12,000 years ago. According to recent genetic studies. Modern humans are

referred to as sapiens and archaics are also designated with the prefix "Homo sapiens".

For example, the Neanderthals are *Homo sapiens neanderthalensis*, and *Homo heidelbergensis* is *Homo sapiens heidelbergensis*. Other taxonomists prefer not to consider archaics and modern humans as a single species but as several different species. To conclude there can be several forms of mankind along a vast history (all descendants of Adam that was created by GOD). Regarding ancient civilizations monuments, Adam descendants, as stated in Qur'an, were much stronger & had more impact (monuments) on earth than the present civilization, furthermore, these civilizations vanished suddenly leaving these monuments that indicate that they were very smart and had vast knowledge in every aspect.

This can give idea that there is no mankind evolution as stated by Darwin! Actually, this was mentioned several times in the Qur'an. Due to their vanity at the end times of their civilization GOD punished them by leading them to their distinction, verses (30:9- 35:44- 40:21- 41:15- 43:8- 50:26). Strangely enough GOD ordered us on these verses to search on earth for the ruins of these civilizations and to know how GOD destroyed them, as they disobeyed GOD at the end of their times! Hopefully, we are not starting to do the same!

In an argument that was between Moses and Pharaoh, several thousands years ago, the Qur'an documented this question from Pharaoh to Moses:

"what about ancient civilizations?"

This means that there were monuments in Egypt that preceded the Pharaohs time and not identified by the hieroglyphic writing also, Pharaoh being non-Egyptian wondered about it. The Giza pyramid can match this criteria as it has no hieroglyphic description or even any writing, the same thing applies to many pre-historic monuments found within this vicinity (described in the video link 3)! Even, how it was built or, its main function is not clear till now. Recently, there is a deeper underground structures beneath it discovered by Radar

doppler tomography, SAR (Synthetic Aperture Radar), that in a non-invasive way can discover deeper structures, so were they power planets!! Some of these things are still enigma (till now!) One of the strange things is the roof of Dendera Temple, which Napoleon brought specifically to France, even though it was covered in sand. How did he know what was it? Though apparently a sky zodiac was carved. Strangely the French Renaissance happened immediately afterwards, especially in the field of electricity (electric lamp drawing was on that temple with surrounding coil! as shown in video)! Historians as El-Tabari (8th century AD) in one of his famous books stating about history of the ancient kings تاريخ الطبري: تاريخ الرسل و الملوك upon discussing events before the known Jesus Christ birth stated that: For the known history in Jewish narration based on Torah that time, since Adam till the Hijra of Muhamad (beginning of the Islamic calendar) is only 4642 years!!

However, at that time Greek scholars argued in that, denoting this time interval was 5992 years. They claimed that the Jews omitted the number of years between their history and the history of the Christians in order to reject the prophethood of Jesus, son of Mary (peace be upon him), since his description and the time of his mission were established in the Torah.

They said: The time mentioned in the Torah for the one whose description resembles that of Jesus has not yet come, and they are awaiting—as they claim—his appearance and its appointed time. They believed that the one they are awaiting, and whose description they claim is confirmed in the Torah, is the Antichrist (Muhammad stated that most of the Anti-Christ followers are Jews). As for the Persians (Magi), they claim that the length of time from the reign of King Gaiomart until the time of Hijra is only 3139 years! From the above, it becomes clear, especially according to Jewish calculations, that the period from the birth of Christ to the Prophet's migration was approximately six hundred and fifty years. Subtracting this from what they said in al-Tabari's history leaves four thousand years since the

creation of Adam, this totally contradicts the known history we know, even from fossils!

قَالَ فَمَا بَالُ الْقُرُونِ الْأُولَىٰ ﴿٥١﴾

Meaning: {Pharaoh} said: "Then what is the case of the former generations

What made Pharaoh wonder? :

The great pyramid: contains 6.5 million tons of stones (2.3 million stone), aligned with astronomical percision, if workers placed 1 block every 2 minutes it will take more than 40 years to construct! Its sides point perfectly to the true north (accurecy achieved recently only by satellites) Stands for nearly more than 4000 years (or much more), daring every civilization afterwards to explain this magnificent structure, the oldest of worlds wonders debate about its age (several thousands years) and function (some say its energy source), no Mummy, no hieroglyphic descriptions, even in the king's chamber contained an open granite sarcophagus in this room of nearly 70% quartz crystal which gives very powerful resonance which if mediated by the pyramid granite structure it becomes much more! The speed of sound through ambient air is 343 meters/second while in granite it jumps to 6000 meters/second!! what actually happens when resonance of the structure is high or when sound or other waves are transmitted through this granite structure, can it be an energy source or can it describe what is mentioned in the Qur'an as the supposed immortality factories! mentioned in verse 26:129, only GOD knows. Geometry & mathematics of the main 3 Giza Pyramids is Amazing including: Its proportions encode: Pi, Fi, the speed of light in meters/second Golden ratio & the famous 3,4,5 triangle (in square ratios- pythagorus)!! Amazing mathematic & astronomical knowledge that says that there was an earlier great civilization! his book ' Dunn argues that the pyramids were designed to harness and amplify energy, possibly through the use of advanced acoustic and electromagnetic technologies. (by AI,Jan 1, 2026) The interpretation of ancient structures as advanced energy systems contrasts sharply with

mainstream archaeological views, which often regard them as monumental tombs rather than technological marvels! Dunn concluded in this book that:

“The Giza Power Plant: Technologies of Ancient” Egypt,'

1. The Earth is a dynamic, energetic body that has supported civilization's demand for fuel for centuries.
2. The Great Pyramid was a geomechanical power plant that responded sympathetically with the Earth's vibrations and converted that energy into electricity.
3. If we were to discover that a structure with a certain shape, such as a pyramid, was able to effectively act as a resonator for the vibrations coming from within the Earth, then we would have a reliable and inexpensive source of energy.
4. 4. When we question why there is a correlation between the Earth's dimensions and the Great Pyramid, we come up with three logical alternatives.
5. The granite out of which the King's Chamber is constructed is an igneous rock containing silicon-quartz crystals.
6. The specific design and utility of the Grand Gallery was to transfer the energy flowing through a large area of the pyramid into the resonant King's Chamber.
7. In the Giza power plant, the Northern Shaft served as a waveguide through which the input microwave signal traveled
8. With the granite beams vibrating at their resonant frequency, the sound energy would be converted through the piezoelectric effect of the silicon-quartz crystals embedded in the granite, creating high-frequency radio waves. The King's Chamber is a technical wonder (raised 70 tons block granite!).

Dendera temple: is another puzzle. Weather on the wall an electric lamp was presented or on its ceiling (its copy) a zodiac map? or just the milky way representation? or is it all about vibration waves representing life in time & space pattern? still enigma!

Al-Anbiya': 21-30:

This noble verse begins by telling us that non-Muslims will be the ones who will discover the origin of the universe, including, for example, the Big Bang theory. The Big Bang Theory, which describes the origin of the universe as a massive expansion from an extremely hot and dense state, emerged in the early 20th century through the work of several key figures in cosmology and physics. Early 20th Century Physics: The groundwork for the Big Bang Theory was laid by Albert Einstein's General Theory of Relativity in 1915, which described how gravity affects the fabric of space and time. Expansion of the Universe: In the 1920s, Edwin Hubble observed that distant galaxies were moving away from us, leading to the conclusion that the universe is expanding. This observation was significant because it suggested that the universe was once a compact dense smaller state.

Georges Lemaître's Contribution: In 1927, Belgian priest and scientist Georges Lemaître proposed what is often considered the first version of the Big Bang Theory. He suggested that the universe began from a "primeval atom" and expanded over time.

Cosmic Microwave Background Radiation: The theory gained substantial support in the 1960s when Arno Penzias and Robert Wilson discovered cosmic microwave background radiation (CMB), which is the afterglow of the Big Bang. This uniform radiation permeates the universe and is a critical piece of evidence for the Big Bang Theory. Further Developments: Over the years, more observations, such as the abundance of light elements (like hydrogen and helium) predicted by the Big Bang nucleosynthesis, further confirmed the theory. The Big Bang Theory has since become the dominant scientific explanation for the origin and evolution of the universe, supported by extensive observational evidence from a variety of fields including astronomy and particle physics.

According to Einstein's theory, energy and mass are different forms of the same thing, and he established an equation for that ($E=mc^2$). From this same logic, it can be said that as in verse "vigorously separated", is equivalent to placing divine energy in them, which resulted in all the mass of the universe and the continuity of its expansion (on going divine energy), so it didn't ever exist, this is mentioned in Qur'an, verse (51:47) denoting the universe is still expanding by GOD will & power. This gives idea that the Big bang is still going on guarded by GOD.

First of all now we can tell there is a cause for this Big Bang, but: who did that?

whoever did that and guard it till the way it is now, must be: Eternal (before it started), Immaterial spirit, very powerful, smart, caring and scientifically only one guide as any fault during the procedure we among all creatures would not have existed, its only GOD.

Meanwhile, if we consider as in quantum physics (distant particles behave the same in spite of the distance in between!) simply tells us that these particles were once connected in a way near to each other, so one of them has the same response like the other. If we think to track this in a backward direction, this can lead us to the Big Bang or, immediately afterwards, where these particles were closer together, by time got separated even light years apart, but still linked by their creator, which still explains another verse, that GOD is the light of heavens & earth الله نور السموات و الأرض

أَوَلَمْ يَرَ الَّذِينَ كَفَرُوا أَنَّ السَّمَوَاتِ وَالْأَرْضَ كَانَتَا رَتْقًا فَفَتَقْنَاهُمَا^ط وَجَعَلْنَا مِنَ الْمَاءِ كُلَّ شَيْءٍ حَيٍّ أَفَلَا يُؤْمِنُونَ ﴿٣٠﴾

Meaning: Do the disbelievers not see that the heavens and the earth were one mass, and We tore them apart? And We made from water every living thing. Will they not believe?

Al-Anbyiaa: 21-33

This verse has an astonishing combination of both language & astronomy!! For centuries scientists believed that there is mostly

vacuum in space, recently and by calculations the space now is known to be mainly of dark matter.

To be able to swim, this needs a media to swim in. In this verse the term swim describes the motion of planets as swimming! The actual description of this verse associates the night & day to be bound to the sun & moon orbital rotation! So, we can recently understand the planets rotation in orbits swimming in the dark matter giving the night and day pattern. This of course was not known since 14 centuries. What is even more surprising that in Arabic language there is a specific palindrome for the words " كل في فلك " that it can be written forwards and backwards giving the same meaning, even orbits can be drawn between the same letter!! In a near manner, another form of non-language palindrome where the night is associated to the moon and the day is associated to the sun!

وَهُوَ الَّذِي خَلَقَ اللَّيْلَ وَالنَّهَارَ وَالشَّمْسَ وَالْقَمَرَ كُلٌّ فِي فَلَكٍ يَسْبَحُونَ ﴿٣٣﴾

Meaning: It is He who created the night and the day, and the sun and the moon; each floating in an orbit.

Al-Anbyia': 21-105

The Psalms remain an enigma among holy books. Linguistically, it is a written text, devoid of any legal rulings, but rather a book of hymns containing 150 prayers. It was revealed to our master David and is the Book of Psalms in the Old Testament. What is amazing are the sites where it was found, A copy of which was found in a coffin in the village of Al-Madl in Beni Suef (Egypt) In 1970, in the Al-Jawf region of Yemen, a book written in this script was found on two palm fronds. Within ten years, many similar manuscripts were discovered, which were described as being written in this Musnad script (one of the ways of writing in Yemen).

Although more than 7,000 manuscripts have been discovered, only about 300 have been translated! Therefore, there is a deliberate! disregard for what these manuscripts contain, which solves many problems for understanding this era. As we will mention later, the

kingdom of David and Solomon was most likely in Egypt, Abyssinia, Yemen and West Asia (the Levant).

This contradicts who say that it was only in Palestine. It is worth noting that whenever Jews have recently settled in any area, they have consistently dug and excavated to find any claims that can support this claim! As happened in Sinai during the occupation and as is currently happening under the Al- Aqsa Mosque. Their failure to find any archaeological evidence reveals more about the truth.

وَلَقَدْ كَتَبْنَا فِي الزَّبُورِ مِنْ بَعْدِ الذِّكْرِ أَنَّ الْأَرْضَ يَرِثُهَا عِبَادِيَ الصَّالِحُونَ ﴿١٠٥﴾

Meaning: We have written in the Psalms, after the Reminder, that the earth will be inherited by My righteous servants

Al-Hag: 22-31:

For a long time wind was known only to move in a transverse direction, only recently vertical wind direction was noted. Vertical wind refers to the upward or downward movement of air in the atmosphere, often driven by thermal heating or topography, or the change in wind speed/direction with altitude (vertical wind shear). While horizontal winds dominate, vertical movements (updrafts/downdrafts) are critical for cloud formation and weather systems. It also refers to Vertical-Axis Wind Turbines (VAWTs), which feature a rotor shaft transverse to the wind, suitable for variable winds and urban environments. This phenomena was described in the Qur'an more than 14 centuries ago!

حُنَفَاءَ لِلَّهِ غَيْرَ مُشْرِكِينَ بِهِ ۚ وَمَنْ يُشْرِكْ بِاللَّهِ فَكَأَنَّمَا حَرَّمَ مِنَ السَّمَاءِ فَتَحَطَفَهُ الطَّيْرُ أَوْ تَهْوَىٰ
بِهِ الرِّيحُ فِي مَكَانٍ سَحِيقٍ ﴿٣١﴾

Meaning: Being true to God, without associating anything with Him. Whoever associates anything with God—it is as though he has fallen from the sky, and is snatched by the birds, or is swept away by the wind to a distant abyss.

Al-Mu'minun: 23-14:

Fetal development occurs in several key stages, generally divided into three main trimesters during a typical pregnancy. Here's a brief overview of each stage:

1. **First Trimester** (Weeks 1-12) Weeks 1-4: Fertilization and implantation occur. The zygote develops into a blastocyst and attaches to the uterine wall. Weeks 5-8: Major organs and structures begin to form. The heart starts to beat, and the embryo develops a rudimentary circulatory system. Limb buds appear. Weeks 9-12: The embryo is now called a fetus. All major organs are in place, and facial features begin to develop. The fetus can move, although these movements are not felt yet.
2. **Second Trimester** (Weeks 13-26) Weeks 13-16: The fetus grows rapidly. Fine hair (lanugo) covers the body, and the sex may be visible via ultrasound. Weeks 17-20: The mother may start to feel fetal movements (quickening). The fetus develops more complex features like fingerprints. Weeks 21-24: The fetus begins to develop more fat and has a better chance of survival if born prematurely. Hearing develops, and the lungs are forming. Weeks 25-26: The fetus becomes more active, and its skin becomes less transparent. The role of the lungs and gut matures.
3. **Third Trimester** (Weeks 27-40) Weeks 27-30: The brain undergoes significant development, and the fetus accumulates more body fat. The eyes can open and close. Weeks 31-34: The fetus is gaining weight rapidly and developing a more rounded shape. The fetus can respond to external stimuli. Weeks 35-40: The fetus gets ready for birth.

Organs continue to mature, and the baby positions itself for delivery. At around 37 weeks, the fetus is considered full-term. Summary Fetal development is a complex process that involves growth and maturation

across three trimesters, each marked by significant milestones in the formation and function of the body. Describing the fetal development from the time it was a sperm is an accurate scientific miracle, even division of pregnancy into three stages in complete darkness, was mentioned in Qur'an (39-6) even further describing!

Strange enough doctors working in the field of artificial insemination say that the whole process has to be in complete darkness!! and of course all of this was not known 14 centuries ago. The beginning of the creation: from Sperm, even translated as a small clot or something suspended or a leech, which actually resembles a fetus in the fifth week of pregnancy (as in figure, even after X-rays are taken, there is marked resemblance in this stage and that of a leech!!) these are observations that cannot be seen with the naked eye and require a microscope for that!! Then the bones appear and the embryonic formation is completed.

ثُمَّ خَلَقْنَا النُّطْفَةَ عَلَقَةً فَخَلَقْنَا الْعَلَقَةَ مُضْغَةً فَخَلَقْنَا الْمُضْغَةَ عِظْمًا فَكَسَوْنَا الْعِظْمَ لَحْمًا ثُمَّ أَنْشَأْنَاهُ خَلْقًا آخَرَ فَبَارَكَ اللَّهُ أَحْسَنُ الْخَالِقِينَ ﴿٤﴾

Meaning: Then We developed the seed into a clot. Then We developed the clot into a lump. Then We developed the lump into bones. Then We clothed the bones with flesh. Then We produced it into another creature. Most Blessed is GOD, the Best of Creators.

The shea tree is a native African tree that produces fruit. This fruit contains seeds that are used to extract a butter-like fat, valuable in cosmetics and skincare. The shea tree is also significant for its potential to improve nutrition and food security, particularly during the hungry season. For the tree various uses extend to food and medicine, demonstrating its versatility and importance in African cultures. One of its main characteristics that it is not actually planted but grows by itself just above the equator in Africa and lives for about 400 years! This tree is not known in the Egyptian Saina, hinting to the other region by the same names "Tor-Sainai" which is actually found in Abyssinia, this can further guide us in Surah Al-Tur If this was to mount Sainai in Egypt, it would be olive tree, giving oil not butter, actually there is misconception among Muslims in this aspect. How was this known 14 centuries ago!

وَشَجَرَةً تَخْرُجُ مِنْ طُورِ سَيْنَاءَ تَنْبُتُ بِالذَّهْنِ وَصَبْغٍ لِلَّائِكِينَ ﴿٢٠﴾

Meaning: And a tree springing out of Mount Sinai, producing oil, and seasoning for those who eat.

Al-nur: 24-35:

This verse explains that the Qur'an is a miracle for all eras because the interpretations and ideas included, will change according to the faith of people and at that time. To start, GOD clarifies that he is the light of the heavens and earth. Knowing light to be an energy source, then GOD is telling us that he is present every where giving energy in all forms, since the big bang. In this way the use of the solar energy for all forms of life on earth is apart of that, the same for dark matter & energy in space, to conclude the meaning of GOD is present everywhere giving us all the energy forms.

For example, the development of the candle and the lighting lamp that works with fuel, then the electric lamp in a bottle to isolate it, then the use of lasers. There is a clear indication of a similar characteristic between green tree leaves and olive oil, to the extent that the quality of olive oil is measured using laser light, in addition to that, global weather maps, all depend on light florescence that can be used in Chlorophyll fluorescence maps.

Satellites are used to show green areas on Earth through photosynthesis of chlorophyll. Light upon light - divine light is beyond the level of interpretation of any human, however, it can also refer to laser beam, two light beams having the same wavelength superimpose (light upon light or light coherence) to produce the laser beam.

It is really amazing to get all these meanings in just one verse that was written fourteen centuries ago!! Olive oil, primarily composed of triglycerides, boasts a high energy density. This inherent energy can be harnessed through various methods, including combustion and conversion into biodiesel. While direct combustion presents environmental concerns, the transesterification process offers a more sustainable alternative.

This process converts the oil into bio-diesel, a renewable fuel source that can power vehicles and generate electricity. The utilization of olive oil for energy production presents both opportunities and challenges. The abundance of olive oil production in certain regions could provide a readily available resource, reducing reliance on fossil fuels. However, the economic viability and environmental impact of large-scale olive oilbased energy production require careful consideration. Factors such as land use, water consumption, and waste management must be addressed to ensure a truly sustainable approach.

﴿اللَّهُ نُورُ السَّمَوَاتِ وَالْأَرْضِ مِثْلُ نُورِهِ ۚ كَمِشْكَاةٍ فِيهَا مِصْبَاحٌ الْمِصْبَاحُ فِي زُجَاجَةٍ الزُّجَاجَةُ كَأَنَّهَا كَوْكَبٌ دُرِّيٌّ يُوقَدُ مِنْ شَجَرَةٍ مُبَارَكَةٍ زَيْتُونَةٍ لَا شَرْقِيَّةٍ وَلَا غَرْبِيَّةٍ يَكَادُ زَيْتُهَا يُضِيءُ وَلَوْ لَمْ تَمْسَسْهُ نَارٌ نُورٌ عَلَى نُورٍ يَهْدِي اللَّهُ لِنُورِهِ مَنْ يَشَاءُ وَيَضْرِبُ اللَّهُ الْأَمْثَلَ لِلنَّاسِ وَاللَّهُ بِكُلِّ شَيْءٍ عَلِيمٌ ﴿٣٥﴾﴾

Meaning: GOD is the Light of the heavens and the earth. The allegory of His light is that of a pillar on which is a lamp. The lamp is within a glass. The glass is like a brilliant planet, fueled by a blessed tree, an olive tree, neither eastern nor western. Its oil would almost illuminate, even if no fire has touched it. Light upon Light. God guides to His light whomever He wills. God thus cites the parables for the people. God is cognizant of everything

Al-nur: 24-40:

This Deep marine illuminating creatures, often referred to as bioluminescent organisms, are fascinating examples of life in the deep sea. These organisms can produce light through biochemical reactions, a feature that serves various purposes such as attracting prey, communication, and camouflage. Here are some intriguing examples:

Anglerfish: Known for the bioluminescent lure on their heads, anglerfish use this light to attract smaller fish, making hunting easier in the dark depths of the ocean. Jellyfish: Many jellyfish, like the *Aequorea victoria*, exhibit bioluminescence, often glowing to confuse predators or attract mates. Deep-Sea Squid: Certain species of squid, like the *Abraliopsis*, can produce light through photophores on their

bodies, which can also help in communication and mating. Lanternfish: These small fish are among the most abundant bioluminescent creatures in the ocean. They have light-producing organs that help them blend in with the faint light from above when viewed from below, providing camouflage from predators. Glow-in-the-Dark Plankton: Some plankton, like dinoflagellates, emit light when disturbed, creating stunning. Vampire Squid: This unique deep-sea creature has light-producing organs that can help to illuminate its surroundings, as well as a cloak-like web that can help it hide from predators. Firefly Squid: Found off the coast of Japan, this squid species has photophores that emit a blue light, often attracting swarms and making them a popular sight during their spawning season. Vampire Squid: Firefly Squid This verse can be interpreted in many ways at early times, being on a boat in a heavy storm where big waves are present in a dark night, recently, also the bioluminescent organisms can give the same meaning, still another meaning is the light of believers given by GOD to the wright path.

أَوْ كَظُلُمَاتٍ فِي بَحْرٍ لُجِّيٍّ يَغْشَاهُ مَوْجٌ مِّنْ فَوْقِهِ سَحَابٌ ظُلُمَاتٌ بَعْضُهَا
فَوْقَ بَعْضٍ إِذَا أَخْرَجَ يَدَهُ لَمْ يَكَدْ يَرَاهَا وَمَن لَّمْ يَجْعَلِ اللَّهُ لَهُ نُورًا فَمَا لَهُ مِن نُّورٍ ﴿٤٠﴾

Meaning: Or like utter darkness in a vast ocean, covered by waves, above which are waves, above which is fog. Darkness upon darkness. If he brings out his hand, he will hardly see it. He to whom God has not granted a light has no light.

Al-Furqan: 25-45:

Time or length dilation gave the idea of space and time fabric that we live in. Then the real miracle, that is truly mind blowing, is the possibility of changing between all these theories and applications, and this is evidence of His divorce, GOD's will, so that quantum physics can be changed completely. The second part of the verse (to take the sun as evidence) can mean to take the speed of light as a proof for these changes. GOD knows best. This verse is truly a miracle, it represents that the recent trend in the laws of physics tends to be in favor of Einstein's theory of relativity, not like Newton's theory of the stability of these variables. and therefore the shadow changes in length according to time. light (with its speed being constant and known) as evidence in Einstein's theory According to the point of reference, for example a falling object in an aeroplane will fall in a straight line downwards, falling inside the plane (D_1, T_1), but if you look at the same object from outside the moving plane it descends with inclination forwards seemingly in a longer path (D_2, T_2), with a forward motion direction. As velocity = distance/time, since its the same falling object with the same speed so:

$D_1/T_1 = D_2/T_2$, since D_2 is more, so T_2 must be less as seen from outside the plane. Specific time interval varies, according to the recording position (time dilation).

أَلَمْ تَرَ إِلَىٰ رَبِّكَ كَيْفَ مَدَّ الظِّلَّ وَلَوْ شَاءَ لَجَعَلَهُ سَاكِنًا ثُمَّ جَعَلْنَا الشَّمْسُ عَلَيْهِ دَلِيلًا ﴿٤٥﴾

Meaning: Do you not see how your Lord extends the shadow? Had He willed, He could have made it still. And We made the sun a pointer to it.

Al-Furqan: 25-53

In this verse a description of the way how a river can merge with the sea or two oceans. The river water being non-salty & the sea water salty

don't directly mix together and there is a sort of barrier between them. This can be seen in many places with the same sediments forming this as a deep barrier between the sea & river water, or between the Atlantic & pacific oceans! To be noted that the sea اليم أو البحر and the river اليم أو النهر can be used In Qur'an as the same pattern but different environment, but the term yam refers more to high flow or flood. This barrier برزخ is mentioned in another verse denoting the after death period! Can it be similar, in aspect of only changing the surrounding environment! What is astonishing the Prophet Muhammed has never been to the sea!

﴿وَهُوَ الَّذِي مَرَجَ الْبَحْرَيْنِ هَذَا عَذْبٌ فُرَاتٌ وَهَذَا مِلْحٌ أُجَاجٌ وَجَعَلَ بَيْنَهُمَا بَرْزَخًا وَجِجْرًا مَحْجُورًا﴾ (٥٣)

Meaning: And it is He who merged the two seas; this one fresh and sweet, and that one salty and bitter; and He placed between them a barrier, and an impassable boundary.

Al-shoraa: 26-44:

The Cobra held profound significance for the Egyptian pharaoh, extending beyond mere symbolic representation to embody the divine power and authority of the ruler. Primarily, the cobra manifested as the Uraeus, a rearing cobra worn on the pharaoh's brow. This emblem was intrinsically linked to the goddess Wadjet, the protector deity of Lower Egypt. By donning the Uraeus, the pharaoh not only asserted his dominion over Lower Egypt but also invoked the protective powers of Wadjet, warding off enemies both earthly and spiritual. Furthermore, the cobra's venom, while deadly, was seen as a potent force for maintaining order and punishing transgression. The pharaoh, as the earthly representative of Ma'at (cosmic order and truth), wielded this power, symbolized by the cobra, to ensure stability and justice throughout the kingdom. Depictions of cobras destroying the pharaoh's enemies reinforced this notion of divine retribution and the invincibility of the king.

In essence, the cobra, through the Uraeus and its association with Wadjet, served as a visual declaration of the pharaoh's legitimacy, his divine protection, and his ability to enforce order. It was not simply a decorative element, but a potent symbol that communicated the pharaoh's essential role in maintaining the delicate balance between the earthly and divine realms.

In this aspect we can understand why pharaoh's magicians choose the Cobra symbol to influence people & why they linked that to pharaoh's dignity as in this verse!! Sure this is a divine knowledge to inform us about this link. Another very important remark in the following verses to this one is that those magicians were the first ones to believe instantly in Moses GOD, to the level that they were crucified if they didn't regret this! This means their faith was not only before the Israelites, but also more profound. It is not strange that one of the famous ancient

Egyptian queens, Cleopatra, ended her life by the same venomous Egyptian cobra, that was smuggled into her mausoleum within a basket of figs. This account emphasizes the symbolic power of the asp, associated with royalty and divinity in ancient Egypt, suggesting Cleopatra sought to reclaim her regal authority even in death. Actually, this was the end of her dynasty (30 B.C) and a mark for vanishing one the most puzzling civilizations in human history.

فَأَلْقَوْا جَبَالَهُمْ وَعَصِيَّهُمْ وَقَالُوا بِعِزَّةِ فِرْعَوْنَ إِنَّا لَنَحْنُ الْعَالِيُونَ ﴿٤٤﴾

Meaning: So they threw their ropes and their sticks, and said, “By the majesty of Pharaoh, we will be the winners

El-Naml: 27-18:

Ants have always been amazing creatures in their behavior and social organization, but recent scientific discoveries have revealed precise details about their structure and method of communication, highlighting the scientific accuracy of the Quranic verse that dealt with the conversation of ants in the time of Prophet Solomon, peace be upon him. Like other insects, an ant's body is divided into three main parts: the head, thorax, and abdomen. Ants are characterized by having a hard exoskeleton, a material made from chitin which gives them rigidity and strength despite their small size. One of their most remarkable characteristics is their ability to lift weights up to ten times their own!

This detailed information was only discovered in the last three decades, while the Holy Quran told fourteen centuries ago the story of an ant that sensed the approach of the army of the Prophet Solomon, and warned her people not to trample them. Even more strangely, the Holy Quran used the word "crushing you" (which is only used for hard, breakable surfaces = brittle) in a way they die if this chitin is broken. Ants build highly diverse and complex dwellings, including Vegetative nests: in plant cavities (such as acacia trees) where a mutually beneficial relationship develops.

1. **Temporary nests:** quickly constructed during migration or foraging.
2. **Underground nests:** The most common type, comprising deep tunnels and specialized chambers.
3. **Earth mound nests:** Such as fire ant nests, which are visible protruding from the ground surface.
4. **Wood nests:** like wood-boring ants (carpenters ants) The one that burrows into wood without eating it; this species has 27 pairs of Chromosomes (which is the same number as Surah An-Naml!).

like weaver ants that weave leaves with threads of secretion from its larvae.

5. **Leaf nests:** These nests display astonishing engineering capabilities: internal organization, nursery chambers, food storage, ventilation pathways, and even temperature regulation mechanisms.

Most importantly, ants choose places far from busy roads to avoid danger—which illuminates the Quranic meaning of the verse. It can be inferred from the story that Solomon, peace be upon him, who was knowledgeable about the language of birds and animals, may have chosen, in one of his campaigns, a narrow and unfamiliar path—inhabited by ants—in a clever military tactic, reminiscent of the strategies of history's greatest leaders.

Here there is strong resemblance to Tuthmos III (15th century BC), who is nicknamed, Napoleon of ancient Egypt. In the dangerous mountainous Levant, despite the opposition of his advisors, he surprised his opponents and triumphed. In the famous battle of Arrouna, he made a bold decision to take the narrow path of Arrouna ...A decisive victory. He waged seventeen military campaigns without defeat (he was mentioned 17 times in Quran), and his name was immortalized as the greatest warrior king of ancient Egypt.

One of the more unusual aspects of his life was his practice of collecting exotic animals from the lands he conquered, thus creating something akin to the first zoo in history. The comparison becomes even more intriguing when we consider that the kings of ancient Egypt often had both an official and a personal name, leading some researchers to wonder...

Could King Solomon be the same person as Thutmose III?

In the Holy Quran, it is mentioned about Solomon that he was taught the language of birds: {We have been taught the language of birds} [An-Naml: 16]. It is also mentioned that the jinn and the wind were made subservient to him: {And there were gathered for Solomon his hosts of jinn and men and birds} [An-Naml: 17]. And he prayed to his Lord

for a kingdom that would not belong to anyone after him: “My Lord, forgive me and grant me a kingdom such as will not belong to anyone after me” [Quran 38:35].

These are descriptions of an unprecedented authority, leaving the door open for historical comparisons. Indeed, when we trace history... From now until the pre-Christian era, we find that King Solomon and Thutmose III were the last rulers of these well-known kingdoms, whose remains still bear witness to this.

Conversely, we find no traces of such ancient glory in the Levant or Palestine. In Abyssinia imposing ruins remain, adding to the mystery of the scene: The obelisks of Axum: towering stone columns carved from a single rock. rock-cut churches of Lalibela The buildings carved entirely into the underground rock, the construction of which is still not fully understood. built from top to bottom, Even engineers believe they were (the opposite of any other construction method), and that this surpasses human capabilities, even with current technology! Local inhabitants there say its made by Angels or genies!! These landmarks, along with accounts of influence extending from Egypt to Abyssinia, make the connection between history and Quranic narratives a subject of both scholarly and religious debate. Reviewing the history of the great empires before Christ, we find only the Roman Empire, and indeed, there was no emperor within it to whom the character of our master Solomon could be applied.

Before Christ, we find that the figures of Dhul-Qarnayn and Thutmose III are the closest to this description The Egyptian borders at this time extended till the sources of the river Nile (Abyssinia-central Africa). Considering which of them is closer to the language of animals and The birds and the traces he left behind indicate his use of jinn in the places he conquered. We find that the character of Thutmose III is the closest to that of our master Solomon

relatively short periods, illustrates the vastness of the ancient Egyptian kingdom, which facilitated pilgrimages and secured the Nile's sources.

Indeed, the Victory Stele of King Shoshenq, located in the Karnak Temple, represents this expansion, and some images from the murals are included, highlighting that the route Thutmose III is renowned in history as a first-rate military leader who devised and executed plans and employed innovative warfare tactics. His style was imitated by those who came after him, even in modern times, such as Allenby in World War I and Montgomery in World War II. For example, in his crossing of the Arrouna Pass... He learned through his scouts (possibly birds) the enemy's positions and that they were not paying attention to the exit of this passage, and then his plan relied on the element of surprise for his enemies and then victory. Among the notable things are the instructions he gave Rekhmire, his minister, when he appointed him to his position: "Lord forbids bias, These are teachings that must be followed... Look forward to this ministerial position and be vigilant about everything that happens within it, for it is the foundation of the entire land. The purpose of the minister is not to enslave the people. If someone from Upper Egypt, the Delta, or any other part of the land comes to you with a complaint, you must ensure that everything should be done according to the law, and everyone should be given their due. Remember that those who hold high positions are constantly exposed, and their actions cannot remain hidden, Act justly, for favoritism is abhorrent to GOD. Never hesitate to uphold justice. Be fair to those you know and those you don't Know, treat those close to you with the same respect. Treat him as you would treat someone far away; do not turn your face from the one who complains. Do not readily believe what someone says to you, and do not be angry with a man whose case you have not investigated thoroughly. Be dignified so that people will respect you, for the noble one is he whom people honor, and his dignity comes when he upholds the truth. But if he frightens people and goes to extremes in terrorizing them, he will have a flaw that will lower him from the ranks of men. You will succeed in achieving the goal of your position if you uphold justice, for people expect fairness in all the minister's actions, and this

has been the way of justice since GOD ruled on Earth. Never hesitate to establish justice, Be harsh with the arrogant, for GOD prefers the modest over the arrogant".

Official manuscript translated from the reign of Thutmose III in the book "Egypt and the Ancient Near East" (3) by Professor Dr. Mohamed Bayoumi Mehran (Head of the Department of History and Archaeology - Faculty of Arts - Alexandria University) Therefore, we find that the state's policy—as Thutmose III saw it—must be based on divine principle of social justice, and that it is not a means of enslaving people. True justice lies in ensuring that everyone receives their due rights... the way of the prophets. Thutmose III proved himself a great, wise, and noble man. dealing of the defeated enemies was honorable he did not order their killing or torture. Instead, he asked them to swear allegiance to him for life and then allowed them to return to their lands, provided that their children be taken to be raised in Egypt at the royal court, so that they might develop a sense of loyalty to Egypt.

What is striking on the other hand is what this minister mentioned about Thutmose III. All these attributes are mentioned in the Holy Quran regarding Prophet Solomon. Noticing the kingdoms of this era and the characteristics of their rulers, it is highly likely that they refer to the same person. In addition, there is what is mentioned in Surah Sad, verse 35, regarding Prophet Solomon's supplication for a kingdom that would not be granted to anyone after him. what this minister mentioned about Thutmose III, where he indicated that he used to spend his hours creating designs and drawings bowls and small statues which he would dedicate to the Temple of Amun and commission his artists to execute them (were they jinn?!). His long wars did not prevent him from recommending the collection of rare flowers, plants, and various birds from across his vast realm, to be bred in an attached hall (the first to establish something like a zoo). All these attributes are mentioned in the Holy Quran regarding Prophet Solomon. Noticing the kingdoms of this era and the characteristics of their rulers, it is highly likely that they refer to the same person. In addition, there is what is mentioned in Surah Sad, verse 35, regarding

Prophet Solomon's supplication for a kingdom that would not be granted to anyone after him. Another point to note is that most prophets, or their followers, used the route between Yemen and Abyssinia for travel, migration, or temporary escape.

Among those we know of are Prophet Joseph, Prophet Moses, Prophet Solomon, and Prophet Muhammad (peace and blessings be upon him) – for his followers, And the explanation in this is found in the noble Prophetic tradition that clarifies the prophets and messengers of the Children of Israel, so that we may be certain that neither our master Abraham, nor our master Jacob, nor our master Joseph, peace be upon them, were among them, and that all of this is pure fabrication, Al-Tabari, in his Stories of the Prophets, according to Abu Dharr, said: The Messenger of GOD, peace and blessings be upon him, said:

“The first of the prophets of the Children of Israel was Moses, and the last of them was Isa- Jesus”.

حَتَّىٰ إِذَا أَتَوْا عَلَىٰ وَادِ النَّمْلِ قَالَتْ نَمَلَةٌ يَأَيُّهَا النَّمْلُ ادْخُلُوا مَسَاجِدَكُمْ لَا يُحِطَمَنَّ سُلَيْمَانُ وَجُنُودُهُ وَهُمْ لَا يَشْعُرُونَ ﴿١٨﴾

Meaning: Until, when they came upon the Valley of Ants, an ant said, “O ants! Go into your nests, lest Solomon and his troops crush you without noticing

Within the scope of the aforementioned prophetic tradition, the period (time and place) between Moses and Jesus must have included the other prophets of the Children of Israel. Therefore, contrary to recent claims that there is no evidence of GOD's prophets in ancient Egyptian artifacts (by logic there must be), this contradicts the earlier assertion. Egyptians and Ethiopians share many things in common according to Orthodox Church, the root of this linkage, resembles and dates since, the time of King Solomon's reign. Historically, Queen Sheba's son in which Ethiopians consider the ancient heir to the Solomonic dynasty for the Empire of Ethiopia. This simply mean, as we said previously, that the main Solomonic dynasty extended there, as is Thutmose III empire at the same time! The oldest standing

structure for worship in Ethiopia, the Temple of Yeha, is located in Tigray region. This is a tower built in the Sabaeen style (الصائبه) which have been referred to as fleeing from Egypt at times of oppression and dated through comparison with ancient structures in South Arabia to around 700-1400 BC. Additionally, Yeha is the location of an Ethiopian Orthodox Tewahedo Church monastery (Tawhed in Arabic = monotheism).

Following the Prophets descendants, if we track since Solomon (Thotmose III) till Yehia (Tut-Ankh-Amoun) we can easily say that this temple Yeha is for Prophet Yehia. This is clearer if we find that the main wall of the Yeha temple is directly perpendicular to El-Kaba in Mekka, also the writing found there is in heratic or sabaean stone scripts. To be noted that Solomon who inherited David (pointed arrow) both had a wide kingdom and vast knowledge.

But where is this kingdom? Archeological recent discoveries deny their presence in nowadays Palestine (in spite of all the excavations done not revealing anything), but recent discoveries for non man-made worship places as those carved in a mountain rock from top to bottom in Abyssinia, suggest that there was a sophisticated empire that extended to this region, so that even afterwards Prophets like Yehia and possibly Isa fled there.

Al-Naml: 27-20:

Among the powers that GOD bestowed upon our master Solomon, peace be upon him, was the gift of understanding the language of birds. This indicates that his dominion was not limited to material power or armies alone, but also included rare cognitive and intellectual abilities. In the Quranic verse, it appears that this bird—the hoopoe—was indeed carrying out a special intelligence mission! It went on a long voyage to assess the situation around the kingdom of Solomon, and brought back news of the kingdom of Sheba. That report not only described the beauty of the queen's throne and the power of her empire, but also emphasized an important religious fact in her land: "They prostrate to the sun." The queen "Makeda" her story in the book "Glory of Kings"

(Kebra Nagast), the story of the Queen of Sheba in Ethiopian tradition. According to that account, Makeda visited Solomon's court after hearing of his wisdom; and it is also told that Solomon's lineage extended to the kingdom of Abyssinia through a son born later named Menelik.

This narrative played a pivotal role in shaping the political and religious consciousness of the Abyssinian/Ethiopian Empire, as it was used to establish the legitimacy of ruling dynasties and link them to the lineage of a great prophet. Regarding the Yehha-Yahya site in Ethiopia, it is an ancient archaeological site in the Tigray region dating back to pre-Christian times. It contains massive stone structures that reflect ancient local civilizations. There are folk tales linking some traditional Ethiopian rituals to this heritage. The Ark of the Covenant is ancient, and some claim it is connected to Solomon or Jerusalem; it is even said to have housed the Ark of the Covenant at one time. Explanations vary within the realm of myth, political, religious theories, but most surprisingly can be the truth. On the other hand, in Palestine, it is noted in later history that the name "Aelia / Aelia Capitolina" is a Roman name for the city of Jerusalem. It was established in the second century AD during the reign of Emperor Hadrian after the Roman colony was rebuilt on the ruins of the city. However, the name "بيت المقدس" and its religious connotations continued to circulate in Jewish, Christian, and Islamic sources under various local and historical names. It is attributed to Caliph Umar ibn al-Khattab upon the conquest of Jerusalem (637 AD) and contains texts that speak of guaranteeing the "Covenant of Umar".

That clarifies the rights of the people of Jerusalem; but the religious or political discourse surrounding religion, myth, national identity, and archaeological evidence, cannot be resolved with a single statement, because the texts are intertwined, so he brought the Jews after being expelled from Jerusalem to live in it again. In conclusion, a distinction must be made between two types of evidence: Religious and Mythological narratives as in "Kebra Nagast" Which form part of the memory and identity of people and kingdoms, which may not

necessarily be historical documents according to modern scientific research standards.

Archaeological and historical evidence, based on an analytical methodology and published in specialized studies, is crucial. When making claims, one should first refer to archaeological and critical analysis, avoiding generalization of political judgments based solely on myth. However, some indicative evidence remains. Initially, the Jews lied in their narratives and everything they claim, and the greatest proof of this is found in the story of our master Joseph and the other verses we mentioned. There is no relation in the Holy Quran between the Children of Israel and Prophet Abraham, Prophet Joseph, or Prophet Jacob, but it is possible that Prophet Solomon was involved. This story confirms what was mentioned in the previous verse (Surah An-Naml, verse 18) when an ant addressed her colony, warning them of Solomon's soldiers: "O ants, enter your dwellings so that Solomon and his soldiers do not crush you while they perceive not." The verse highlights the importance of organization, intelligence gathering, and early warning in the kingdom of Solomon (peace be upon him). His kingdom was not based solely on force, but also on awareness, understanding, and monitoring of his surroundings.

The story of the hoopoe in subsequent verses reinforces this meaning; the hoopoe had become an intelligence-gathering agent. He brings accurate news from beyond the kingdom's borders, reflecting a style of governance based on knowledge and prior information. It is noteworthy that this concept aligns with what we know from ancient history: King Thutmose III (15th century BC) is considered one of the greatest kings of ancient Egypt — the first known ruler in ancient history to employ intelligence agencies and spies to monitor the affairs of the kingdoms under his control, and to ensure the stability of his influence over his vast empire. Papyri and military inscriptions indicate that he relied on a network of spies and informants to monitor enemy movements and gather intelligence before wars and battles. Thus, the Quranic narrative not only recounts Solomon's miracle of understanding the language of birds, but also sheds light on the art of

governance. And sound governance based on accurate information and intelligence precedence, as history confirms in later examples such as the experience of Thutmose III. One of the remaining pieces of evidence to this day is the survival of some descendants of those who subscribe to this analysis, namely the Falasha Jews. Considering that this region was not defiled or its history altered by colonialism as in the rest of Africa, we find that the oldest and largest Gospel is preserved as it is, in one of the churches there, and that no parts of it were removed at the Council of Nicaea in 325 AD as happened with the other Gospels (Ethiopia was not part of the Roman empire).

وَتَفَقَّدَ الطَّيْرَ فَقَالَ مَا لِيَ لَا أَرَى الْهَدْهَدَ أَمْ كَانَ مِنَ الْغَائِبِينَ ﴿٢٠﴾

Meaning: Then he inspected the birds, and said, “Why do I not see the hoopoe? Or is he among the absentees?”

Al-Naml: 27-88:

What was strange at the time of the inception of first revelations, was that mountains were similar to clouds in its motion. This can be unimaginable that time as the image of mountains then that its very stable and can't move! Only recently, its discovered according to earth rotation that all what's on its surface will move accordingly, even mountains. Similarly, Clouds move according to wind direction, and mountains move with the rotation of the earth. Reference to this has existed since 14 centuries! This shows the strength of faith of the Companions and early Muslims.

وَتَرَى الْجِبَالَ تَحْسَبُهَا جَامِدَةً وَهِيَ تَمُرُّ مَرَّ السَّحَابِ صُنْعَ اللَّهِ الَّذِي أَتَقَنَ كُلَّ شَيْءٍ إِنَّهُ خَبِيرٌ
بِمَا تَفْعَلُونَ ﴿٨٨﴾

Meaning: And you see the mountains, and imagine them fixed, yet they pass, as the passing of the clouds—the making of God, who has perfected everything. He is fully informed of what you do.

Al-Ankabut: 29-41:

The letter (ت) in Arabic or (T at the noun end) in English pronunciation (itakhadhat اتَّخَذَتْ) in this verse is truly both a miracle & challenge (Both for early Muslims & for later scientists). Because at the time of revelation of the Qur'an, it was a general belief that the spider is masculine, though the people in the Arabian peninsula knew Arabic language very well, still this was very odd for them. Only recently has it been proven that the female spider is the foundation of that home after killing the male! Apart of seemingly fragile house building - the spider web-, its also morally fragile. Along the whole surah in general it explains temptations and how they are intertwined, and it is not strange that the name of the surah is one of examples.

مَثَلُ الَّذِينَ اتَّخَذُوا مِنْ دُونِ اللَّهِ أَوْلِيَاءَ كَمَثَلِ الْعَنْكَبُوتِ اتَّخَذَتْ بَيْتًا وَإِنَّ أَوْهَنَ الْبُيُوتِ لَبَيْتُ
الْعَنْكَبُوتِ لَوْ كَانُوا يَعْلَمُونَ ﴿٤١﴾

Meaning: The likeness of those who take to themselves protectors other than God is that of the spider. It builds a house. But the most fragile of houses is the spider's house. If they only knew.

Al-Rom: 30-4:

One of the miracles in the Holy Qur'an is the accurate information about dates and events that were difficult to predict or even achieve at that time and in the knowledge of the unseen. This is because the Roman victory over the Persians in less than 10 years (as predicted in Qur'an) was something that was not expected at that time (given the overwhelming superiority of the Persians just before this time). This happened in the lowest part of earth, as mentioned in the Qur'an, and it was actually proven, only recently, that around the Dead Sea is the lowest point below sea level on Earth, and this was not known for fourteen centuries!

But what is most surprising is the expression: "That day" precisely why the believers would rejoice in this victory that was far from them even to know what happened, also, it won't make any impact on them!! Indeed, historical research found that this period coincides with the victory in the first Muslim's battle of Badr with was the first military victory for Muslims, around 624 AD!!

Hence the importance of this region, which GOD has blessed over the course of time, and to demonstrate the importance of this to Muslims and that the conflict in it will continue throughout generations, which it happened. Still it is happening now, and this is another example of Einstein's theory of relativity that blessed the space-time fabric around Al-Aqsa Mosque. Hence, over the years conflicts will make a better demarcation between goodness or evil.

فِي بَضْعِ سِنِينَ ۖ لِلَّهِ الْأَمْرُ مِنْ قَبْلُ وَمِنْ بَعْدٍ وَيَوْمَئِذٍ يَفْرَحُ الْمُؤْمِنُونَ ﴿٤﴾

Meaning: In a few years. The matter is up to God, in the past, and in the future. On that day, the believers will rejoice.

What is actually meant by "truth الحق" in this noble verse, can it be the organization and extreme balance between things and each other? For example, the development of stars and planets (progression of the stars to supernova then rupture or death leading to neutron star or black hole!) is similar to what is in humans, in that every person is programmed to die and meet his Lord. The universe is expanding and, on its way, to explode then to crush, and similarly, the human body grows, but there is programmed death in the genes of cells called: Apoptosis (programmed cell death the which is actually present in our genes). On the other hand, if this balance is not present, cellular growth out of proportion can happen as in case of tumors. We are all programed to meet GOD.

أَوَلَمْ يَتَفَكَّرُوا فِي أَنفُسِهِمْ مَا خَلَقَ اللَّهُ السَّمَوَاتِ وَالْأَرْضَ وَمَا بَيْنَهُمَا إِلَّا بِالْحَقِّ وَأَجَلٍ مُّسَمًّى ﴿٨﴾ وَإِنَّ كَثِيرًا مِّنَ النَّاسِ بِلِقَائِ رَبِّهِمْ لَكَافِرُونَ ﴿٩﴾

Meaning: Do they not reflect within themselves? God did not create the heavens and the earth, and what is between them, except with reason, and for a specific duration. But most people, regarding meeting their Lord, are disbelievers.

Apoptosis is programmed at the genetic code for each cell, it can be regarded as a normal sequence in body self repairing and even growth as the remains of the apoptotic cell is engulfed by other cells (phagocytes). This is actually different than necrosis, where in certain conditions the cell ruptures leading mostly to inflammation. In view of this verse, one can link what happens in the sky, star cycle for example, to the human body. Both are on there way to self destruction and transformation, in a specific time, to be ready to meet GOD.

Al-Rom: 30-9.

This verse emphasis that there were pre-historic advanced civilizations. Those people were much stronger & more advanced than the current mankind. The question is: where theydescendants of Adam? mostly, Not, as in other verses the same is described where GOD punished them by destruction though they were more advanced than us as stated in verses (40-82, 40-83). GOD sent many prophets & messengers for them, but they disobeyed those messengers, accordingly GOD destroyed them & their civilization. This is an explanation for many Pre-historic remains that are found destroyed all over the world, possibly Noah's flood was the last one. As mentioned in the verse, they didn't follow GOD's prophets, spread injustice & followed Satan, so GOD punished them by these universal catastrophes. Hopefully, we're not doing the same.

أَوَلَمْ يَسِيرُوا فِي الْأَرْضِ فَيَنْظُرُوا كَيْفَ كَانَ عَاقِبَةُ الَّذِينَ مِن قَبْلِهِمْ كَانُوا أَشَدَّ مِنْهُمْ قُوَّةً
وَأَثَارُوا الْأَرْضَ وَعَمَرُوهَا أَكْثَرَ مِمَّا عَمَرُوهَا وَجَاءَتْهُمْ رُسُلُهُم بِالْبَيِّنَاتِ فَمَا كَانَ اللَّهُ لِيَظْلِمَهُمْ
وَلَكِن كَانُوا أَنفُسَهُمْ يَظْلِمُونَ ﴿٩﴾

Meaning: Have they not travelled the earth and seen how those before them ended up? They were more powerful than them, and they cultivated the land and developed it more than they developed it, and their messengers came to them with clear signs. God would never wrong them, but they used to wrong themselves.

Lightning, a dramatic display of atmospheric electricity, plays a vital role in breaking the strong triple bond of atmospheric nitrogen (N_2). This process, known as nitrogen fixation, is crucial for life as it converts inert nitrogen gas into reactive nitrogen compounds that plants can utilize for growth. The intense heat generated by a lightning strike, reaching temperatures of up to

30,000 degrees Celsius, provides the energy required to overcome the substantial activation energy needed to dissociate the N_2 molecule (9.8 electron volts). This high temperature effectively splits the nitrogen molecules into individual nitrogen atoms. These highly reactive nitrogen atoms can then combine with oxygen and hydrogen in the atmosphere to form nitrogen oxides and ammonia. These compounds, carried down to the Earth's surface by rainfall, serve as natural fertilizers. They provide a readily available source of nitrogen for plants, ultimately supporting the food chain thus, sustaining terrestrial ecosystem. Therefore, while lightning is often associated with destruction, it also performs the vital service of initiating nitrogen fixation, contributing significantly to the global nitrogen cycle and supporting life on Earth. Actually, all these recent discoveries are described in this verse. As it was earlier understood that rain is the relation between lightening and food. Recently, N_2 molecule breaking (that needs high energy- supplied by lightening) completes the nitrogen cycle on earth crucial for farming! This is another example of how a verse in the same context can have different interpretations, all over time!! Only the creator & designer for all this, GOD all mighty, can do this.

وَمِنْ آيَاتِهِ يُرِيكُمْ الْبَرْقَ خَوْفًا وَطَمَعًا وَيُنْزِلُ مِنَ السَّمَاءِ مَاءً فَيُخْرِجُ بِهِ الْأَرْضَ بَعْدَ مَوْتِهَا إِنَّ فِي ذَلِكَ لَآيَاتٍ لِقَوْمٍ يَعْقِلُونَ ﴿٢٤﴾

Meaning: And of His signs is that He shows you the lightning, causing fear and hope. And He brings down water from the sky, and with it He revives the earth after it was dead. In this are signs for people who understand.

Luqman: 31-27:

Did GOD mention the in the Qur'an trees and then the seas as an indication that writing in general will be mostly with wooden pencils or pens, with a predominant blue color, as in the seas, also mentioned the number of seas to be seven, but things can go much deeper than that. Although Muhammad didn't write and never traveled out of the Arabian Peninsula!! The number 7 was repeated along the Qur'an.

This number can have a meaning in Islamic worship as in Tawaf around Ka'ba in Haje or Umrah is 7 times, there are 7 heavens, 7 continents, 7 colors of the rainbow, 7 days of the week, 7 verses of the first Surah in Qur'an (Fatihah), 7 cervical vertebrae in all mammals, 7 notes in the musical scale, even 7 wonders of the world this can symbolize the unity among everything.

In Quantum physics the number 7 has special significance as: Quantum Numbers: In the context of atomic orbitals, the maximum number of orbitals that can exist in the principal energy level $n=7$ (the 7th shell) corresponds to $n^2 = 49$ total orbitals. Each type of orbital (s, p, d, f) has a specific capacity, contributing to the behavior of electrons in atoms.

Periodic Table: The 7th row of the periodic table corresponds to the elements with principal quantum numbers up to 7, which includes the actinides and transactinides. These elements often exhibit complex quantum behaviors due to their electron configurations.

Molecular Geometry: The octet rule states that atoms tend to bond in such a way that they have 8 electrons in their valence shell for stability, but the 7th bond can also be significant in some cases, influencing molecular shape and hybridization states, particularly in complex coordination compounds or organometallic chemistry.

Spin States: In certain systems, particularly those in the field of quantum computation and information, the significance of qubits or

spin states can sometimes involve combinations or systems of 7. While the number 7 may not be a fundamental constant in quantum physics like Planck's constant or the speed of light, it does appear in the organization of elements and the study of quantum states and phenomena. Even the direction, done by the pilgrims in Hajj around the Ka'ba (Tawaf) is 7 times in the counterclockwise rotation direction which is the same as of Earth's rotation around its axis giving the day & night, the moon rotation around Earth pointing to the month in Islam, the Earth rotation around the sun pointing to the solar year, the sun rotation in the milky way galaxy, even electrons in the atom rotate in the same orbital direction, also the blood stream RBCs rotate in a vortex manner. So, in Tawaf direction & count can represent being anti-clockwise rotation in harmony with the whole Universe! direction, done by the pilgrims in Hajj around the Ka'ba (Tawaf) is 7 times in the counterclockwise rotation direction which is the same as of Earth's rotation around its axis giving the day & night, the moon rotation around Earth pointing to the month in Islam, the Earth rotation around the sun pointing to the solar year, the sun rotation in the milky way galaxy, even electrons in the atom rotate in the same orbital direction, also the blood stream RBCs rotate in a vortex manner. So, in Tawaf direction & count can represent being anti-clockwise rotation in harmony with the whole Universe! What is even more strange is that the percentage of water and land mentioned in the Holy Quran in general (more than 70% water and less than 30% land) is the same percentage among them on the level of planet Earth! The Mediterranean Sea, including its marginal seas, especially the Aegean Sea, Adriatic Sea, Black Sea, The Red Sea, Dead Sea and Lake, Arabian Sea, Arabian Gulf & the Caspian Sea. Total 7 seas.

وَلَوْ أَنَّمَا فِي الْأَرْضِ مِنْ شَجَرَةٍ أَقْلَمٌ وَالْبَحْرُ يَمْدُّهُ مِنْ بَعْدِهِ سَبْعَةُ أَبْحُرٍ مَا نَفِثَتْ كَلِمَاتٌ
 اللَّهُ إِنَّ اللَّهَ عَزِيزٌ حَكِيمٌ ﴿٢٧﴾

Meaning: If all the trees on earth were pens, filled by the ocean, with seven more seas besides, the Words of God would not run out. God is Majestic and Wise.

Al-Sajdah: 32-5:

This verse harbors deep thinking in many ways. To start with there is a direct correlation concerning velocity that can indicate how GOD can deliver an order or an issue to his messengers to be applied on earth. This can be done in a very special way, that GOD describes on this verse that this issue is delivered in a curvy path the speed of which is given in the following correlation. One day to that angel or messenger, this interval is equivalent to 1000 years of what we have on Earth, and in a way these numbers are close to each other. Meanwhile, the time & speed calculations from a specific location on earth, don't apply for space travel!! This simply means - special relativity, Again this can be an example of Einstein's theory of relativity. In another way, this can be a direct order to calculate this equation: If we calculate $1000 * 12 * 28 = 336000$ (12 for months 28 for days, lunar calendar) This noble verse indicates a specific speed close to this mathematical result (by which an angel can travel).

Recently, it is known that this number is close to the average calculated speed of light in space, 300,000 kilometers per second. This is approximately the speed of light in a vacuum discovered so far (and may reach the aforementioned number later in outer space) Another method to calculate this speed using the distance travelled by the moon in one month in Km. divided by 28 days, If we know that the approximate circumference of the circle in which the moon orbits is 2,415,460 km, which is approximately the distance it travels per month (since the moon actually orbits in an elliptical orbit), and if we try to calculate how much it travels in 1,000 years, we multiply this number by 12,000 to get the distance in a thousand years. If we divide this by 86,400 (how many seconds are in one day), Then, by simple division, $\text{Speed} = \text{distance}/\text{time} = 28,985,520,000 / 86,400 = 335,480 \text{ km/sec}$. Again this can tell that Angels as Gabriel (Known to be created from light that can have similar velocity- as created from light) can travel in a mimicking or by logic faster speed, we can also deduce that there is no vacuum in space (dark matter, energy?! which can boost speed?).

Another important astronomical issue pointed in the verse that the messenger or Angel delivering this order doesn't go in a straight linear path, but in a curvy path. which was later adopted for space travels (can be due gravitational forces of stars or black holes effect!) The universe is filled with matter and energy; there is no absolute vacuum.

Whatever, all these calculations are approximate, as every kinetic system has its own distinct timescale, and it has indeed been proven that even in nearby galaxies, the kinetic and temporal parameters are completely different from ours. The Quran alludes to this, stating that on the Day of Resurrection, people will affirm that they only remained for one hour! This is what science currently confirms and can now be comprehended as an astronomical fact, that every rotating (mainly) structure has its own parameters and calculations as compared to a different environment!! Only GOD knows.

In a similar manner, calculation of the age of the universe in this verse is to estimate it based on verse 54 of Surah Al-A'raf, verse 3 of Surah Yunus, verse 7 of Surah Hud, and many other verses. GOD mentions that He created the heavens and the earth in six days, and if we know approximately that the age of the universe is 13.8 billion years, so it's possible that one day in God's reckoning is equivalent to 2.3 billion years in our reckoning. This could mean that they aren't specific days, but rather like one year, as Carl Sagan described it, representing the starting point (the Big Bang, a Cosmic Calendar of epochs), now we are at the end of this year (Six days or epochs) Contrary to the belief in the distorted Old Testament, for example, that there were indeed six days for creation, then He rested on the seventh - Saturday (may God forgive us) Even according to Carl Sagan's concept of a cosmic calendar: We are still living still living on the sixth day, and everyone we know from known and past history, is while the seventh day is Judgment Day, the end, eternity—and God knows best.

يُدَبِّرُ الْأَمْرَ مِنَ السَّمَاءِ إِلَى الْأَرْضِ ثُمَّ يَعْرُجُ إِلَيْهِ فِي يَوْمٍ كَانَ مِقْدَارُهُ أَلْفَ سَنَةٍ مِمَّا تَعُدُّونَ ﴿٥٥﴾

Meaning: He regulates all affairs, from the heavens, to the earth. Then it ascends to Him on a Day the length of which is a thousand years by your count.

One of the recent scientific opinions is that man is made up of ions, like cosmic dust - interstellar dust- cosmic clay? Is there an evolution in human creation? It is certain that it is as Darwin mentioned (no evidence), as GOD stated in another verse that he created the human being in the best form (95:4). It was mentioned before regarding ancient human civilizations, which were in many aspects more advanced than us. **Advanced Civilizations That Preceded Us:** Among the greatest indicators of early human advancement are the monumental and wondrous remains left to us by ancient civilizations. The pyramids in Egypt, the temples of the Mayan and Inca civilizations, the ruins of Babylon and Assyria, and other astonishing landmarks that have baffled scholars and continue to challenge modern technology. Modern science is unable to explain with absolute precision how it was constructed. This refutes the belief that early humans were primitive and simple; on the contrary, it seems that early humans possessed great knowledge and sciences, perhaps even surpassing our knowledge today in some areas. Adam, peace be upon him, and his descendants after him, inherited this comprehensive knowledge, which explains the ability of early civilizations to innovate and build in a way that surpasses imagination, (Heifer:31).

This Quranic perspective, which links the origin of human creation to cosmic dust and celestial clay and indicates that the first human possessed the highest degree of knowledge, transcends materialistic theories that confine creation to blind evolution (as stated by Darwin!). Rather, it affirms that creation was entirely divinely ordained, and that knowledge and wisdom are a gift from GOD Almighty to mankind. GOD knows best.

الَّذِي أَحْسَنَ كُلَّ شَيْءٍ خَلَقَهُ وَبَدَأَ خَلْقَ الْإِنْسَانِ مِنْ طِينٍ ﴿٧﴾

Meaning: He who perfected everything He created, and originated the creation of man from clay.

Saba' (Sheba): 34-11:

In Surah An-Naml, verse 16, it becomes clear that our master Solomon has inherited David. This verse makes it clear that both were skilled warriors and prepared for battle, to the point that GOD instructed David to make armor for his soldiers with certain specifications to aid them in battels. Indeed, this was one of the factors contributing to their victory and the expansion of their kingdom. It became clear that these specifications required malleable iron, which is precisely what happened with our master David. By examining previous kingdoms, where one king inherited a large kingdom from an existing one, such that no one else should have it, we find that this applies strongly to both: Thutmose I and Thutmose III, as we'll describe. The question: Is prophet David Thutmose I (1538- 1510 B.C)? The man whom some historians consider the founder of the Egyptian Empire at that time, and who was indeed succeeded by Thutmose III, added to this king's legacy, and both displayed remarkable military prowess as stated in Qur'an.

أَنْ أَعْمَلَ سَلْبَعَتٍ وَقَدَّرَ فِي السَّرِّ وَأَعْمَلُوا صَالِحًا إِنِّي بِمَا تَعْمَلُونَ بَصِيرٌ ﴿١١﴾

Meaning: Make coats of armor, and measure the links well; and work righteousness. I am Observant of everything you do.

Saba' (Sheba): 34-13

To Continue what was mentioned earlier in this chapter, an aspect of power and beauty of this empire, in which our master David resided, is revealed. He inherited and increased the influence and impact of this empire to such an extent that it cannot be overlooked in history, and indeed, there were similar empires within the ancient Near East.

But: where do we get all the criteria?! A kingdom this vast, with its reliance on jinn for its labor, would inevitably leave behind marvelous evidence of its existence. We have already presented a portion of this

in Surah An-Naml, such as the mihrabs, which are unlike any other temples, like those in Lalibala and the ancient temples carved in the rocky ground from top to bottom (unlike all buildings, which cannot be done with today's technology) making a building (under the ground surface level!!) out of the same rock!!.

The kingdom of our masters David and Solomon coincides perfectly to the Egyptian kingdom, mainly at the time of Thutmose I and his successor Thutmose III, not to mention the many recent archeological attempts to prove that this was elsewhere! As mentioned in Qur'an and history they were both kings (inherited from one to the other), both Prophets of great wisdom & success even in military campaigns (both never lost a battle), one of them had power over Jinn & birds (unprecedented authority) as with Solomon.

To emphasize this point, there are artifacts from Thutmose III indicating that this reign corresponds to what we have mentioned (for example, images of prayer niches, as we explained in Surah An-Naml). Here, the remains of the basins and other relics of our master Solomon (Thutmose III) serve to confirm this meaning and even link it to our master David (Thutmose I) in the same verse.

يَعْمَلُونَ لَهُ مَا يَشَاءُ مِنْ مَحْرِبٍ وَتَمَثِيلٍ وَجَفَانٍ كَالْجَوَابِ وَقُدُورٍ رَاسِيَاتٍ أَعْمَلُوا ءَالَ
دَاوُدَ شُكْرًا وَقَلِيلٌ مِّنْ عِبَادِيَ الشَّكُورُ ﴿١٣﴾

Meaning: They made for him whatever he wished: sanctuaries, statues, bowls like pools, and heavy cauldrons. “O House of David, work with appreciation,” but a few of My servants are appreciative

Vases of Thutmose III (stamped in Khartoch), Metropolitan Museum of Art.

Temple of Lalibala carved of one rock below earth's surface (ancient, non-manmade) This region was within ancient Egyptian Empire at that time.

The Quran clarifies that even the jinn did not know of the death of Prophet Solomon until sometime after he died. This, if it indicates anything—as in the previous verse (34-13)—is that the jinn do not know all that is present, let alone the unseen. Strangely, the existing image of Thutmose III's mummy before the untying of the wrappings was first displayed in the Bulaq Museum in Cairo in 1886. After its discovery in 1881 at Deir el-Bahari, near the temple of Hatshepsut (his mother), the events surrounding the untying of the mummy's wrappings are highlighted. It is dilapidated, with three internal wooden supports (not shown in the picture - to keep it upright) and another external one beside it was most likely much taller than what is shown in the picture, also shown his mansaha منسأته which is of such importance that it is mentioned in the Holy Quran.

The image shows him attached to a mummy! It's clear there was a period between King Solomon's death and the discovery of death, allowing time for the mummy to be rigid into this inverted position. To straighten it, it would have required the placement of side supports, as seen in the image of Thutmose III! On the other hand, ancient Egyptians were famous in mummification of bodies soon after death (within 70 days its completed), however in case of Thutmose III, it's evident that decay of the body started to happen before the process of mummification, that's why it's badly preserved! This is a strong support that both are the same person. Because that means the mummy was found dilapidated and not in its proper position before mummification (this was discovered by the jinn sometime after death).

فَلَمَّا فَصَّيْنَا عَلَيْهِ الْمَوْتَ مَا دَلَّهُمْ عَلَى مَوْتِهِ إِلَّا دَابَّةُ الْأَرْضِ تَأْكُلُ مِنْسَأَتَهُ فَلَمَّا خَرَّ تَبَيَّنَتِ
الْجِنَّ أَنَّ لَهُمْ كَانُوا يَعْلَمُونَ الْعَيْبَ مَا لَبِثُوا فِي الْعَذَابِ الْمُهِينِ ﴿١٤﴾

Meaning: Then, when We decreed death for him, nothing indicated his death to them except an earthworm eating at his staff. Then, when he fell down, it became clear to the sprites that, had they known the unseen, they would not have remained in the demeaning torment.

The image shows the broom beside him (as found) also one of the external supports to keep the mummy upright! Master Solomon: (Thutmose III)

Al-Safat: 37-125

Ba'al, translating to "lord" or "master," originated as a generic Semitic title for local fertility and storm deities before becoming associated with the Canaanite god Hadad. Rooted in 3rd-millennium BCE Mesopotamia as Adad, the cult gained prominence in the Levant (c. 2000–1500 BCE) as a protector of agriculture. "Ba'al" was initially a title for various local gods (e.g., Ba'al-Hermon). Baal Cycle: Around 1400–1200 BCE, Ugaritic texts defined him as a storm god living on Mount Zaphon, struggling against Yam (sea) and Mot (death) to bring rain. Origins in Mesopotamia: Attested in the Akkadian Empire (2334–2218 BCE), Baal Hadad merged the Mesopotamian storm god Adad/Iskur with Canaanite traditions. Phoenician Influence: By the 1st millennium BCE, he was specifically worshipped as a major deity by the Phoenicians and Canaanites. Biblical Context: The Bible frequently depicts the cult of Ba'al as a competitor to Yahweh, particularly during the reign of Ahab and Jezebel. In this era Prophet Ilyas was sent by GOD to guide people for the right path, first mentioned as a prophet in Surah Al-An'am 6:85. He invited his people who lived in Baalbek to monotheism, obeying Allah and abandoning sins.

The Quran narrates that Elijah told his people to come to the worship of Allah and to leave the worship of Baal, the primary idol of the area. After he faced persistence of his people for many years, cursed them with drought and people were inflicted with starvation. Amazingly, Ba'al is still having influence over corrupted people till now!

Recently, even in Epshtien files his name was related to child sacrifice! GOD warned people by name from Ba'al (associated to Satan) and child sacrifice for over more than 14 centuries ago. In fact, thinking about followers of Ba'al is confusing, how would atheists sacrifice their children to please that satanic symbol, meanwhile losing their life and afterlife...really what is the reward?!!

أَتَدْعُونَ بَعْلًا وَتَذَرُونَ أَحْسَنَ الْخَالِقِينَ ﴿١٢٥﴾

Meaning: Do you call on Baal, and forsake the Best of creators?

Al-Zumur: 39-5:

The truth, which is one of the beautiful names of GOD. He created the heavens and the earth with the truth, this term can mean a lot (balance, discipline, in order, etc...). The balance between each of them, otherwise one of them will destroy the other. The rotation of night over day has a direct relationship to the movement of the sun, the earth, and the moon. Is this a reference to the rotation of the earth around its axis? The second part, according to - Einstein theory - $E=mc^2$. If the square of the speed of light refers to the distance divided by time, and since the universe is expanding (proven) and this is consistent with the Qur'an.

Is this further evidence that time will shrink to the point of collapse? or because it is the preordained orbit of astronomy? The Earth's atmosphere contains the phenomenon of night and day, GOD Almighty explains that the night will encroach over the day and that the day will encroach over the night (each will prevail in a spherical pattern), can this be an evidence of the Earth's sphericity and the sun and moon have an impact on that (night & day times). There are evidences that everything in the universe is in constant motion and occurs for a specified and decreed time. Finally, a strange expression in this verse about the Sun & the Moon that they are running! In one of the video links it can be demonstrated that during their actual motion in their orbits, meanwhile, moving upwards & downwards as if running!

خَلَقَ السَّمَوَاتِ وَالْأَرْضَ بِالْحَقِّ ۚ يُكَوِّرُ اللَّيْلَ عَلَى النَّهَارِ وَيُكَوِّرُ النَّهَارَ عَلَى اللَّيْلِ ۖ وَسَحَّرَ
الشَّمْسَ وَالْقَمَرَ ۚ كُلٌّ يَجْرِي لِأَجَلٍ مُّسَمًّى ۚ أَلَا هُوَ الْعَزِيزُ الْغَفَّارُ ﴿٥﴾

Meaning: He created the heavens and the earth with reason. He wraps the night around the day, and He wraps the day around the night. And He regulates the sun and the moon, each running along a specific course. He is indeed the Almighty, the Forgiver.

This verse is somehow similar to the verse in surah Yusuf (12-2), where GOD is informing us that the Qur'an was given to us in Arabic to make us comprehend. Indeed, we find in Surah Yusuf some words that were originally non-Arabic then were incorporated in Arabic. This verse (39-28) indicates that the Holy Quran will remain until the Day of Judgment in Arabic, carrying many meanings and guidance to help humanity find the right path. And considering the verse before it, GOD Almighty tells us that Quran contains many lessons and examples so that we may remember all that calls us to righteousness.

Does this include a part of the stories and languages of our ancestors? Considering the sequence of these two verses, we find that the story of Joseph, for example, contains many hieroglyphic words (already mentioned), and after the revelation of the Quran, we understood them as being from the Arabic language. The same applies to other languages such as Aramaic or Syriac, A number of researchers consider Arabic to be a repository of thirty pre-existing Semitic languages (which, according to the new classification of Afroasiatic languages, constitute the first part, in addition to six others—a total of seven language families for this region) including Cushitic, Ancient Egyptian, Berber, Chadic, Omotian, and Beja.

These languages are characterized by their trilateral or biliteral roots, and masculine words are made feminine by adding the letter "t" to the end of the word. They also contain two letters not found in other languages, such as "ḥā'" and "‘ayn" ع ح. These seven groups give rise to 30 languages, including, in the northeast of Mesopotamia, the Semitic languages such as: Akkadian with its two branches, Assyrian and Babylonian, and in the Levant, Aramaic It includes ancient Aramaic, Syriac, Nabataean, and Mandaic. Canaanite is further divided into Ugaritic, Phoenician, Hebrew, Ammonite, and others... In southeastern Yemen, there were the Arab languages, including: Sabaean, Himyarite, Ama‘inian, Uthainian, Hadhrami, and others... Then in the Arabian Peninsula, there were the Semitic Arabic languages: Hejazi, Thamudic, Safaitic, Al-Ahsa‘i, and Lihyanite. Then

in Africa (Semitic in the west), northern Ethiopia, which includes Sudan and Djibouti: among them Ge'ez, Tigray, Tigrinya, and others. And southern Ethiopia: Amharic and Agarib.

All of this was included in the Holy Quran, and thus Classical Arabic was established. Later dictionaries found that it contained 12 million non-derived words, linguistic wealth unmatched by any other language. A number of researchers consider Syriac to be the third most important language in Christianity after Latin and Greek, in terms of the abundance of ancient ecclesiastical and liturgical writings that were written in it and formed the basis of Christianity. It is also known that Jesus Christ spoke Aramaic, and some scholars consider Syriac and Aramaic to be one language.

The fact that Jesus Christ spoke Syriac and/or ancient Egyptian language that evolved to Coptic is a further puzzle. The word "disciples" "الحواريين" is said to be of Syriac or Aramaic origin, on the same time it can be (followers of HOR حور the righteous in ancient Egypt). Furthermore, many of the isolated letters in the Quran are said to have meanings in other languages, such as the letter "nun" "ن" in hieroglyphics (a religious rite).

Historically, the origin of Arabic language is known to lie in South Arabian (Himyaritic) in Yemen, Ethiopia, and southern Egypt, from which many dialects were derived, such as Amharic. The Ethiopian Tewahedo Bible. Is one of the world's oldest bibles written in Ge'ez and Amharic, only by its name Tewahedo (in Arabic means monotheism) it's evident what it is about.

On the other hand, North Arabian (Classical Arabic, الفصحى) in northern Arabia, as well as Aramaic and Syriac. It is evident that Classical Arabic was the least fortunate in terms of the number and vitality of its speakers, but this changed after the advent of Islam. Considering that Qur'an sometimes refers to a certain word, in the same way that it was pronounced at that time (many examples we mentioned in Surah Yusuf) the word "حواريون" was the description of Jesus students in the Hamyrian language (in ancient Abyssinia) or the

pattern exists in several languages in this region during the same time period. Semitic languages use non-concatenative morphology unlike the other non-semitic languages.

Al-Zumur: 39-42:

Amazingly sleep and death can be very close in some characteristics? Indeed, each of us can find himself in dreams moving among various places and distances in a short time! Sure there is no time or space limitations. Is it possible that we move in another (Fifth) dimension, that we reach by sleep or death?

It has recently been proven that at the time of death, the area responsible for vision (occipital brain lobe) is exceptionally active. Does a person see other things at death? In fact, this is mentioned in the Qur'an, in another verse 50:22.

In this verse GOD states the soul (mostly interpreted as consciousness) nearly dies during sleep. There are many similarities known. Strangely, we all feel more fresh & vivid after waking up (recharge?!). In the same way, Can this apply to the spirit (after death), so that we can be resurrected in a better shape?!

Actually, science is approaching this area with extra-dimensions that can be verified by experiments as the one that will take place in 2028! the DUNE particle accelerator will create (from its location at Fermilab in Batavia, Illinois) muon neutrinos and antineutrinos, which will then travel to a detector located 1.5 kilometers underground in South Dakota. During their four-millisecond trip from Illinois to South Dakota, the neutrinos are expected to transform into electron neutrinos and tau neutrinos (neutrinos tend to do that kind of thing). Understanding this neutrino evolution could help piece together what happened those first moments after the Big Bang, but neutrino behavior could also show that extra spatial dimensions exist in tandem with our conventional four dimensions! The question remains:

Do we approach this dimension during sleep?! البرزخ

Its better comprehended as transformation from one state (living to another temporary state dead) as actually in dreams we can sometimes see & correspond to dead people!! God is stating this meaning in the verse.

اللَّهُ يَتَوَفَّى الْأَنفُسَ حِينَ مَوْتِهَا وَالَّتِي لَمْ تَمُتْ فِي مَنَامِهَا فَيُمْسِكُ الَّتِي قَضَىٰ عَلَيْهَا الْمَوْتَ وَيُرْسِلُ الْأُخْرَىٰ إِلَىٰ أَجَلٍ مُّسَمًّى إِنَّ فِي ذَٰلِكَ لَآيَاتٍ لِّقَوْمٍ يَتَفَكَّرُونَ ﴿٤٢﴾

Meaning: GOD takes the souls at the time of their death, and those that have not died during their sleep. He retains those for which He has decreed death, and He releases the others until a predetermined time. In that are signs for people who reflect.

Al-zumur: 39-69:

The Sun, our main-sequence star, has an energy source & a life cycle! This is clear in this verse. The sun recently is known to generate energy through nuclear fusion, primarily converting hydrogen to helium in its core. This process has been ongoing for approximately 4.5 billion years and is expected to continue for another 5 to 7 billion years. Once the hydrogen fuel in the core is exhausted, the Sun will begin to contract, causing the core temperature to rise.

This increased temperature will ignite hydrogen fusion in a shell surrounding the core, causing the Sun to expand dramatically into a red giant. Following the red giant phase, the core will eventually become hot enough to initiate helium fusion, converting helium to carbon and oxygen. This phase will be relatively short-lived. Ultimately, the Sun will exhaust its helium fuel, and lacking sufficient mass to fuse heavier elements, it will shed its outer layers into space, forming a planetary nebula. The remaining core will then cool and contract, becoming a white dwarf, a small, dense stellar remnant that will slowly radiate its remaining heat into space over trillions of years. Thus, the Sun will ultimately transform into a white dwarf after its main sequence lifespan and red giant phase. By this time, after the full life span of the sun. According to Qur'an, a very beautiful light shine will come to earth that's directly from GOD. Along the entire Surah there

will be large groups of people having their penalty on the day of Judgment, only Prophets, martyrs and the righteous are associated to this verse Is this verse another view of how it will go on doomsday, after the planetary nebula. core will then cool and contract white dwarf Sun life cycle! What we can also deduce from this verse that the sun is an energy source that will Eventually end. The solar energy is now one of the cleanest to use.

وَأَشْرَقَتِ الْأَرْضُ بِنُورِ رَبِّهَا وَوُضِعَ الْكِتَابُ وَجِئَءَ بِالنَّبِيِّينَ وَالشُّهَدَاءِ وَقُضِيَ بَيْنَهُم بِالْحَقِّ وَهُمْ لَا يُظْلَمُونَ ﴿٦٩﴾

Meaning: And the earth will shine with the Light of its Lord; and the Book will be put in place; and the prophets and the witnesses will be brought in; and Judgment will be passed among them equitably, and they will not be wronged.

Fosilat: 41:53:

Is scientific progress one of the reasons for discontinuing sending messengers from GOD to mankind, after giving the Qur'an? There hasn't been any messengers for more than 14 centuries. In fact this is stated directly in the Qur'an, verse (33:40), that Muhammad won't be a father for an adult male (which actually happened and his boy died very young) and that Muhammad is last messenger of GOD. Hence, scientific progress can be proof of what Muhammad (may God bless him and grant him peace) told in the Qur'an, so the Qur'an can be regarded as a renewed or renewable miracle! In the Qur'an there are news of many scientific facts that were not known at the time of the Prophet, or explained then in a simpler way then, now it matches a much deeper scientific theories. In this verse its both amazing and challenging the very detailed and advanced messages given in Qur'an in two aspects, as we will discuss separately: First:the horizons as the start of creation (idea of the big bang theory), universe expansion... Second: among themselves, as stated in the Qur'an the embryonic formation stages of development, individuality of a fingerprint (discssed later), chest tightness & lack of oxygen on ascending to a higher point in the atmosphere..... An extra hint in this verse is that all these discoveries will be revealed mainly by nonbelievers (non-Muslims). Again Mere challenge as if: Non-Muslim believers will find enough evidences in the universe to prove creation to themselves.

سَنُرِيهِمْ ءَايَاتِنَا فِي الْآفَاقِ وَفِي أَنْفُسِهِمْ حَتَّىٰ يَتَبَيَّنَ لَهُمْ أَنَّهُ الْحَقُّ ۗ أَوَلَمْ يَكُنْ بِرَبِّكَ أَنَّهُ عَلَىٰ كُلِّ شَيْءٍ شَهِيدٌ ﴿٥٣﴾

Meaning: We will show them Our proofs on the horizons, and in their very souls, until it becomes clear to them that it is the truth. Is it not sufficient that your Lord is witness over everything?

Al-Zukhruf: 43- 36:

A quantum phenomenon where two or more particles become linked such that the state of one cannot be described independently of the others, no matter how far apart they are. Measurements on entangled particles show correlations that cannot be explained by classical physics or local hidden variables. Quantum teleportation is one of the most intriguing and revolutionary protocols in quantum information science. Unlike its depiction in science fiction—where matter is instantaneously transported over vast distances—quantum teleportation involves the transfer of quantum information from one particle to another through the combined use of quantum entanglement and classical communication. In classical terms, teleportation conjures images of instantaneous transportation of objects. However, in the quantum realm, what is transferred is not the matter itself but the quantum state—the complete information content that describes a quantum system. Entanglement is a phenomenon where two or more particles become inextricably linked such that the state of one particle is directly and instantaneously correlated with the state of the other, regardless of the distance between them. For example, two photons can be prepared in a maximally entangled Bell state, such as: $|\Phi^+\rangle = \frac{1}{\sqrt{2}}(|00\rangle + |11\rangle)$ $|\Phi^+\rangle = \frac{1}{\sqrt{2}}(|00\rangle + |11\rangle)$ This means if one photon is observed to be in state $|0\rangle$ $|0\rangle$, the other will also collapse to $|0\rangle$ $|0\rangle$; likewise for state $|1\rangle$ $|1\rangle$. To conclude: The entangled particles, one of which changes instantly when the other changes state, no matter how far apart they are, appear to be exchanging influence at a single instant! In comparison, the speed of light itself seems incredibly slow. This strange behavior has long puzzled physicists because it challenges the very foundations of our understanding of space and time. This is more than just a physics puzzle; it has far-reaching implications for technology and our understanding of the universe. Quantum entanglement could be the key to quantum computing speeds unmatched by today's, un-hackable

communications, and teleportation-like technologies. Imagine a world where particles interact instantly, no matter how far apart they are, from one end of the galaxy to the other, as if the universe were a single, interconnected network with invisible threads. The obvious question is: Is this quantum entanglement possible for a human being? In this verse GOD clarifies that this phenomenon truly exists and that its most dangerous aspect is the quantitative entanglement between humanity and Satan! This is what we are witnessing now in the massacres perpetrated by the Zionists and Satan worshippers in Gaza. The rest of Satan's worshippers also commit sins throughout the world through Satan's whispers, and the worst kind is that with whom Satan has become intertwined—a kind of companionship. There have been many such companions throughout history, including, for example, Nimrod and Pharaoh in ancient times, and, more recently, Aleister Crowley. Indeed, we find that friends share common traits (both good and bad). Does this fall under the same category? Out of His mercy, and because He knows we cannot find a cure for this (not to mention understand), He shows us ways to prevent it, including demonic possession. Just by remembering GOD often **ذَكَرَ** also to ask for GOD forgiveness Without obeying GOD and remembering him by performing the rituals, He will assign to this heedless person a companion not just any companion, but Satan himself. This is one of the verses that can be interpreted by both early and present-day Muslims, each according to their own understanding, and both interpretations are correct.

وَمَنْ يَعْشُ عَنْ ذِكْرِ الرَّحْمَنِ نُقَيِّضْ لَهُ شَيْطَانًا فَهُوَ لَهُ قَرِينٌ ﴿٣٦﴾

Meaning: Whoever shuns the remembrance of the Most Gracious, We assign for him a devil, to be his companion.

Al-dokhan: 44-29:

In this surah GOD tells us what happened to Pharoah & his soldiers, drowning then leaving all what they had on earth. It has recently come to light, following the translation of some hieroglyphic texts, that the ancient Egyptians believed that upon the death of their king, the heavens and the earth wept for his passing. (as mentioned in James Henry Breasted's book, *The Dawn of Conscience*). This verse comes to refute this belief, which was prevalent among some ancient Egyptians. Was this known at the time of revelation of Qur'an?

فَمَا بَكَتْ عَلَيْهِمُ السَّمَاءُ وَالْأَرْضُ وَمَا كَانُوا مُنْظَرِينَ ﴿٢٩﴾

Meaning: Neither heaven nor earth wept over them, nor were they reprieved.

Al-Gatheia: 45-29:

Quantum entanglement is a peculiar phenomenon in quantum mechanics where two or more particles become linked together in such a way that they share the same fate, no matter how far apart they are. This means that if you measure a property of one particle, you instantly know the corresponding property of the other particle, even if light-years away, Einstein famously called entanglement: “spooky action at a distance” because it seemed to which states that an object is only directly influenced by its immediate surroundings. This, does not allow for faster-than-light communication, as the outcome of a measurement on one particle is random, and cannot be used to send a specific message to the other particle.

Quantum entanglement violates the principle of locality, Despite its strangeness, quantum entanglement has been experimentally verified and is a crucial resource for emerging technologies such as quantum computing and quantum cryptography. These technologies exploit the unique properties of entangled particles to perform tasks that are impossible for classical computers and communication systems. Knowing more about quantum physics simply can tell that these particles were once connected in a way near to each other, so one of them has the same response like the other. If we think to track this in a backward direction, this can lead us to the Big Bang or immediately after, where these particles were closer together, by time got separated even light years apart, but still linked by the creator, This link in action and fate can clarify this verse, as GOD says, in the preceding verses (45, 23-28) that all actions anyone does in his life is trans-crypted and saved, and we will be rewarded or punished accordingly.

هَذَا كِتَابُنَا يَنْطِقُ عَلَيْكُمْ بِالْحَقِّ ۚ إِنَّا كُنَّا نَسْتَنْسِخُ مَا كُنْتُمْ تَعْمَلُونَ ﴿٢٩﴾

Meaning: This Book of Ours speaks about you in truth. We have been transcribing what you have been doing.”

Muhammad: 47-24:

The heart is responsible for pumping blood to the entire circulatory system so that organs, tissues, and cells receive nutrients and oxygen and waste, such as carbon dioxide, is eliminated. Research is proving the heart may be as intricate as the brain, referred to as: “the little brain” The heart-brain actually sends more communication to the head-brain than the other way around. The heart beats before the brain forms. When the brain is dead, the heart continues to beat so long as it has oxygen.

In fact, the heart has 40,000 neurons and the ability to, learn, and remember. It also has its own emotions. Thanks to the field of neuro-cardiology, we are learning more about the intuitive nature of the heart and how we can apply this information to the relationship we have with ourselves and others. Recently it has been shown that there is a link between the brain and the heart, that works in both directions. Indeed, this can be known from ancient times. For example, when fear grows the number of heart beats increases, but it has been possible to document that there are nerves that connect between the heart and the brain, and this is actually mentioned in the Holy Qur’an in several places to the point of clarification.

Understanding some things passes primarily through the heart to the extent that certainty or insight, including faith, is based in the heart! With an illustration of the nerves between the heart and the brain discovered so far!! With an electrical component about 60 times greater and an electromagnetic energy field 5000 times greater than the brain’s, the heart has a significant influence on the body down to the cellular level.

The brain’s rhythms along with the respiratory and blood pressure rhythms entrain with the heart’s rhythm. This is the optimal state for human functioning. The heart’s energy is said to reach about three feet

outside of the physical body and can be detected in another person sitting nearby via an electrocardiogram (ECG). Can you bring to mind someone who, without even speaking a word, makes you feel light just by being in their presence? Have you ever been told, "You have such a positive energy about you"?

The potential of how far our heart's electromagnetic energy field can reach continues to be studied as technology plays catch-up. If it has become the "norm" for the heart to feel chronic stress or anger, it is accustomed to communicating this to the brain. heart's energy three feet outside of the physical body. The brain triggers the body's response in the form of stress hormones, constricted blood vessels, increased blood pressure, chronic inflammation, and basically makes the heart work harder. Putting the heart through constant emotional distress disrupts the body's balance and can lead to physical disease. As many have said, "Happiness is a choice," and so is sustainable joy. In the same way true faith can lead to a stable coherent heart & personality. The links between the brain and heart are complex and involve multiple pathways, including neural (Autonomic Nervous System), hormonal (adrenaline), and physiological interactions (emotional..)

أَفَلَا يَتَذَكَّرُونَ الْفُرْعَانَ أَمْ عَلَى قُلُوبٍ أَقْفَالُهَا ﴿٢٤﴾

Meaning: Will they not ponder the Quran? Or are there locks upon their hearts?

Qaaf: 50-16:

This noble verse contains a precise and important anatomical explanation about humankind. In Anatomy the brain circulation depends on the internal carotid artery, while the return of blood from the brain is through the Jugular veins. Part of the brain – the frontal lobe- that is mostly responsible for decision making, which is also affected by the whisperings of the soul or the devils that affects the final judgement.

Before this blood returns to the heart, in its mid-way it passes through the Jugular veins of the neck. In surface anatomy these jugular veins can be apparent in the neck! (nearly halfway between the brain & heart) The intended meaning is that God is closer to His servant than he thinks, and that even the mere thought of the brain, before the blood returns to the heart, will be known to GOD.

وَلَقَدْ خَلَقْنَا الْإِنْسَانَ وَنَعْلَمُ مَا تُوَسْوِسُ بِهِ نَفْسُهُ وَنَحْنُ أَقْرَبُ إِلَيْهِ مِنْ حَبْلِ الْوَرِيدِ ﴿١٦﴾

Meaning: We created the human being, and We know what his soul whispers to him. We are nearer to him than his jugular vein.

Al-Dhariyat: 51-49:

In this verse GOD clarifies that parity is present among his creatures. This can be puzzling as the examples are vast. Is it in the positive and negative charges found in many living & non-living things? We know that this parity is the base of the living cell mainly at the chromosome structure. On the way of chromosome structure study, it is astonishing how this parity is manifest, even in a way that certain compounds are bond specifically to each other finally giving also negative or positive charges, also they are found in pairs each from one parent!

This chromosomal double structure was first discovered in 1953 by James Watson and Francis Crick. Other researchers made very important, but unconnected findings about the composition of DNA. Ultimately it was Watson and Crick who put all of these findings together to come up with a model for DNA. Later, chemist Alexander Todd determined that the backbone of a DNA molecule contained repeating phosphate and deoxyribose sugar groups. The biochemist Erwin Chargaff found that adenine and thymine always paired while cytosine and guanine always paired.

High resolution X-ray images of DNA that were obtained by Maurice Wilkins and Rosalind Franklin suggested a helical, or corkscrew like shape. Some of the first scientists to recognize the structures now known as chromosomes were Schleiden, Virchow, and Bütschli. The term was coined by Heinrich Wilhelm Gottfried von Waldeyer-Hartz, referring to the term chromatin, was introduced by Walther Flemming. Scientists also discovered plant and animal cells have a central compartment called the nucleus. They soon realized chromosomes were found inside the nucleus and contained different information for many different traits.

The nucleosome is the basic unit of DNA double helix condensation and consists of a DNA bound to an octamer of core histones (2 dimers

of H2A and H2B, and an H3/H4 tetramer). About 147 base pairs of DNA coil around 1 octamer, and ~20 base pairs are sequestered by the addition of the linker histone (H1), and various length of "linker" DNA (~0-100 bp) separate the nucleosomes. The spacing of nucleosomes along DNA results in a beads on a string appearance. Histone modification controls the accessibility to DNA. Histone acetyltransferases or HATs acetylate residues on the histone tail leading to increased accessibility to DNA. Packaging of DNA is facilitated by the electrostatic charge distribution: cause DNA to have a negative charge, whilst the histones are positively charged. Histones are positively charged molecules as they contain lysine and arginine in larger quantities and DNA is negatively charged.

This allows histones to make a strong ionic bond to DNA form a nucleosome. The most basic level of DNA condensation is the wrapping of DNA around the histone core proteins. Higher-order packaging is accomplished by specialized proteins that bind and fold the DNA. This generates a series of loops and coils that provide increasingly higher levels of organization and prevent the DNA from becoming tangled and unmanageable. This complex of DNA and proteins are called chromatin. But in addition to proteins involved with packaging, chromosomes are associated with proteins involved with DNA replication, DNA repair, and gene expression. Still, this verse is an example of how early Muslims can interpret pairs in form of male or female in all creatures, then, modern science can discover a much deeper meaning!

As in chemical formulas: levo or dextro form then in electricity & magnetism positive or negative charges Even geography south or north, up or down waves. Clockwise or anticlockwise rotation. But all this by only one GOD

وَمِنْ كُلِّ شَيْءٍ خَلَقْنَا زَوْجَيْنِ لَعَلَّكُمْ تَذَكَّرُونَ ﴿٩٦﴾

Meaning: We created all things in pairs, so that you may reflect and ponder.

Al-Tur: 52-3:

The oath in the verses of Surah At-Tur holds great significance, encompassing multiple facets and meanings. As can be understood from the first verse, "By the Mount, Al-Tur" it most likely refers to Mount where GOD Almighty spoke to Moses. But where is this mountain located? Looking at the sequence of verses, more than one location can be understood: - Sinai (near Saint Catherine's Monastery), Egypt. - Midian or Abyssinia (which contains a mountain called Mount Sinai), Ethiopia. Then we come to the published parchment, which is a copy of the word of GOD written on animal skin (most likely goat's skin) - The Torah... We do not know of a copy with these specifications. - The Bible... there is indeed a copy written on goat skin dating back to about 2000 years, in Abyssinian high lands in one of the churches in the high mountains (the raised roof? Verse 5), it is complete and nothing was missing from it, as happened at the Council of Nicaea in the year [325 B.C]. The Holy Quran... Indeed, a copy of the Holy Quran was found at the University of Birmingham in England, as described at the beginning of this book (2-2). A copy just as the same copy of the current versions of Qur'an.

Is the intended meaning: the copy of the Gospel in Abyssinia? The evidence is that Prophet Muhammad (peace and blessings be upon him) knew of the existence of monotheists who adhered to the true teachings of previous religions. Therefore, he sent the Muslims in the early days of Islam when the oppression of the Quraysh intensified against them, to Abyssinia. Ethiopian Tewahedo Bible is one of the world's oldest bibles written in Ge'ez and Amharic, by its name in Arabic language (Tawhed = only one), signifying monotheism.

This confirms what we previously explained: That a large number of prophets and messengers passed through this region, including our master Joseph (who was sold for a few Dirhams - the currency of this region and southern Arabia at that time). Our master Solomon

Moreover, pilgrims from the churches still make pilgrimages there to this day, wearing white garments resembling the ihram, and even prostrating in their prayers as in Islam! The story of the Kingdom of Sheba and their queen (most likely in Abyssinia, not Yemen), and then the continued presence of the Falasha Jews to this day, who are considered evidence supporting this hypothesis. Meanwhile the empire of Solomon extended to this region. The presence of this complete form of Bible in this region dating at that era signifies that: Jesus Christ himself was present at that time around this location. It is clear that this region shares a language with the people of the Arabian Peninsula, as is evident in the story of Prophet Joseph and the speed with which he was sold, as is clear in the verses (where he came from the Bedouin and was sold for a few dirhams). This language is South Arabian (Himyaritic), which can be understood by those who speak North Arabian. This was evident in the ease of direct communication between the one who sold Joseph for a few coins and Moses and his conversation with the two girls about drawing water, and then in the way that Muhammad sent them to Abyssinia to the Negus and the monks there, to the point that they understood what was recited to them from the Holy Quran and were even influenced by it.

There is a hypothesis suggesting that all these regions originated from a single language and even understood each other well, but their writing systems differed (Ge'ez, Himyaritic, Amharic, Hieratic, etc.). Indeed, as we explained in Surah Yusuf, there are many hieroglyphic words spoken by Egyptians till this day, also, other words in the Holy Quran. Egyptians and Ethiopians share many things in common according to Orthodox Church, the root of this linkage, resembles and dates since, the time of King Solomon's reign. Historically, Queen Sheba's son in which Ethiopians consider the ancient heir to the Solomonic dynasty for the Empire of Ethiopia. This simply mean, as we said previously, that the main Solomonic dynasty extended there, as is Thutmose III empire at the same time!

فِي رَقٍّ مَّنْشُورٍ ﴿٣﴾

Meaning: And a Book inscribed (2), in a published scroll (3)

Arrow points to a Small Inlet to the Church in a high mountain, inside there is the elevated colored ceiling.

A picture of the Abuna Yamata Church in Ethiopia, which is located on a mountain more than 2500 meters high and can only be reached by climbing this rocky mountain, then entering the church through this narrow passage indicated by the red circle. أبونا... ياماتا.

Al-Tur:52-6:

Underwater volcanoes, or submarine volcanoes, are fascinating geological features formed beneath the ocean. They can arise from various tectonic processes and are often associated with mid-ocean ridges, where tectonic plates are diverging. Here are some key points about them: Formation: Submarine volcanoes are typically formed at tectonic plate boundaries. As magma rises from the mantle, it can create a volcanic structure on the ocean floor. Types: Volcanic Islands, Seamounts, Hydrothermal Vents, Volcanic Activity, Tsunamis, A totally different meaning for this verse can be "when the sea boils" may be denoting what can happen on the day of judgement. totally different meaning: for this verse can be "when the sea boils" may be denoting what can happen on the day of Judgment (better than to say doomsday!!as if it's any passing day!!). Further comprehension: Some

scholars like "Ibn Kathier" gave a different view in a way that it floods. Then this can hint to a river, mainly the Nile River as it floods because of high lands in the rainy Abyssinia. (As previously described the sea and the river can be used alternately.

وَالْبَحْرُ الْمَسْجُورُ ﴿٦﴾

Meaning: And the seething sea

Al-Nagm: 53-1:

This entire Surah can be a riddle, as most verses won't be verified by science only. To start with in its first verse GOD swears by the falling star! an exploding star was only known since few decades, a falling star was first observed in 2011, on its way to be engulfed by a black hole!! Can this be a sign of our later transformation to another form by the same spirit? The rest of Surah describes space events that only prophet Muhammad saw, strangely even on describing this in verse 17, the sight of Muhammad did not swerve or transgress! this can give an extra recent criteria of black holes effect and that it can act as gravitational lens, as the light waves bends around black holes. No wonder that GOD states in verse 18, that Muhammad certainly saw some of the greatest signs of GOD.

وَالنَّجْمِ إِذَا هَوَىٰ ﴿١﴾

Meaning: By the star as it goes down

Al-Negm: 53-8:

The concept of exceeding the speed of light and its impact on time is a subject deeply rooted in Einstein's theory of special relativity. This theory posits that the speed of light in a vacuum is a universal constant, a cosmic speed limit that no object with mass can surpass. Consequently, the question of whether velocities greater than the speed of light can diminish time leads us into the realm of theoretical speculation, challenging the very foundations of our understanding of spacetime fabric.

According to special relativity, time dilation occurs as an object's velocity approaches the speed of light. This means that time slows down for the moving object relative to a stationary observer, according to its velocity. Mathematically, Lorentz factor, which governs time dilation approaches infinity, as velocity approaches the speed of light,

implying that: time would essentially stop for an object traveling at the speed of light. Extrapolating beyond this limit, to velocities exceeding the speed of light, leads to paradoxical scenarios. The Lorentz factor becomes imaginary, suggesting that the very fabric of spacetime would be disrupted.

Some interpretations posit the possibility of time travel, but these remain highly speculative and fraught with theoretical challenges, including causality violations. In conclusion, while the mathematical framework of special relativity allows for the theoretical consideration of velocities greater than the speed of light, the implications for time are not expected, instead, they lead to profound paradoxes. These data are essential to figure out how could Prophet Muhammad - peace be upon him- travel during Al-Miraj. المعراج Our master Gabriel, at near the end of the journey, in heavens told Muhammed: "If you

لو تقدمت أنت " " لو تقدمت أنت " " لإحترقت لإحترقت و لو تقدمت أنا " this means that not only the nature of Prophet Muhammad has change (more than the light nature of Gabriel), but also his speed was more than the light speed, actually in this verse دنى can give the meaning of approaching to GOD, then تدلى can give the meaning of breaking, or disruption (the space-time fabric), this can explain how this journey was very short. Another explanation exists in quantum physics, which is Quantum entanglement meaning The occurrence of an instantaneous, actual match between two molecules regardless of the distance in between, This still needs to be understood, still poses a challenge to science & theology. Only GOD knows.

ثُمَّ دَنَا فَتَدَلَّى ﴿٨﴾

Meaning: Then he came near, and hovered around

Al-Negm: 53-46:

Following up on the verse that precedes this one describing that GOD created both male & female. Is gender determination of the baby, whether male or female, mentioned so clearly in the Holy Qur'an?

Indeed, it has recently been proven that the male's semen is responsible for that, and Glory be to God, from a very small cell (sperm) - 3 micro-meters. Human sex determination is a biological process that determines an individual's sex, generally classified as male or female. This process primarily involves genetic, chromosomal, and hormonal factors. Here's a detailed overview: Chromosomal Basis Sex Chromosomes: Humans have 23 pairs of chromosomes, with the 23rd pair being the sex chromosomes. Individuals typically possess: XX: Female XY: Male Fertilization: The sex of the offspring is determined at fertilization, when the sperm (which can carry either an X or a Y chromosome) fertilizes the egg (which always carries an X chromosome). If a sperm carries an X chromosome, the resulting genotype is XX (female). If a sperm carries a Y chromosome, the resulting genotype is XY (male). Gonadal Development Gonads: The sex chromosomes trigger the development of gonads (testes or ovaries). SRY Gene: Located on the Y chromosome, the SRY (Sex determining).

Region Y) gene is crucial for male development. It initiates the formation of testes, which produce male hormones (androgens). Female Development: In the absence of the SRY gene (i.e., in XX individuals), ovaries develop instead, leading to the production of female hormones (estrogens). Hormonal Influence: The hormones produced by the gonads influence the development of secondary sexual characteristics and the overall sex phenotype during puberty. Androgens: Promote male characteristics (e.g., facial hair, deeper voice). Estrogens and Progesterone: Promote female characteristics (e.g., breast development, menstrual cycle). This was simply stated in this verse mainly sex determination, by the father, 14 centuries ago.

﴿٤٦﴾ مِنْ نُّطْفَةٍ إِذَا تُمْنَىٰ

Meaning: He who created the two kinds—the male and the female. From a sperm drop, when emitted.

El-Hadid: 57-3:

Peculiar remark about this verse, as GOD is described as being the first the last (nothing was before GOD) and also, t (nothing will be after GOD). In the same verse another 2 contradictories: the apparent * the concealed. In Islamic architecture that is mainly on the top of the outside walls of the mosque there is this same meaning pattern when you see it can be the:

First * Last - Apparent * Concealed. The one and only & surrounding all around (same pattern in a different verse) GOD has 99 known names among them is: the first, last apparent, concealed, the uppermost, one & only.

In other words, mosque Islamic architecture is pointing to GOD in a very special way. Simply, by looking on top of the walls of a mosque! you can see this symmetrical uniform pattern that surrounds the mosque (also, of GOD names!). Islamic architecture preserved this idea and in fact got much more sophisticated in this aspect by the 9th century A.D., There is an interesting observation regarding how these concepts can be expressed through Islamic architecture, particularly in mosques.

In the architectural decorations adorning the upper surfaces of mosque walls, we find an architectural pattern that reflects these symbolic concepts. These decorations may contain recurring elements, such as shapes representing: "The First" and "the Last," "the Manifest" and "the Hidden." These shapes or patterns are repeated symmetrically around the mosque (but can give in the mean time contradicting meanings), all pointing upwards and conveying the same meanings In other words, if you look closely at one of these programs, you might start counting from it or end counting by the same one; it would be the first or the last. You can also see from the front side or the back side. God Almighty has 99 beautiful names, which include

names that reflect these seemingly contradictory attributes, such as: The First, The Last, The Manifest, The Hidden, The One, The All-Encompassing, The Most High (meaning the One who encompasses all things). In other words, Islamic architecture in mosques points to God in a very distinctive way. The verse in Surah Al-Hadid presents a blend of seemingly contradictory attributes of God Almighty, reflecting His absolute perfection. Islamic architecture symbolically displays these attributes through the decorations and architectural structures that surround the mosque, constantly reminding us that God is the First and the Last, the Manifest and the Hidden, the All-Encompassing. Reflecting on this verse, we find that it leads us to the other beautiful names of GOD, including Al-Mubdi' (The Originator) and Al-Mu'id (The Restorer). The beginning or end of these forms represents cycles in general. From this pattern, we find that God begins creation and then repeats it. Therefore, we find that the cycles of life consist of cycles, such as night and day, sleep and wakefulness. And the changing seasons of the year. Even in biological life, the chrysalis that leads to the butterfly, the cycles of respiration and blood circulation, hibernation in some animals followed by a return to activity, and the cycles of stars, how they age, explode, and become black holes, for example In the fabric of matter, the electron revolves around the nucleus! Even in the cycles of civilization, we find that any civilization flourishes and then declines. In the same context we should think about death itself, as all of these are cycles, the smaller revolving around the larger, and then around the largest again. This points to the fact that the Greatest is GOD, the High above everything else. GOD is the Greatest. From this, we find that our circumambulation of the Kaaba during Hajj and Umrah is an embodiment of this rhythm, because everything is a circumambulating around His divine will.

هُوَ الْأَوَّلُ وَالْآخِرُ وَالظَّاهِرُ وَالْبَاطِنُ ۗ وَهُوَ بِكُلِّ شَيْءٍ عَلِيمٌ ﴿٣١﴾

Meaning: He is the First and the Last, and the Outer and the Inner, and He has knowledge of all things.

It is amazing how this geometric patterns developed to beautiful shapes, giving the same meanings: first, last...apparent, concealed

Al Hadid: 57- 25:

In the same Surah (el-hadid meaning iron) verse 25, there are many puzzles: First, that GOD has sent many messengers to mankind supported by the revelations, so that people can know GOD better and favor justice. Second, the sudden correlation with iron, now we can understand that it is a very stable & heavy element, as described in the verse that it was descended to earth (from heaven- large stars explosion- as it was made outside earth). Third, so that GOD knows who will follow and support him and his messengers.

For the second note; A theory was begun by Fred Hoyle in 1946 with his argument that a collection of very hot nuclei would assemble thermodynamically into iron. Hoyle followed that in 1954 with a paper describing how advanced fusion stages within massive stars would synthesize the elements from carbon to iron in mass. One final note about this verse that it is just at the center of Qur'an, being 114 Surahs and this is 57 (Just in at the core), also if we add basmala (by the name of GOD the most merciful & most compassionate) gives 26 = atomic

number of iron! In a similar way as iron was formed in distant stars & descended to be at the core of earth. The atomic weight of iron is approximately 55.85 atomic mass units. This value is an average that takes into account the natural isotopic distribution of iron on Earth. It is likely to be even higher in distant stars, potentially reaching 57. Iron-56 has a uniquely stable nucleus. Unlike the fusion of lighter elements, the fusion of iron does not release energy; rather, it requires energy input.

Once a star's core is composed primarily of iron, it can no longer generate energy through fusion due to the force of its own gravity. This leads to a supernova. However, much later, through specific interactions, this results in a catastrophic collapse of the core, causing a supernova explosion! More than 14 centuries it could mean simply that GOD put iron on earth, now it is more understood coping very much with the most recent advances in science & astronomy within the same text!

لَقَدْ أَرْسَلْنَا رُسُلَنَا بِالْبَيِّنَاتِ وَأَنْزَلْنَا مَعَهُمُ الْكِتَابَ وَالْمِيزَانَ لِيَقُومَ النَّاسُ بِالْقِسْطِ وَأَنْزَلْنَا
الْحَدِيدَ فِيهِ بَأْسٌ شَدِيدٌ وَمَنْفَعٌ لِلنَّاسِ وَلِيَعْلَمَ اللَّهُ مَنْ يَنْصُرُهُ وَرُسُلَهُ بِالْغَيْبِ إِنَّ اللَّهَ قَوِيٌّ
عَزِيزٌ ﴿٢٥﴾

Meaning: We sent Our messengers with the clear proofs, and We sent down with them the Book and the Balance, that humanity may uphold justice. And We sent down iron, in which is very stable force, and benefits for humanity. That God may know who supports Him and His messengers invisibly.

Al-Hashr: 59-2:

Many Jews flocked to the Arabian Peninsula before Muhammed was born, particularly to Yathrib (now Madinah), because they believed that the Prophet of the End Times would be sent from this region at this time. As they wished that this last Prophet would be one of them. This caused conflict with Muhammad and his followers was evident from the beginning, and this developed into a historical unrest that continues to this day. During the life of the Prophet Muhammad, the conflict began with "those who disbelieved among the People of the Scripture," It was a fierce conflict, as the Jews possessed economic and social power at the time. According to this verse, no one at the time thought they would ever leave their fortresses.

However, GOD Almighty cast terror into their hearts and expelled them from the entire Arabian Peninsula, which is indicated by "the first exodus" This draws attention to several things: First: -That this could have been the first exodus by divine miracle from their place of residence, and consequently, would not have left Egypt after the drowning of Pharaoh (especially since this exodus was based on their falsehood (Exodus) that they considered themselves victorious at the time, so that they can return safely) and that GOD made their homes in Egypt a qibla for them.

Now we can be sure that the so called "exodus" in the Jewish narrative is questionable! Second: Un-ease with Muslims. Third: That they immediately afterward concentrated more in Persia (present-day Iran) and the Levant—the closest geographically. With their social integration at that time, they spread their ideas toward Muslims at that time, and later, which happened as the formation of Karameta and Shiites, being Muslims of different ideology and giving a very bad idea about Islam in general. Fourth: Possibility that this, at that time, led to the outbreak of a major conflict, as what happened in early Islam الفتنة الكبرى

هُوَ الَّذِي أَخْرَجَ الَّذِينَ كَفَرُوا مِنْ أَهْلِ الْكِتَابِ مِنْ دِيَارِهِمْ لِأَوَّلِ الْحَشْرِ مَا ظَنَنْتُمْ أَنْ يَخْرُجُوا
وَضَنُّوا أَنَّهُمْ مَانِعَتُهُمْ حُصُونُهُمْ مِنَ اللَّهِ فَأَتَتْهُمْ اللَّهُ مِنْ حَيْثُ لَمْ يَحْتَسِبُوا وَقَذَفَ فِي قُلُوبِهِمُ
الرُّعْبَ يُخْرِبُونَ بُيُوتَهُمْ بِأَيْدِيهِمْ وَأَيْدَى الْمُؤْمِنِينَ فَاعْتَبِرُوا يَا أُولِيَ الْأَبْصَارِ ﴿٢﴾

Meaning: It is He who evicted those who disbelieved among the People of the Book from their homes at the first mobilization. You did not think they would leave, and they thought their fortresses would protect them from God. But God came at them from where they never expected, and threw terror into their hearts. They wrecked their homes with their own hands, and by the hands of the believers. Therefore, take a lesson, O you who have insight.

El-Saf: 61-14:

This verse signifies that the beginning of the well-known conflict between the forces of good and evil was clearly evident in the killing of one of Adam's sons by another out of envy. The victim was not killed because his wife was beautiful (contrary to Israelite traditions claim), but because of his piety and closeness to GOD in a way that was acceptable by GOD & not to the killer. This is the fundamental source of envy. Immediately after mentioning this first incident in human history, GOD mentions the Children of Israel in Surah Al-Ma'idah, verse 32. Indeed, the historically known incident that followed was the attempt to kill Prophet Idris (also known as Enoch or Osiris in ancient Egyptian civilization).

Shemsu Hor (Followers of Horus) are a semi-mythical, pre-dynastic group in Ancient Egyptian tradition, often associated to the Egyptian deity -Shemsu means "followers" or "retainers"- (specifically, someone who steers a boat) and Hor refers to Horus), Therefore, they are seen as those in the "retinue" of Horus, serving the deity. They acted as intermediaries between humans and higher deities, often serving as attendants to Horus of Nekhen. They appear in the Turin Papyrus immediately before King Menes (or Narmer), suggesting a prehistoric, long-lasting rule that potentially goes back before 6000 BC. Still, according to AI: They are associated with the introduction of civilized arts, such as agriculture, astronomy, and metallurgy. They are considered "light-encoded" guardians of sacred knowledge, such as alchemy and geometry. The Pyramid Texts describe them as those who assist the deceased king on his journey to the afterlife. The Narmer Palette may depict these followers or early, powerful rulers associated with them, according to some interpretations.

The Four Sons of Horus: A more consistent group included Imsety, Hapy, Duamutef, and Qebehsenuef, who protected the canopic jars.
12 Hours/Signs: Some, but not all, ancient depictions show Horus with

12 figures representing the hours of the night, Similarly, this verse clarifies that Jesus asked his disciples, "Who are my helpers in the cause of GOD?" Thus, it becomes clear that the disciples were a group of people who were around Jesus at that time, and they were from the people among whom Jesus lived. Indeed, the disciples responded to this call, which was in keeping with their nature, for they are always supporters of the truth, as evidenced by their statement, "We are the supporters of GOD." And indeed, a group from among the Children of Israel believed with them, while another group disbelieved.

This suggests that the same actions of the Children of Israel and their ease in killing people (which is still evident today in GAZA) have continued since that time, to the point that GOD made the first murderer among them bear a burden equal to that of those who came after him, giving hint that they were involved. Here are several questions:

First: Who are the disciples? In this context and in the preceding verses, some of which we have explained (55 -12,167-7,137-7,73-5,157-4,246-2,43-51,7-43,30-37,37-18,105-31,13-19,107-17,3-17,99-12, 3-53) they are on the same territory, or, the land inhabited by the Israelites and other people, whose presence or traces extend from Abyssinia (remaining traces of King Solomon) to Jerusalem. In this region and within this expanse, the ancient Egyptian Empire was at its peak at this time, and indeed, it extended to this extent.

Chronologically, there are some discrepancies due to the deliberate Jewish distortion of history, and even to conceal their crimes of killing prophets like as possibly John the Baptist. As we mentioned earlier, there was no exodus of the Israelites from Egypt after Moses. This clarifies that: They were in Egypt?!, and the disciples were followers of Horus Actually?! this can only be manifest in Arabic as: In Arabic language حواريين when you want to say followers of HOR you say حواريين which is translated in English to disciples! Those who have always believed in God's messages are also followers of Jesus Christ, and therefore it is not surprising that it is mentioned:

"Blessed be the people of Egypt" Book of Isaiah

يَا أَيُّهَا الَّذِينَ ءَامَنُوا كُونُوا أَنْصَارَ اللَّهِ كَمَا قَالَ عِيسَى ابْنُ مَرْيَمَ لَلْحَوَارِيِّينَ مَنْ أَنْصَارِي إِلَى
اللَّهِ قَالَ الْحَوَارِيُّونَ نَحْنُ أَنْصَارُ اللَّهِ فَثَابَتُوا عَلَيْهِ مِنْ بَنِي إِسْرَءِيلَ وَكَفَرَت طَّائِفَةٌ
فَأَيَّدْنَا الَّذِينَ ءَامَنُوا عَلَىٰ عَدُوِّهِمْ فَأَصْبَحُوا ظَاهِرِينَ ﴿١٤١﴾

Meaning: O you who believe! Be supporters of God, as Jesus son of Mary said to the disciples, “Who are my supporters towards God?” The disciples said, “We are God's supporters.” So a group of the Children of Israel believed, while another group disbelieved. We supported those who believed against their foe, so they became dominant.

El-Tahreem: 66-8:

Does the human body emits light?! Recently surprisingly, The human body was noted to emit a continuous, ultraweak, and invisible light known as biophoton emission. These low-level, spontaneous light particles are by-products of metabolic biochemical reactions and oxidative processes, predominantly within the visible light spectrum. This faint glow is 1,000 times weaker than the human eye's sensitivity.

Key Facts About Human Biophoton Emission, as stated by AI:

- **Source:** The light is produced by metabolic energy changes in cells and is associated with Reactive Oxygen Species (ROS).
- **Detection:** Specialized, highly sensitive charge-coupled device (CCD) cameras are needed to detect and image this emission.
- **Intensity:** The light is invisible to the naked eye.
- **Circadian Rhythm:** Biophoton emission follows a daily rhythm, often peaking in the afternoon and lowest at night, corresponding to metabolic rates.
- **Health Indicators:** Research suggests that this light reflects biological rhythms, and, in some cases, can show asymmetrical, weaker, or stronger emissions associated with illness or stress.
- **Vanishes at Death:** Studies on living organisms have indicated that this emission ceases almost immediately after death.

- ScienceDirect.com ScienceDirect.com +8 Researchers believe that monitoring these emissions holds potential for future non-invasive medical diagnoses, as they reflect the fundamental regulatory functions of the body. Actually, this fact was stated in Qur'an since 14 centuries in many verses as this one To imagine this as discovered very recently, during human life there is very low emission of this energy level, so its not visible to the eye! At death this faint photon emission stops (Is related to the Soul?!) Finally, in hereafter, this light is back again with more intensity between the hands of Believers to a limit that its equivalent to GOD forgiveness, so they ask GOD to more forgiveness in order to complete this light.

يَا أَيُّهَا الَّذِينَ ءَامَنُوا تُوبُوا إِلَى اللَّهِ تَوْبَةً نَّصُوحًا عَسَىٰ رَبُّكُمْ أَن يُكَفِّرَ عَنْكُم سَيِّئَاتِكُمْ وَيُدْخِلَكُم
جَنَّاتٍ تَجْرَىٰ مِنْ تَحْتِهَا الْأَنْهَارُ يَوْمَ لَا يُخْزَىٰ اللَّهُ النَّبِيَّ وَالَّذِينَ ءَامَنُوا مَعَهُ نُورُهُمْ يَسْعَىٰ
بَيْنَ أَيْدِيهِمْ وَبِأَيْمَانِهِمْ يَقُولُونَ رَبَّنَا أَتِمِّمْ لَنَا نُورَنَا وَاعْفُ رَنَا ۖ إِنَّكَ عَلَىٰ كُلِّ شَيْءٍ قَدِيرٌ ﴿٨﴾

Meaning: O you who believe! Repent to God with sincere repentance. Perhaps your Lord will remit your sins, and admit you into gardens beneath which rivers flow, on the Day when God will not disappoint the Prophet and those who believed with him. Their light streaming before them, and to their right, they will say, “Our Lord, complete our light for us, and forgive us; You are capable of all things.

Al-qiyamah: 75-3:

Bone marrow generates stem cells Specifically, bone marrow is the primary site where hematopoietic stem cells (HSCs) are produced. These stem cells are responsible for giving rise to all the different types of blood cells, such as red blood cells, white blood cells, and platelets. In addition to hematopoietic stem cells, bone marrow also contains mesenchymal stem cells, which can differentiate into bone, cartilage, and fat cells. So, bone marrow is indeed a crucial source of various types of stem cells which are highly specific for each body, to the extent that tissue typing is needed for transplantation.

Recently, bone transplantation has been used, for example, in cases of fractures and tumors to replace a missing part of the bone. In organ transplantation science, if the transplant is from the same body (autologous graft), it is accepted easily and without the need for immuno-suppressants - meaning that the body knows itself and all its cells.

Bone marrow stem cells. bone transplantation Accordingly, in the resurrection, GOD swears that He will collect the same bones for every human being to form the same human being again, assuring individuality during life and in the afterlife.

أَيَحْسَبُ الْإِنْسَانُ أَلَّن نَّجْمَعَ عِظَامَهُ ﴿٣﴾

Meaning: Does man think that We will not reassemble his bones?

Al- qiyamah: 75-4:

To assure what is in the previous verse, GOD gave another example by the arrangement of phalanges, which are the tips of the fingers, being specific to every human soul, and the evidence is that they contain fingerprints, and it can be understood from it that the human structure at the time of resurrection is specific to the each human soul,

just as it has a fingerprint. The same individual, soul & cognition.
Scheme to our journey:

Creation ----->Our oath to GOD----> blank period----> birth & our
existing life --> death -----> Day of Judgement -----
-----> Eternity.

Its evident that our existing life is the shortest.

بَلَىٰ قَادِرِينَ عَلَىٰ أَنْ نُسَوِّيَ بَنَانَهُ ﴿٤﴾

Meaning: Yes indeed; We are Able to reconstruct his fingertips.

Al-mursalat: 77-25:

In this verse there can be a direct link to gravity! Actually it is a very short Aya that states that GOD has made earth a bond or a cuff to all creatures upon. in other words all those who are related to earth are attached to it! In a way this is what Isaac newton stated upon gravity discovery, but this was stated in a soft way that was acceptable, even with this new meaning, since 14 centuries! One last thing that the word "cuff" in English can be derived from this Arabic word "كفات"

أَلَمْ نَجْعَلِ الْأَرْضَ كِفَاتًا ﴿٢٥﴾

Meaning: Did We not make the earth a homestead?

Al- nazeaat: 79- 31:

The presence of abundant liquid water distinguishes Earth from other rocky planets in our solar system and is fundamentally linked to the origin and evolution of life. However, the precise source of this essential resource remains a subject of ongoing scientific debate. One, relatively inconvenient hypothesis posits that water was delivered to early Earth through the bombardment of volatile-rich asteroids and comets from the outer solar system. Deuterium-to-hydrogen ratios in some carbonaceous chondrites, a type of meteorite, closely resemble that of Earth's oceans, suggesting a possible link. However, other studies have found discrepancies, casting doubt on this singular explanation.

Another compelling theory suggests that at least a portion of Earth's water originated within the planet itself during its formation. abundant liquid water distinguishes Earth from other rocky planets Hydrogen, incorporated into the planet's building blocks, could have combined with oxygen released from the mantle through volcanic activity, eventually condensing into oceans over geological timescales. Deciphering the relative contributions of each source requires further investigation, utilizing advanced isotopic analysis of both terrestrial and extraterrestrial materials.

Actually, what GOD is telling us in this verse is that the Earth's water and grazing, originates from Earth. this was a subject of debate. Grazing here can have various interpretations. As was previously understood, mainly for cattle, but now with its natural resources weather elements or energy sources as coal or petroleum it is mainly for us! This is a typical verse that can be understood by a bedewin 14 centuries ago, as well as a 21st century scientist, in the same context!!

أَخْرَجَ مِنْهَا مَاءَهَا وَمَرْعَاهَا ﴿٣١﴾

Meaning: And from it, He produced its water and its pasture.

Al-Takweer: 81-2:

The question of whether the universe's expansion can be halted and reversed, leading to a collapse, is a central topic in cosmology. Current understanding, primarily based on observations of Type Ia supernovae, the cosmic microwave background, and baryon acoustic oscillations, suggests an accelerating expansion driven by a mysterious force known as dark energy. The possibility of a future collapse, often referred to as a "Big Crunch," depends critically on the nature and evolution of dark energy.

If dark energy is a cosmological constant, its density remains constant over time, and the universe's expansion will likely continue indefinitely, preventing a collapse. However, if dark energy's density decreases over time or even becomes negative, a turnaround in expansion becomes theoretically plausible. Furthermore, the total amount of matter and energy in the universe plays a crucial role. Big Crunch Sufficiently high matter density could, in principle, exert enough gravitational attraction to overcome the outward pressure of dark energy.

In conclusion, while a collapse of the universe remains theoretically possible depending on the future behavior of dark energy and the overall density of the universe, current observational evidence strongly favors continued expansion and makes a future Big Crunch scenario seems questionable? However, GOD in this verse is stating that it will happen. The way to do this is also stated by giving a hint for the lifecycle of planets and stars. The stars will die, their light will vanish, turning into black holes, as in the verse, this will happen to all the stars leading to the big Crunch on The Judgement Day! It is astonishing that all this information was told by Mohamed in the last 14 centuries! Since, all this is supported by recent evidence, this means that we should prepare for what is coming by obeying GOD commands.

وَإِذَا النُّجُومُ انْكَدَرَتْ ﴿٢﴾

Meaning: When the sun is rolled up.

Al-Takweer: 81-16:

In this short verse GOD is stating about something that is spinning or moving that sweeps the surroundings or very unstable!! The prevailing belief is that black holes which have enormous gravitational force, sweep everything around them in space. It is also possible for this to apply to the Higgs boson particles, which give mass to things and which has been mathematically proven that it can disappear because it is 126 megaelectron volts and is assumed to be in a steady state of 127 mev? Considering that Surah Al-Takweer talks about the scenes of the Day of Resurrection, However, small or large scales examples it applies! Is it something grave that will happen?

الْجَوَارِ الْكُنُسِ ﴿١٦﴾

Meaning: Precisely running their courses.

After a 40-year search, a subatomic particle with the expected properties was discovered in 2012 by the ATLAS and CMS experiments at the Large Hadron Collider (LHC) at CERN near Geneva, Switzerland. The new particle was subsequently confirmed to match the expected properties of a Higgs boson. Amazing that the examples given to this verse are either to very minute on earth

particles, or, to very remote in universe phenomena, though still not fully discovered. Physicists, two of the three teams, Peter Higgs and François Englert, were awarded the Nobel Prize in Physics in 2013 for their theoretical predictions. Although Higgs's name has come to be associated with this theory, several researchers between about 1960 and 1972 independently developed different parts of it. On the other hand, the behavior of a black hole, as it can devour a bypassing star.

1. A normal star passes near a supermassive black hole in the center of a galaxy.
2. The star's outer gasses are pulled into the black hole's gravitational field.
3. The star is shredded as tidal forces pull it apart.
4. The stellar remnants are pulled into a donut-shaped ring around the black hole, and will eventually fall into the black hole, unleashing a tremendous amount of light and high-energy radiation. It's been proven that, if 2 neutrons collide Higgs-Boson particles will erupt. In the Standard Model, the Higgs particle is a massive scalar boson with zero spin, even (positive) parity, no electric charge, and no colour charge that couples to (interacts with) mass. It is also very unstable, decaying into other particles almost immediately upon generation.

After a 40-year search, a subatomic particle with the expected properties was discovered in 2012 by the ATLAS and CMS experiments at the Large Hadron Collider (LHC) at CERN near Geneva, Switzerland. The new particle was subsequently confirmed to match the expected properties of a Higgs boson. Amazing that the examples given to this verse are either to very minute on earth particles, or, to very remote in universe phenomena, though still not fully discovered.

Ordinary matter (observable) is only 5% of the universe!

El-Tareq: 86-1:

This verse can be an example of the various human interpretation for the given text. Many centuries ago, The shooting star was considered a puzzling miracle over the course of time. The shooting star was first noticed as a meteoroid which is a small rocky or metallic body in outer space. Meteoroids are distinguished as objects significantly smaller than asteroids, ranging in size from grains to objects up to a meter wide. Objects smaller than meteoroids are classified as micrometeoroids or space dust. Many are fragments from comets or asteroids, whereas others are collision impact debris ejected from bodies such as the Moon or Mars. A meteor or shooting star is the visible passage of a meteoroid, comet, or asteroid entering Earth's atmosphere. At a speed typically in excess of 20 km/s (72,000 km/h; 45,000 mph).

Later, Depending on the definition of a high-velocity star, is a star moving faster than 65 km/s to 100 km/s relative to the average motion of the other stars in the star's neighborhood. The velocity is also sometimes defined as supersonic relative to the surrounding interstellar medium. The three types of high velocity stars are: runaway stars, halo stars and hypervelocity stars, a specific star in the sky that has a unique property.

Of course, this was not known 14 centuries ago because some stars during their life cycle die, their volume shrinks, and their density increases. Some of them emit successive knocking sounds, and so it was later called the piercing star or pulsar as if it pierces a hole. The silence of the sky, or its rays piercing what surrounds it (knocking).

وَالسَّمَاءِ وَالطَّارِقِ ﴿٨٦﴾

Meaning: By the sky and at-Tariq.

Al-Tareq: 86-11:

Surah Al-Tariq in general is one of the surahs that represents a scientific and practical challenge. There can be numerous miracles if one thinks thoroughly about this verse. As GOD swears by what or how the sky returns! Recently parts of this return can be known: It has two major parts:

The first is that it protects the Earth from outer space, by meteors, or it protects the Earth from meteors that burn when they enter the atmosphere, also, the atmosphere protects the ozone from ultraviolet rays and many other cosmic rays.

The second part, the return from the earth's atmosphere. (or reflection by specific layers in the atmosphere): It could be:

- The sound echo return back to earth.
- Water vapor return back to earth after cloud condensation, in the form of rain.
- Magnetic return, which guides the compass direction.
- Return radio waves in a different wavelength in radio or television.
- Thermal return of sunlight heat: acquired during the day by rocks and warmed at night.
- Dust returns are like what the wind carries, whether dust to kill microbes, as in a dust storm, or pollinate some plants to fertilize it.
- The return of some cosmic rays, which were monitored by giant telescopes and helped determine the expansion of the universe (regarded as non-harmful).
- Return to the ionosphere, the ions return, as in Harp project or the Tesla model.

The most important moral meaning of return is in supplication - return with livelihood, meaning that GOD grants to supplication is better than all other forms of response.

Another meaning for the return can be our return to our creator, GOD.

وَالسَّمَاءِ ذَاتِ الرَّجْعِ ﴿١١﴾

Meaning: By the sky that returns.

Al-Tareq: 86-12:

About 17 tectonic plates were found in the Earth's crust, which makes up the Earth's surface, but they are connected to each other through a single crack. This discovery was not known until very recently. In this verse it has been mentioned for more than 14 centuries! Interaction between these plates can result in formation of continents, volcanos, mountains, tsunamis and earthquakes! GOD swears by this crack in this verse, now we can understand its effect on mankind. Tectonic plates have a profound impact on Earth's geological and environmental systems. Here are some key effects of tectonic plate movements:

1. **Earthquakes Causes:** The movement of tectonic plates can create stress along faults, leading to sudden releases of energy in the form of earthquakes. Impact: Earthquakes can cause significant damage to infrastructure, loss of life, and changes in landscape.
2. **Volcanic Activity Subduction Zones:** When one plate slides beneath another, it's often associated with volcanic activity. This can lead to the formation of volcanoes and volcanic islands.

3. **Hotspots:** Some volcanoes form over mantle plumes, creating islands like those in Hawaii.
4. **Mountain Formation Collisional Boundaries:** When plates collide, they can push up the Earth's crust, forming mountain ranges (e.g., the Himalayas from the collision of the Indian and Eurasian plates).
5. **Oceanic and Continental Features Mid-Ocean Ridges:** Divergent boundaries where plates separate create new oceanic crust, leading to features like the Mid-Atlantic Ridge. **Rift Valleys:** Continental rifting can create valleys and new ocean basins
6. **Climate Influence Long-Term Effects:** The movement of tectonic plates can influence global climate patterns by altering ocean currents and atmospheric circulation over geological time scales.
7. **Natural Resources Minerals and Fossil Fuels:** Tectonic activity can lead to the concentration of minerals and fossil fuels, influencing economic resources.
8. **Landform Changes Erosion and Sedimentation:** The uplift and subsidence of land can affect erosion patterns and sediment deposition, influencing ecosystems and human activity.
9. **Biodiversity Habitat Creation:** Changes in landforms and climates can create new habitats or isolate populations, leading to speciation or extinction.

وَالْأَرْضِ ذَاتِ الصَّدْعِ ۝١٢

Meaning: And the earth that cracks open.

Al-Tareq: 86-13:

In the entire of this surah GOD clarifies the goal and moral of creation.

By Starting to swear by a falling star or a pulsar to the creation of mankind (how just semen can develop to a grown human being), that similarly will be resurrected. Similarly, by sky returns or the earths crack, then comes to the main verse issue: a decisive matter! The

following verse (86-14) gives even more emphasis that this not for amusement! The aim of creation is crucial to us, as accordingly we'll be in paradise or hell, ! This exact aim is known to GOD, we don't have to fully understand it, but only respond to our grave fate. Regarding contemplation of this Surah, one should be righteous and follows the clear demarcation between right or wrong.

إِنَّهُ لَقَوْلٌ فَصْلٌ ﴿١٣﴾

Meaning: It is a Decisive Word.

Al-A'la: 87-5:

Following the preceding verse 87-4 denoting that green leaves are created by GOD for the benefit of mankind. Then the transformation of green tree waste and decomposition over eras into a black product such as coal or petroleum?! Coal formation is a complex geological process that occurs over millions of years, primarily involving the transformation of plant material into coal. Here's an overview of how this process typically works, especially concerning trees.

1. **Plant Accumulation:** Coal begins with the accumulation of plant material, predominantly from trees and other vegetation in swampy, low-lying areas. Fallen leaves, branches, and entire trees contribute to a dense layer of organic material.
2. **Peat Formation:** Over time, this organic material becomes buried under sediment (such as mud and sand). The lack of oxygen in these swampy environments slows down the decomposition process, leading to the formation of peat. Peat is the initial stage of coal formation and is made up of partially decayed plant matter.
3. **Burial and Compaction:** As more sediment accumulates above the peat layer, the pressure and temperature increase. This compaction drives off water and volatile compounds from the peat, causing it to transform chemically and physically.
4. **Coalification:** The process of coalification occurs in several stages, leading to different types of coal: Lignite: The first stage, still containing significant moisture and not very energy-dense. Sub-bituminous coal: More carbon is present; the energy content increases. Bituminous coal: Higher carbon content with less moisture, commonly used for electricity generation and steel production. Anthracite: The highest rank of coal, with the highest carbon content and efficiency as a fuel.

5. **Geological changes:** Over millions of years, geological processes such as tectonic activity can further manipulate coal deposits, pushing them deeper and altering their characteristics.

Geological changes:

To Summarize The transformation from is a natural process involving several stages of decay, compaction, and chemical transformation. The right conditions, such as low oxygen levels and high pressure, are crucial for this process to occur. This is an actual miracle to denote this process 1400 years ago!

فَجَعَلَهُ عُتَاءً أَحْوَى ﴿٥﴾

Meaning: And then turns it into black stubble.

Al-Ghashia: 88-17:

There is a command to study, then you can admire Camel. A camel can gallop 100 liters of water in 10 minutes, unlike most mammals which will suffer water toxicity if they do so, thanks for their red blood cells which are oval not round as in other mammals this can allow them to take more water to swell Their humps can store fat not water as 1 gm of fat can produce more energy than 1 gm of water, they can travel for many days without drinking as their kidneys are so efficient producing thick concentrated urine, though their urine can be used as fuel!! osmo-regulation. Survival chemistry on foot in the middle of the desert heat. In the desert they don't sweat like us due to adaptive thermo-regulation by day body temperature can rise to 41.7 degrees by night can drop to 34 degrees this adaptation can avoid sweating & save water. Their nostrils are a real miracle as it closes during sandstorms but inside is high efficiency recycler that can keep water droplets from water vapor! All this can make us think of how GOD capabilities are perfectly designed to meet our needs, accordingly, evaluate this and to follow GOD's rules to show gratitude.

أَفَلَا يَنْظُرُونَ إِلَى الْإِبِلِ كَيْفَ خُلِقَتْ ﴿١٧﴾

Meaning: Do they not look at the camels—how they are created?

Al-Ghashia: 88-20:

The Earth's atmosphere contains the phenomenon of night and day, and God Almighty explains that the night as if its its a ball creeping over the day and that the same process is repeated again by the day over the night, this is evidence of the The sun and moon have a role in that, in addition to the fact that they are evidence of everything in the universe that is in constant motion and occurs for a specified and decreed time.

The earth rotation around its axis makes it rather oval than spherical, relevant at the equator. However, the Earth can look flat for us, such that in large parts of it appears to be flat, no wonder that GOD swears by how it appeared to be flat for mankind. If one stands at a certain point will see the horizon, upon moving towards it, there can be another horizon. Similarly, at the seashore, for example, bring a straight ruler and placed it along the sea horizon, you will find it as if it is a diagonal of a circle formed by the sea horizon. Earth, which has high temperatures and molten materials inside it, then, Glory be to God, it appears after all that to be flat, cold and paved for human living.

وَالْأَرْضِ كَيْفَ سُطِحَتْ ﴿٢٠﴾

Meaning: And at the earth—how it is spread out?

Al-shams: 91-3:

Sunlight interacts with the Earth's atmosphere in several fascinating ways, influencing both our weather and the appearance of our planet from space. Here are the key concepts:

1. **Sunlight Propagation Speed and Medium:** Sunlight travels as electromagnetic radiation and reaches Earth in about 8 minutes. This light consists of various wavelengths, including visible light, ultraviolet, and infrared. **Spectrum:** The solar spectrum largely consists of visible light, which is essential for photosynthesis and supports life.
2. **Atmospheric Interaction Scattering:** When sunlight passes through the atmosphere, it scatters due to molecules and small particles. This scattering causes the blue color of the sky (Rayleigh scattering) and reddish hues during sunrise and sunset (Mie scattering).
3. **Refraction:** Light bends when it passes through different layers of the atmosphere, contributing to phenomena like rainbows and the distortion of objects at the horizon.
4. **Glazing Effect Reflections and Glare:** Sunlight can create glare off surfaces like water or ice, which can affect visibility. This is especially pronounced in space, where the lack of atmosphere allows for direct, intense sunlight without diffusion.
5. **Heat Absorption:** The atmosphere absorbs some solar radiation, leading to warming effects. This greenhouse effect is crucial for sustaining life on Earth.
6. **Appearance from Space Earth's Illumination:** From space, the Earth appears bright due to sunlight reflecting off clouds, water, and landforms. The atmosphere also creates a halo effect around the planet.

7. **Weather Patterns:** The dynamic processes driven by sunlight, such as cloud formation and storms, are visible from space, revealing the planet's weather systems.
8. **Impact on Life** Sunlight is vital for ecosystems, regulating climates and enabling photosynthesis in plants. The balance of sunlight entering the atmosphere influences global temperatures and weather patterns.

During the summer, the Earth's temperature increases due to the relative proximity to the sun of one hemisphere rather than the other. This is followed by an increase in the evaporation of water from seas and oceans, and we actually feel the sun's glow increasing, as if its degree of brightness is greater (glaze), but this is due to the increase in humidity or water vapor in the air.

Which in turn helps in the reflection and glow of the sun's rays, and thus making them clear in the verse highlights that despite the darkness of the universe, the degree of clarity of daylight near the Earth surface increases, up to a slight height of about 10,000 kilometers from the surface of the Earth, compared to the distance from the Earth to the sun - about 150 million kilometers, which is dark! Layers of atmosphere affecting this phenomena:

- troposphere (surface to ~ 12 km),
- stratosphere (~ 12 km to ~ 50 km),
- mesosphere (~ 50 km to ~ 80 km),
- thermosphere (~ 80 km to 700 km), and exosphere (~ 700 km to 10, 000 km.)

وَالنَّهَارِ إِذَا تَجَلَّىٰهَا ﴿٣﴾

Meaning: And the day as it reveals it.

Photo revealing: Narrow band of Sunlight glow in atmosphere as compared to the wide dark space.

The solar effect on water evaporation and sunshine & The Greenhouse effect.

Al-Doha: 93-11:

This verse is commonly misinterpreted by Islam scholars. It's simple description (in most books) is that one should be talking much about the blessings granted to him by GOD, mostly for rich people. If we follow the Surah, it shows how a poor person gets rich by GOD would in return shouldn't let down the poor and orphans, means you should change your behavior towards the poor. In Arabic Linguistics: if the desired meaning is just to talk about your wealth it would have been (talk about = **عن**), but here it can mean (react according to = **ب**) In the same way here (**حدث**) here doesn't mean talk but means to react, meaning change your behavior towards people in need by donations as much as possible.

وَأَمَّا بِنِعْمَةِ رَبِّكَ فَحَدِّثْ ﴿١١﴾

Meaning: But proclaim the blessings of your Lord.

El-teen: 95-2:

Historically, there is disagreement among historians about the origin of the word "Sinai." Some have stated that it means "stone" due to the abundance of its mountains, while others have stated that its name in ancient hieroglyphics was "Tushrit," meaning the land of barrenness and desolation. It was known in the Torah as "Horeb," meaning desolation. In the pre-Christian era, Sinai was referred to as "Khast Mefekat" and sometimes "Domfekat," meaning (the terraces of turquoise). Mefekat was the name used for Sainai peninsula in Egypt at Moses time. Turquoise, a light blue gemstone with a greenish tint, was extracted from it and was used in jewelry by the ancient Egyptians.

Turquoise is an opaque, blue-to-green mineral that is a hydrous phosphate of copper and aluminium, with the chemical formula $\text{CuAl}_6(\text{PO}_4)_4(\text{OH})_8 \cdot 4\text{H}_2\text{O}$. It is rare and valuable in finer grades and has been prized as a gemstone for millennia due to its hue. Because the Sinai Peninsula was the main region where mining of turquoise was carried out in Ancient Egypt, it was called Biau (the "Mining Country") and Khetiu Mafkat ("Ladders of Turquoise") by the ancient Egyptians.

The point is that the name Sinai (or Sinin) was not common during the ancient Egyptian period, and also that it did not have fruit trees, as the meaning suggests. On the other hand, in Abyssinia (Ethiopia), we find numerous derivatives of mountain names in the same region and with the same Quranic text, "Seneen," which is near Erta Ale - the glowing mountain - where GOD Almighty spoke to our master Moses, as we mentioned previously. Is this is the mountain referred to in this verse? Mean-while is included with the land planted with figs and olives (Egypt and the Levant), in addition to the Hijaz, among the places by which GOD Almighty swore as blessed places?

وَطُورِ سَيْنِينَ ﴿٢﴾

Meaning: And Mount Sinai.

El-Alaq: 96-8:

This verse is both frightening and reassuring, depending on your deeds in this world. It's strange that there are still those who don't believe in a Creator. It's like someone who eats a delicious meal but doesn't believe in a skilled cook, who actually, made the recipe!

Doctors, especially intensive care physicians, have noticed a strange and recurring phrase in some patients before death and during periods of slight improvement. The person who will die in the next few days usually says: "I want to go home."

Does this refer to his earthly home because he fears his fate in the afterlife? Or does it mean he knows he is approaching GOD and this is his final destination. after passing by the day of Judgment then to eternity either in hell or paradise. Unavoidable destiny!

We can conclude that:

'Life is a brief but decisive period within a long journey leading to eternity!'

﴿إِنَّ إِلَىٰ رَبِّكَ أَلْرُّجَعَىٰ﴾ ٨

Meaning: But to your Lord is the return.
