CHAPTER-A

Fortune telling

Since ancient times humans have been eager to predict the events of the future. There are many methods for predicting the events of the future. The main methods followed are as under:

- 1- Astrology
- 2- Palmistry
- 3- Numerology
- 4- Tarot Cards
- 5- Intuition
- 6- Tantras, Mantras, Yantras etc.

Astrology- Studying the effects of Heavenly bodies on human beings, on Earth.

To study Astrology, one should know the following subjects:

- 1- Basic knowledge of Astronomy required for Astrology.
- 2- Astronomical data required for Astrology.
- 3- Elementary knowledge for analysis of Horoscopes.
- 4- Astrological remedies.
- 5- Basic knowledge of Spirituality.

History of Astronomy and Astrology:

1. 35000 BCE- Tracking the Moon phases in Africa and Europe.
2. 8000 BCE- Warren Field Scotland U.K. The oldest lunar calendar.
3. 4900 BCE - Goseck Circle, Germany. Oldest Solar observation in the world.
4. 2000 to 1600 BCE – Nebra Sky disc, Germany. May be an astronomical instrument, 30 cm dia. and 2.2 kg weight.
5. 1900 to 700 BCE- Kokino Observatory (Serbian border). Used to track movement of the Sun and Moon.
6. 1800 to 1400 BCE- Golden hats of Germany, France and Switzerland. Probably a kind of calendar.
7. 2334 to 2279 BCE- Venus tables of Ammisaduqua. Astronomical observation of Venus for 21 years. During the reign of King Sargon of Akkad.
8. 1950 to 1651 BCE- Oldest evidence of the use of astrology from the first dynasty of Mesopotamia.

- 9.3-05-1375 BCE- First recorded full solar eclipse was seen by Babylon peoples.
- 10.Astronomy was the need to develop an accurate calendar for agricultural reasons.
- 11.130 BCE- Discovery of the Precession of the Equinoxes by Hipparchus (Greek astronomer). In 120 AD, Ptolemy (Roman astronomer) was aware of its effect.
- 12.Heliocentrism- Sun as centre of the World.
- 13.Geo-centrism- Earth as the centre of the World.
- 14.700 to 600 BCE- Vedanga Jyotisha by Lagadha. Rules for tracking the motion of the Sun and Moon in context of a five years intercalation cycle. First mathematical work on Astronomy in India based on Mesopotamian astrological sources.
- 15.149-150 CE- Yavanajataka (sayings of the Greeks), oldest astrological treatise in Sanskrit. In Greek it was written in 120 BCE.
- 16.Romaka Siddhanta is one of the five siddhantas mentioned in Varahamihira's Pancha sidhantika. It is based on the astronomical learning of Byzantine Rome. This work is based on the tropical system.
- 17.476 to 550 CE- Aryabhata, work in astronomy.
- 18.505 to 587 CE- Varahamihira, work in astronomy and astrology.
- 19.598 to 665 CE- Brahmagupta, work in astronomy.
- 20.600 to 685 CE- Bhaskara(I), work in astronomy.

Basic knowledge of Astronomy needed for Astrology:

The following information of astronomy is required for astrological calculations. Astronomy is the basis of astrology:

1. Zodiac Signs (12 numbers) (Figure-1).
2. Constellations (27 numbers), Nakshatras.
3. Heavenly bodies (7 numbers), Planets.
4. Nirayana (Sidereal) system.
5. Ayanamsa (Precession of the Earth).
6. Rahu and Ketu (Shadow Planets).
7. Solar system (Figure-2).
8. Geo-centrism- Earth as the centre of the World (Figure-3).
9. Star Spica (Chitra Nakshatra) in Virgo constellation (Figure-5).

A-12 numbers of Zodiac signs are:

1. Aries
2. Taurus

3. Gemini
4. Cancer
5. Leo
6. Virgo
7. Libra
8. Scorpio
9. Sagittarius
10. Capricorn
11. Aquarius
12. Pisces

B- 27 numbers Constellations (Nakshatras):

There are 88 numbers of officially recognised constellations (nakshatras) in space. But in astrology, one nakshatra is $13^{\circ}-20'$ movement of the Moon around the Earth. In one revolution (360°) of the Moon around the Earth comes 27 numbers of nakshatras. Which are followings:

1-Ashwini	2-Bharani	3-Krittika
4-Rohini	5-Mrigashira	6-Ardra
7-Punarvasu	8-Pusha	9-Ashlesha
10-Magha	11-Purva Phalguni	12-Uttara Phalguni
13-Hasta	14-Chitra	15-Swati
16-Vishakha	17-Anuradha	18-Jyeshtha
19-Mula	20-Purva Shadha	21-Uttara Shadha
22-Shravana	23-Dhanishta	24-Shatabhisha
25-Purva Bhadra	26-Uttara Bhadra	27-Ravati

One nakshatra is $13^{\circ}-20'$ or $800'$, 27 numbers of nakshatras are $27 \times 800 = 21600'$ or 360° . One revolution of the Moon around the Earth.

C- Heavenly Bodies:

1. Sun
2. Moon
3. Mars
4. Mercury
5. Jupiter
6. Venus

7. Saturn
8. Rahu – Shadow Planet.
9. Ketu – Shadow Planet.

D- Ecliptic- The plane of the Earth's orbit around the Sun (Figure-4).

E- Ayanamsa- The angular difference between the Vernal equinoctial (Spring equinox) and sidereal zodiac is known as Ayanamsa (Figure-6).

F- Sidereal (Nirayana) Zodiac is moving with respect to Earth (Figure-6).

G- Tropical (Sayana) Zodiac is fixed with respect to Earth.

H- Vernal / Autumn Equinoctial (Equinox)- The time when the Sun crosses the plane of the Earth's equator (21st March Vernal or Spring equinox and 22nd September Autumn equinox).

I- Paksha- The word paksha refers to the exact opposite position from a fixed star (180° opposite).

J- Celestial Equator- The extension of the Earth's equator into space (celestial hemisphere).

K- Aries 0°- Opposite to the star Spica 180° (Chitra nakshatra) in Virgo constellation is the 0°-Aries (Figure-5).

L- The Moon orbital plane- This plane is inclined by about 5.1° (4.99° to 5.3°) with respect to the Ecliptic plane (Figure-10).

M- Precession- The Earth precession is a slow wobble of its rotational axis, much like a spinning top. The rotational axis is rotating clockwise (north pole of the Earth is up). Earth is rotating around its own axis anti-clockwise (north pole of the Earth is up) (Figure-9).

N- Rate of Precession- The present rate of precession is around 50" (50 seconds) per year. A complete cycle around the zodiac is 26000 years (approx.). The Sun's and the Moon's gravity is the cause of the Earth's changing angle.

O- Due to precession- Sidereal (Nirayana) Zodiac is moving around 1.4° per century.

P- Angles of Planets and Ascendant- For calculating angles of planets, the line between star Spica and 0°-Aries passes through the centre of the Earth (Figure-7). For calculating Ascendant degrees this line passes through the birth place of the child (Figure-8, 20 and 21).

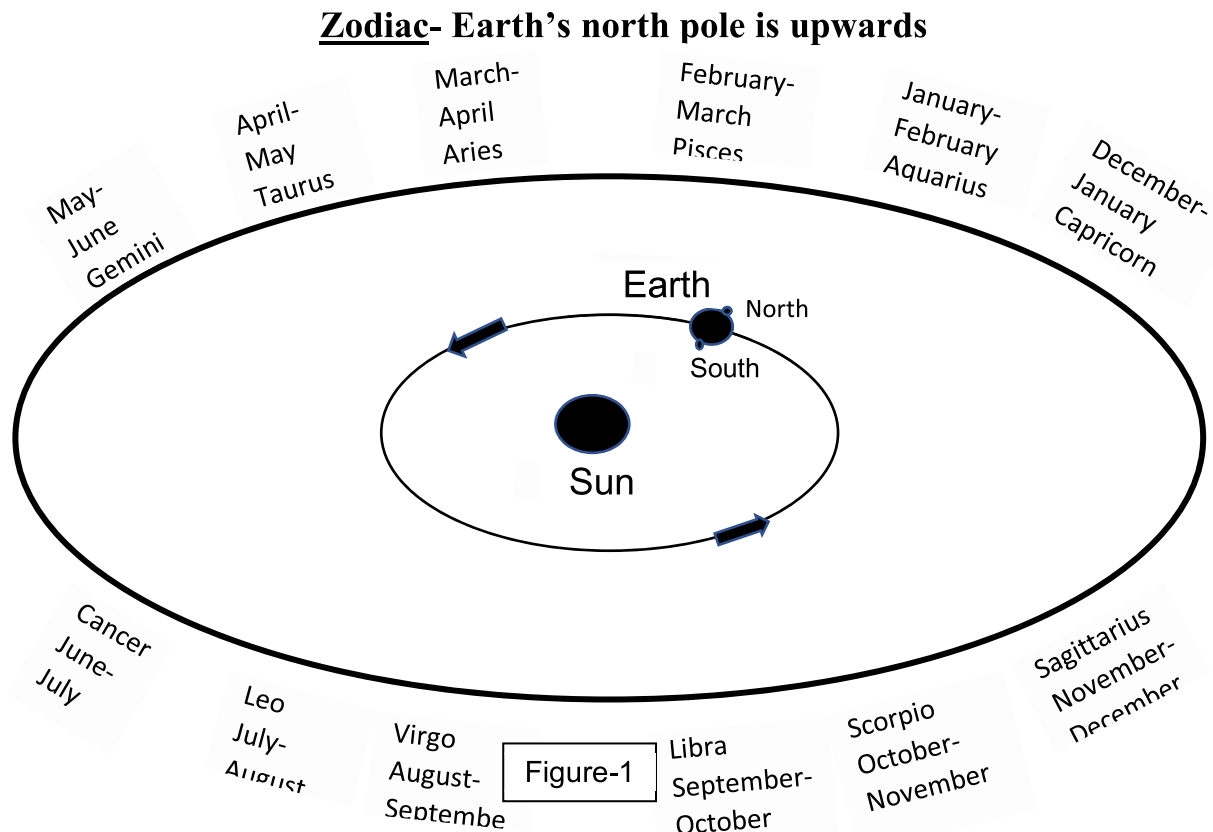

Q- Rahu and Ketu (Figure-10)-

1-North node Rahu-Point on Ecliptic plane, when the Moon while revolving around the Earth passes through the ecliptic plane towards the Northern Hemisphere of the Earth.

- 2-**South node Ketu**-Point on Ecliptic plane, when the Moon while revolving around the Earth passes through the ecliptic plane towards the Southern Hemisphere of the Earth.
- 3-When viewed from the celestial North of the Earth, the nodes rotate clockwise around the Earth, opposite to the Earth's own spin and its revolution around the Sun. The line of nodes rotates with a period of 18.6 years, one revolution or 19.5° per year.
- 4-**Eclipse** occurs on the Earth, when the Sun, Moon, Earth, Rahu and Ketu line up.
- 5-Astrologers use two calculations for Rahu (North lunar node). Mean Rahu (average speed) and True Rahu (actual real time position).

Mean Rahu is a smooth average of its motion. Mean Rahu is always in retrograde (backward) motion.

True Rahu represents its actual observed position. True Rahu motion is not perfectly smooth on a retrograde path, it wobbles and can shift direction temporarily. True Rahu have periods of direct (forward) motion and become stationary (stand still) also. True Rahu direct (forward) motion periods can occur 2-4 times a year and may last for a few days (typically 15-25 days per year). True Rahu can also become stationary or appear to stand still, especially near eclipses lasting up to 5-10 days.

Solar System:

Heliocentrism- Sun as the centre of the World. Earth's north pole is upwards.
Moon-Mon/ Mercury-Mec/ Venus-Ven/ Earth / Mars-Mar/ Jupiter-Jup/
Saturn-Sat

Geo-centrism- Earth as the centre of the World. Earth's north pole is upwards. Moon-

Earth:

Zodiac and Earth:

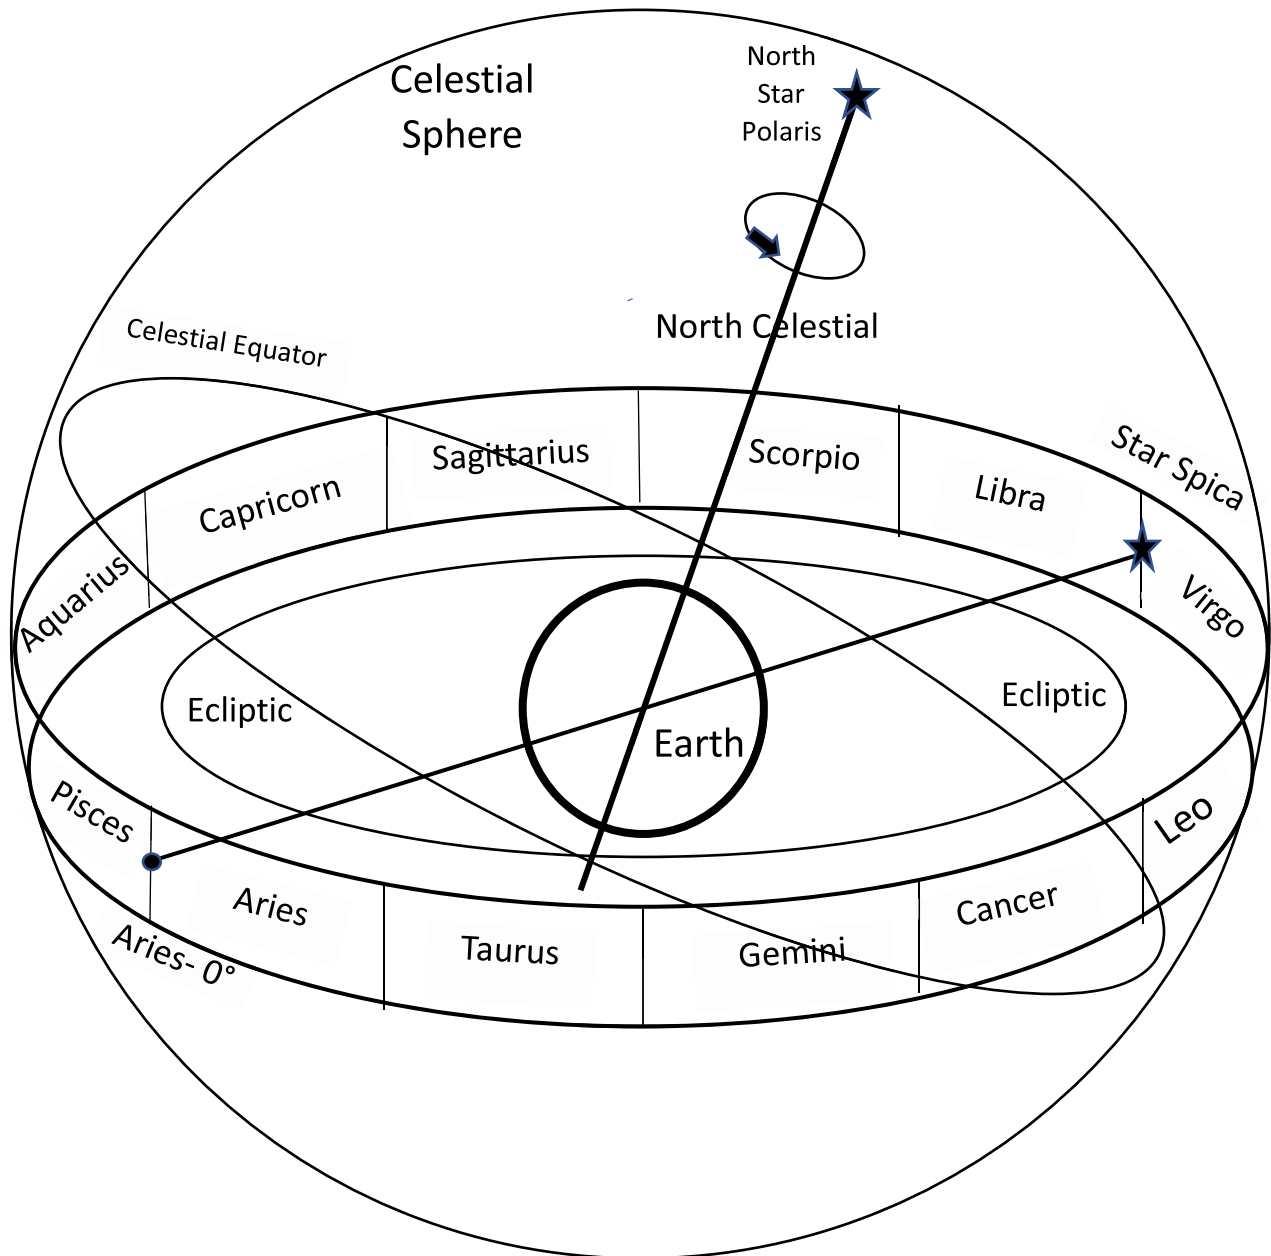

Figure-5

Ayanamsa- Tropical (Sayana) Zodiac is fixed. Due to precession of Earth, Sidereal (Nirayana) Zodiac is moving anti-clockwise around 50'' per year (1.4° per century). Angular difference between 0°-Aries of the Tropical Zodiac and 0°-Aries of the Sidereal Zodiac is Ayanamsa. With the passage of time, degrees of Ayanamsa are increasing.

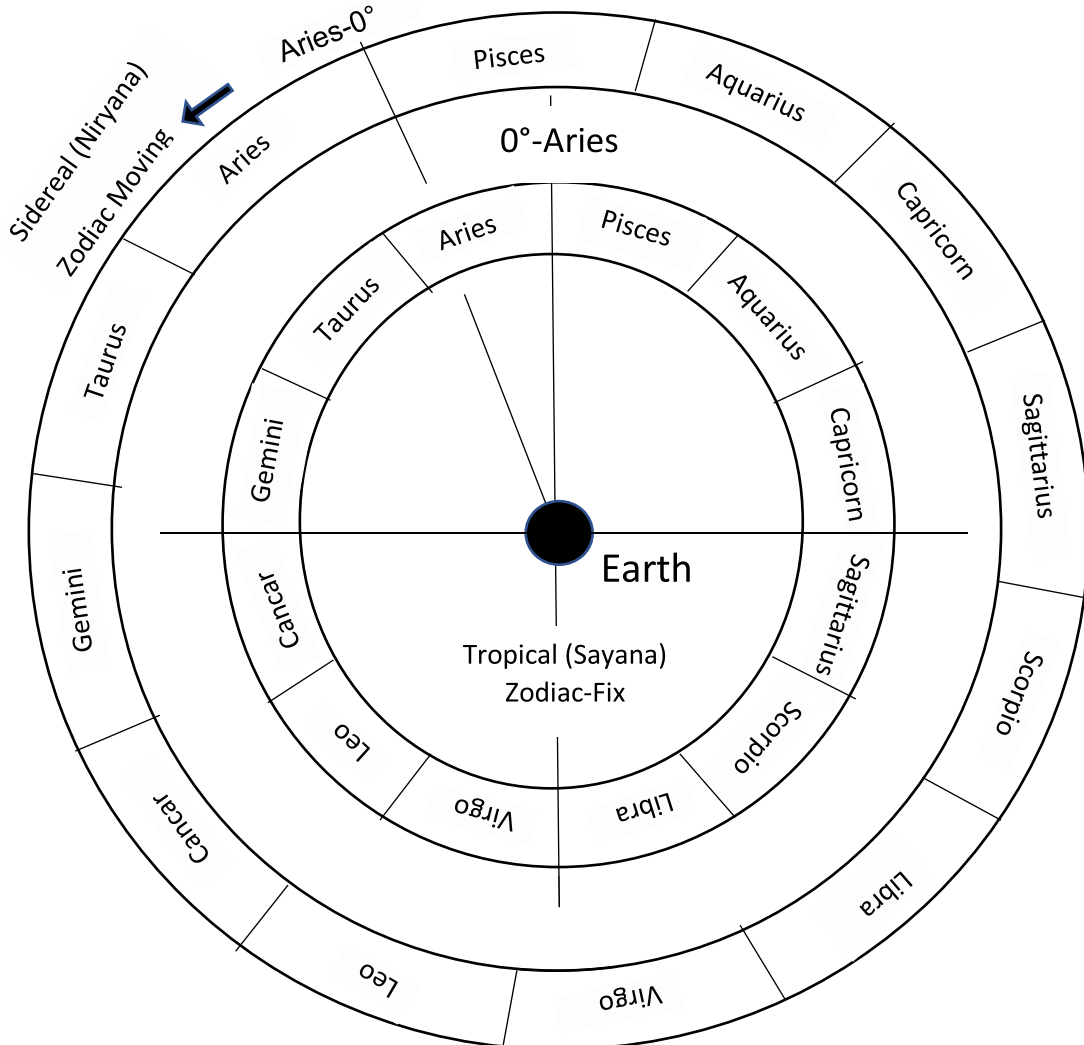

Figure-6

Famous astrologers have their own different Ayanamsa's. For example-

Sl No	Astrologer	Ayanamsa	Date
1	Lahiri Ayanamsa	24°:12':54''	1-09-2025
2	Raman Ayanamsa	22°:46':16''	1-09-2025
3	K P Old Ayanamsa	24°:07':14''	1-09-2025
4	K P New Ayanamsa	24°:07':30''	1-09-2025

5	Khullar Ayanamsa	24°:12':16"	1-09-2025
---	------------------	-------------	-----------

Due to different Ayanamsa an error of around 30 days (average) comes in Mahadasha calculations.

Nirayana (Sidereal) Zodiac with Geo-centrism Solar system:

Earth as the centre of the World. Earth's north pole is upwards.

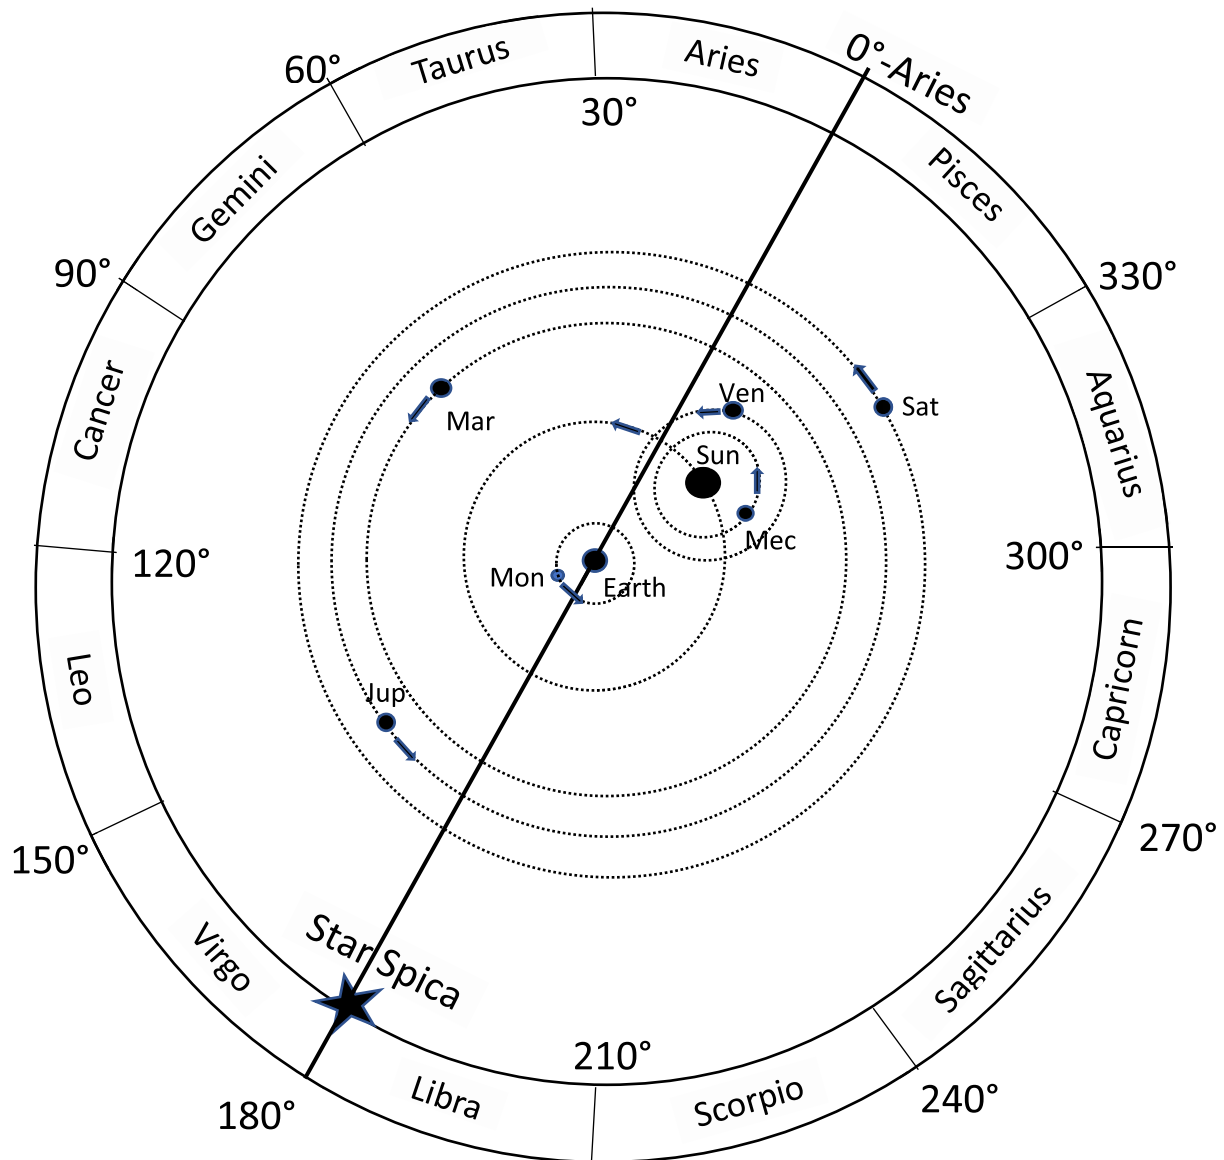

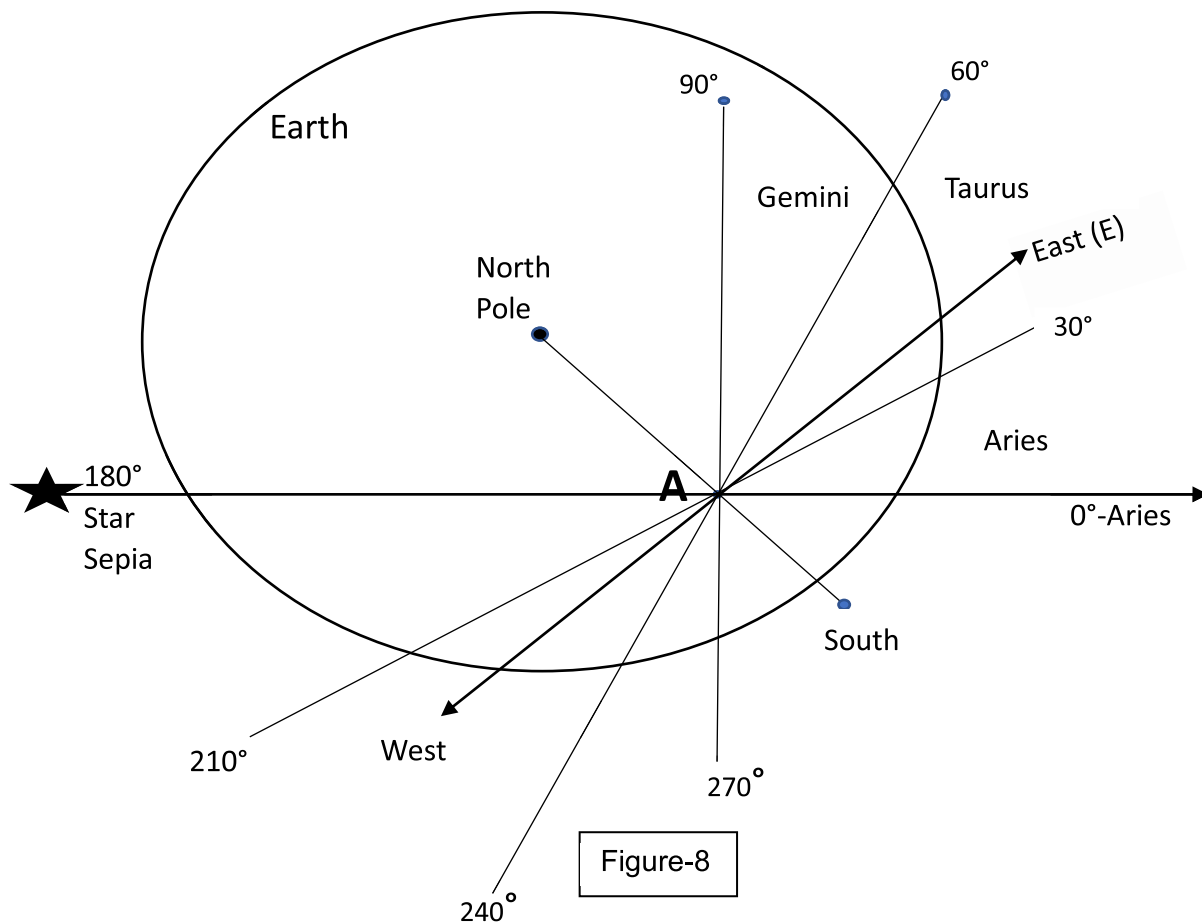

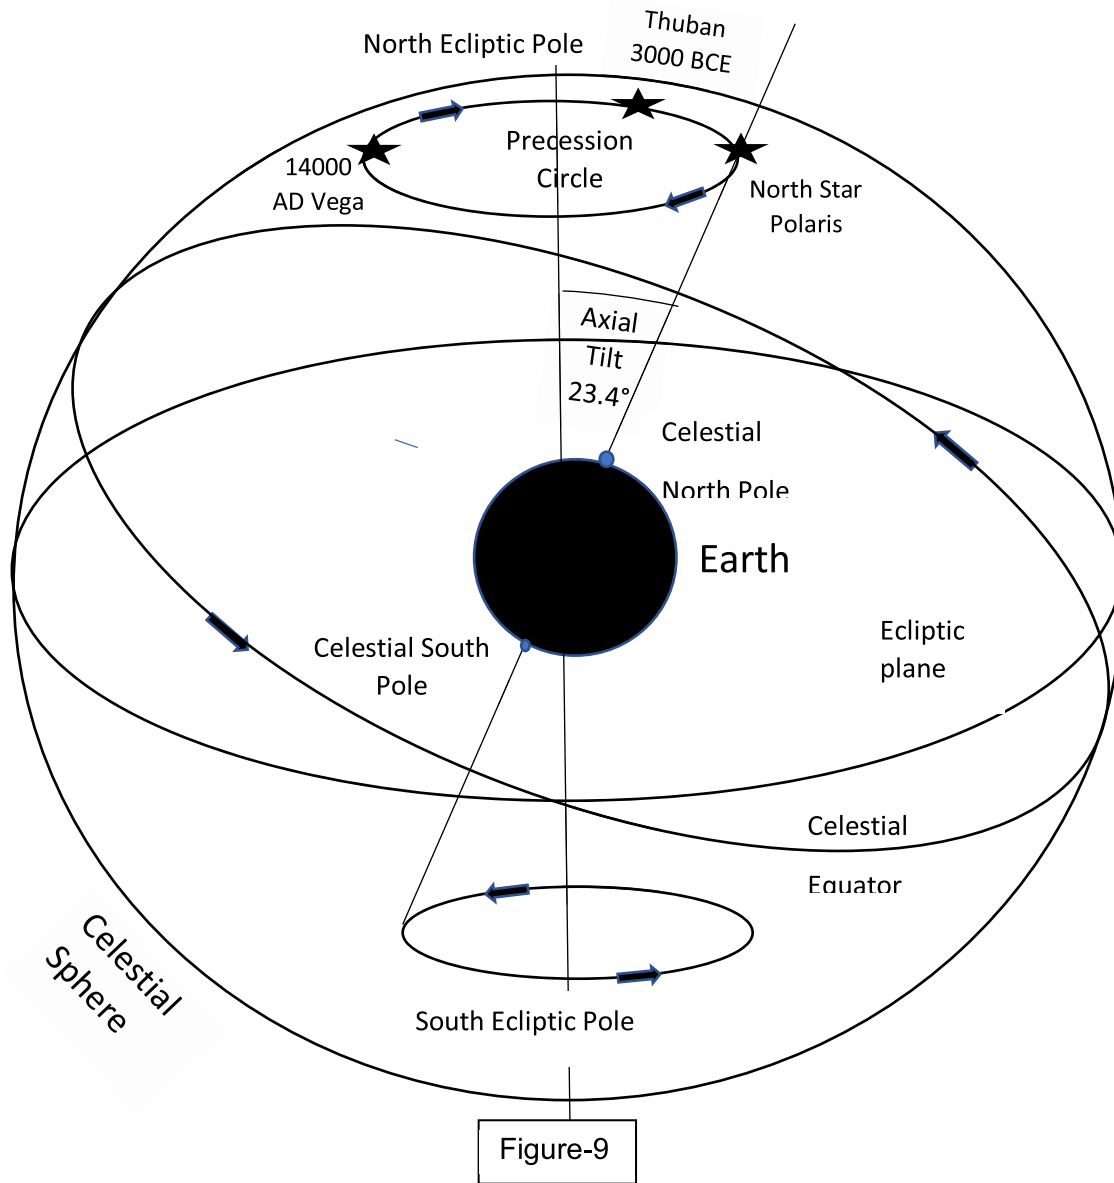

Figure-7

Ascendant and its degree- A child is born at Birth Place A, Birth Time is B, and Birth Date is C for the North Hemisphere of the Earth. Line between star Spica and Aries 0° passes from the birth place A (on the surface of the Earth) of the child. In this diagram degrees of E (East) are the degrees of Ascendant. Degrees of E (East) are between 30 degree and 60 degrees i.e., Taurus. Taurus is the Ascendant sign. Degrees of E (East) are calculated with high accuracy.

Precession- The Earth precession is a slow wobble of its rotational axis, much like a spinning top. The rotational axis is rotating clockwise, north pole of the Earth up. Earth is rotating around its own axis anti-clockwise, north pole of the Earth up. At the present rate of precession is around 50" per year. A complete cycle around the zodiac is 26000 years(approx.).

CHAPTER-B

A- Astronomical data required for Astrological calculations:

Heavenly bodies are always moving in the Zodiac. On the basis of the position of heavenly bodies in the zodiac, astrological calculations are done. For every human being, on the basis of their birth time, birth date and birth place, position (degrees) of heavenly bodies, the ascendant degrees are noted, for calculating the following astrological data:

- 1- True position (degrees) of planets and ascendant degrees.
- 2- Ascendant Chart.
- 3- From degrees of Moon- Constellation (nakshatra) and Dashas (periods).

There are twelve houses, twelve signs and nine planets in a Chart. Each house is allotted a sign. Planets are placed in a horoscope as per their position in the zodiac at birth time. Degrees of planets are calculated as per their position in the zodiac, as per center of the Earth. Degrees of ascendant are calculated as per birth place of child on surface of the Earth.

In a chart, each house, each sign and each planet have their own characteristics. On the basis of these characteristics each house capacity, goodness, shortcoming and remedies are studied. The sign in the first house is called ascendant sign and its lord is called ascendant lord. Twelve types of ascendant signs are Aries-ascendant, Taurus-ascendant, Gemini-ascendant, Cancer-ascendant, Leo-ascendant, Virgo-ascendant, Libra-ascendant, Scorpio-ascendant, Sagittarius-ascendant, Capricorn-ascendant. Aquarius-ascendant and Pisces-ascendant (Figure-22 & 23).

There are many Apps available on Google Play Store for making horoscopes, example Astro Sage Kundli. With the help of these apps, we can get necessary astrological data for studying horoscopes. If anyone wants to learn how to make horoscopes, there are many books available on this subject too.

B- Houses and their Characteristics- Basic characteristic of each house and the subjects to be studied with respect to each house are as given below (Figure-12):

- 4- Fourth House- Mother, Property, Vehicle, Peace of mind.

- 5- Fifth House- Education, Intelligence, Children.
- 6- Sixth House- Sickness, Enemies, Court cases, Debt.
- 7- Seventh House- Marriages, Personal relations, Relationships.
- 8- Eighth House- Sorrows, Obstacles.

H- Aspects of Planets (Figure-24 to 27):

Just as a planet influences the house in which it is situated, similarly that planet influences the houses on which it has its aspects. Aspects of planets are as follows:

- 1-Sun aspects the seventh house from where it is situated.
- 2-Moon aspects the seventh house from where it is situated.
- 3-Mercury aspects the seventh house from where it is situated.
- 4-Venus aspects the seventh house from where it is situated.
- 5-Mars aspects fourth house, seventh house and eighth house from where it is situated.
- 6-Jupiter aspects fifth house, seventh house and ninth house from where it is situated.

7-Saturn aspects third house, seventh house and tenth house from where it is situated.

I- Based on the experiences of their observations for decades many scholars have found that the position of planets at different places in Nirayana Zodiac give results, as follows (Figure-13):

1-Sun-

- a- When the Sun in the zodiac is between 0° to 30° (Aries), then the Sun gives the results of exalted position.
- b- When the Sun in the zodiac is between 120° to 150° (Leo), then the Sun gives good results.

- c- When the Mars in the zodiac is between 90° to 120° (Cancer), then the Mars gives bad results.

4-Mercury-

- a- When the Mercury in the zodiac is between 150° to 180° (Virgo), then the Mercury gives the results of exalted position.
- b- When the Mercury in the zodiac is between 60° to 90° (Gemini) and 150° to 180° (Virgo), then the Mercury gives good results.
- c- When the Mercury in the zodiac is between 330° to 360° (Pisces), then the Mercury gives bad results.

4-Jupiter-

- a- When the Jupiter in the zodiac is between 90° to 120° (Cancer), then the Jupiter gives the results of exalted position.
- b- When the Jupiter in the zodiac is between 240° to 270° (Sagittarius) and 330° to 360° (Pisces), then Jupiter gives good results.
- c- When the Jupiter in the zodiac is between 270° to 300° (Capricorn), then Jupiter gives bad results.

6-Venus-

- a- When the Venus in the zodiac is between 330° to 360° (Pisces), then the Venus gives the results of exalted position.
- b- When the Venus in the zodiac is between 30° to 60° (Taurus) and 180° to 210° (Libra), then the Venus gives good results.
- c- When the Venus in the zodiac is between 150° to 180° (Virgo), then the Venus gives bad results.

7-Saturn-

- a- When the Saturn in the zodiac is between 180° to 210° (Libra), then the Saturn gives the results of exalted position.
- b- When the Saturn in the zodiac is between 270° to 300° (Capricorn) and 300° to 330° (Aquarius), then the Saturn gives good results.
- c- When the Saturn in the zodiac is between 0° to 30° (Aries), then the Saturn gives bad results.

J- Retrograde planets (Figure-17 & 18):

Retrograde motion is an apparent change in the movement of the planet through the sky. It is not real; the planet does not physically start moving backwards in its orbit. It just appears to do so because of the relative positions of the planet & Earth and how they are moving around the Sun.

When a planet becomes retrograde in the transit horoscope, then as long as the planet is in retrograde state, it results in delay of completion of work]. Scholars have different opinions on retrograde planets in the Ascendant Chart.

K- Combust planets (Figure-14 to 16):

Planets are combusted when they come close to the Sun at certain degrees. Scholars have different opinions on the degrees at which a planet is combust i.e., how much away from the Sun in degrees, a planet is combust. On average, a planet 12° before to 12° after the Sun can be taken as combust. In the case of the Moon, 30° before to 30° after

the Sun can be taken as combust. How much percent a planet is combust, is calculated as per the difference between the degrees of the Sun and the combust planet.

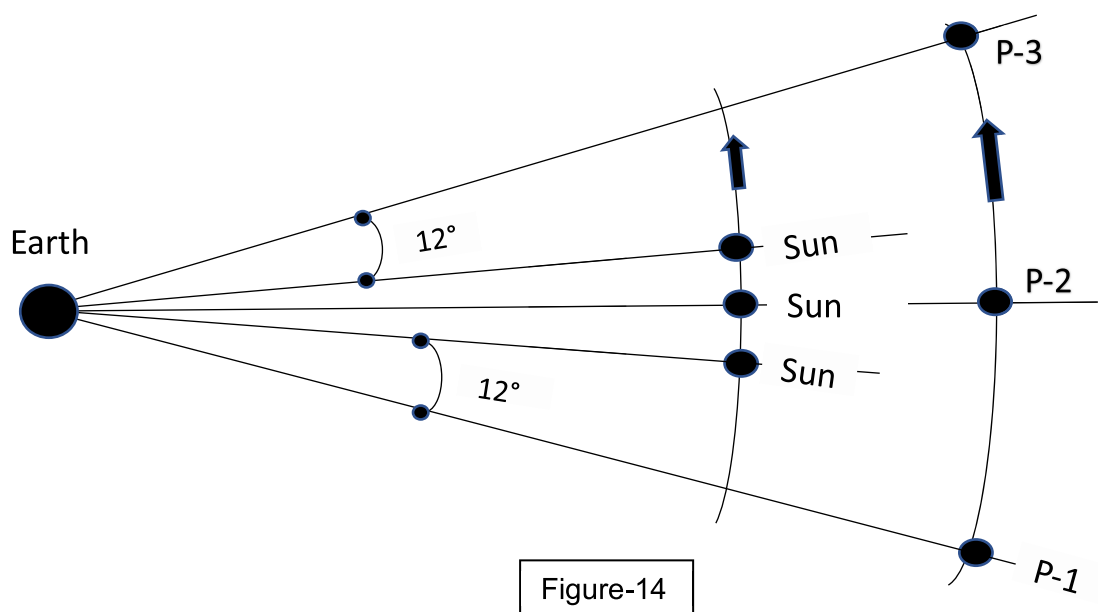

The reason for this is, that the gravitational force of the Sun is very-very high in comparison to the planets. In transit whenever a planet comes close to the Sun, the effect of gravitational force of that planet reduces due to the Sun's excessive gravitational force. When the degrees of the Sun become equal to the degrees of the planet, the effect of that planet's gravitational force nullifies.

In the transit horoscope, if Mahadasha lord or Antardasha lord is combust, then work hard during the combust period.

In the Ascendant Chart, if the lord of the first house, fourth house, fifth house, seventh house, ninth house and tenth house are combusted, then do astrological remedies. When the lords of the remaining houses are combusted, then during the period of their Mahadashas do astrological remedies after testing the gems to wear.

L- Combustion of Planets (Outer side)- Mercury and Venus-

Mercury and Venus are on the outer side of the Sun. The planet is moving faster than the Sun.

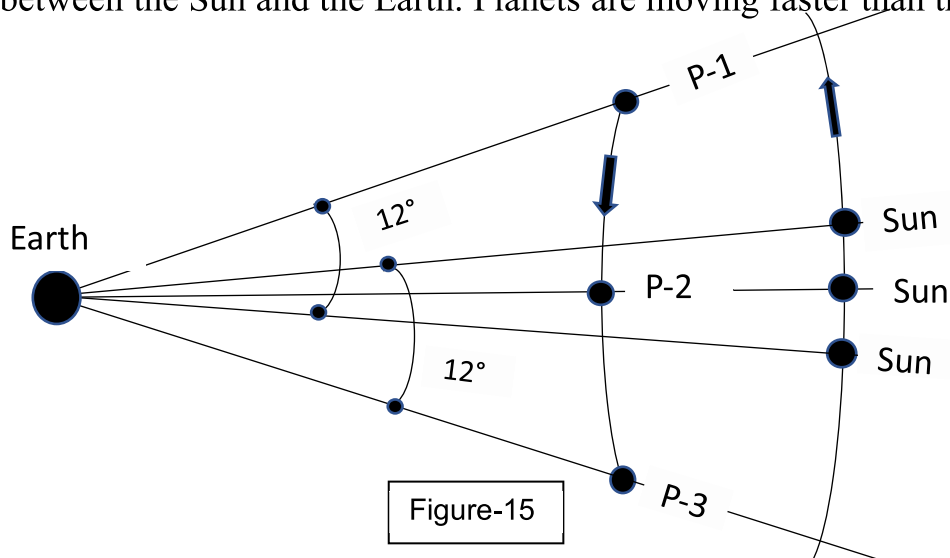

a- P-1: Combustion of the Planet started. Angular difference between the Sun and the Planet is less than 12°

b- P-2: Combustion of Planet is full. Angular difference between the Sun and the Planet is 00°

c-P-3: Combustion of Planet Finished. Angular difference between the Sun and the Planet is more than 12°

M- Combustion of Planets (Inner side) Mercury and Venus- Mercury and Venus are in between the Sun and the Earth. Planets are moving faster than the Sun.

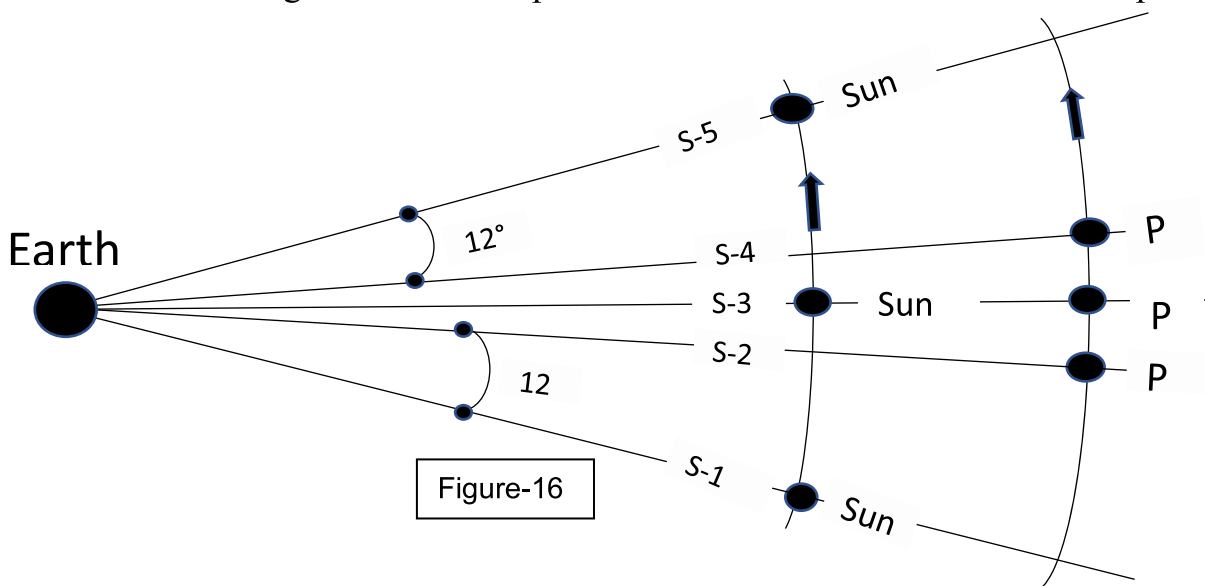

a- P-1: Combustion of Planet (P) started. Angular difference between the Sun and the Planet is less than 12° .

b- P-2: Combustion of Planet (P) Is full. Angular difference between the Sun and the Planet is 00° .

c- P-3: Combustion of Planet (P) Finished. Angular difference between the Sun and the Planet is more than 12° .

N- Combustion of Planets (P)- Mars, Jupiter and Saturn-

The Sun is moving faster than the planet. The Sun is in between Earth and planet.

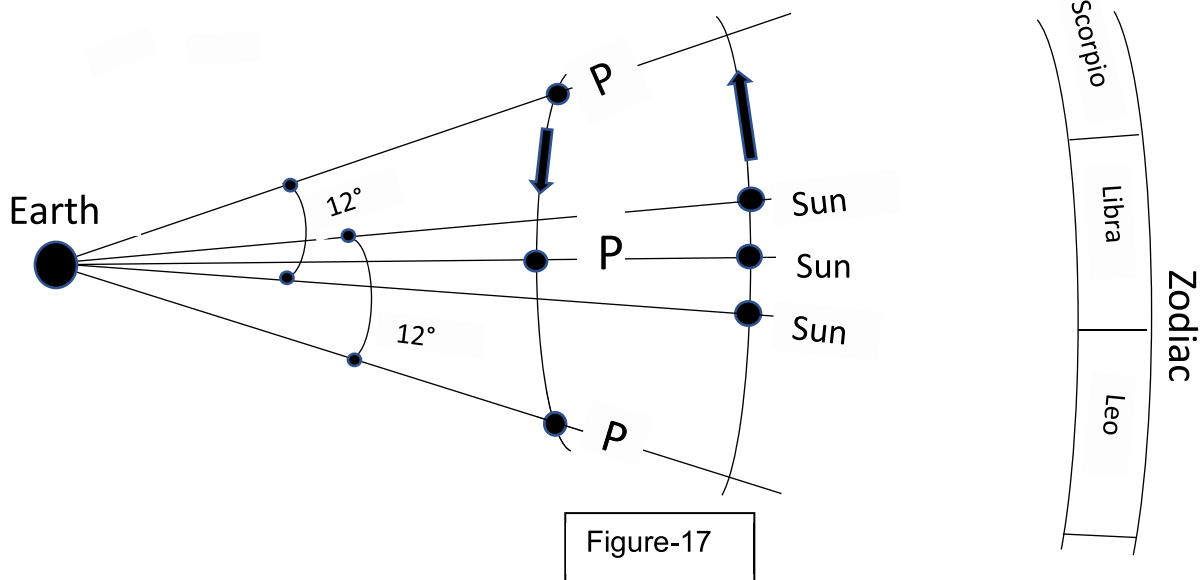

a- S-1: Combustion of Planet (P) started. (S-1 & S-2) Angular difference between the Sun and the Planet is less than 12° .

b- S-3: Combustion of Planet (P) Is full. (S-3) Angular difference between the Sun and the Planet is 00° .

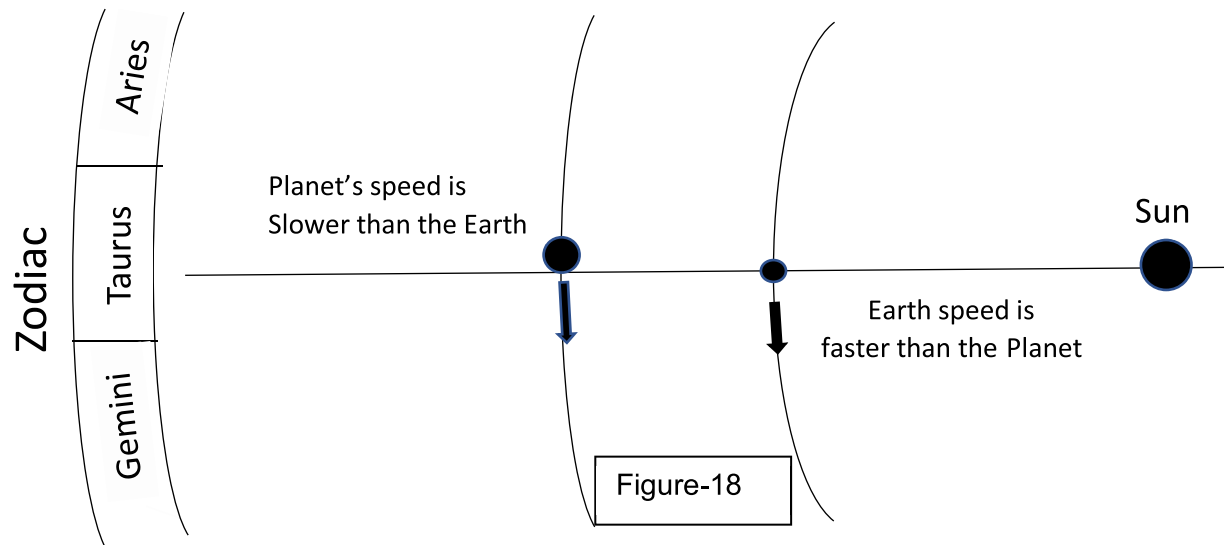

c-S-5: Combustion of Planet (P) Finished. (S-4 & S-5) Angular difference between the Sun and the Planet is more than 12° .

O- Retrograde motion of planets, Mercury and Venus- When Mercury and Venus are revolving around the Sun from outer side (away from the Earth), they move in forward motion and rotate in clockwise direction in the Zodiac i.e., Aries to Taurus, Taurus to Gemini and so on. When Mercury and Venus are revolving around the Sun from inner side (in between the Sun and the Earth), then they move in retrograde motion and they rotate in anti-clockwise direction in the Zodiac i.e., Scorpio to Libra, Libra to Leo and so on.

P- Retrograde motion of planets, Mars, Jupiter and Saturn- The Earth and planets are rotating around the Sun in clockwise direction. The rotational speed of the Earth is more than Mars, Jupiter and Saturn. When the Earth and Mars/ Jupiter / Saturn (either or all) are rotating on the same side of the Sun, it appears in the sky that these planets are rotating backwards in the zodiac due to faster speed of the Earth than the planets. Retrograde motion is an apparent change in the movement of the planet through the sky.

It is not real; the planet does not physically move backwards in its orbit. It just appears to do so, because of the relative positions of the planet and Earth in the Zodiac.

4. Sign
5. Varna
6. Yoni

S- Major Period (Mahadasha):

Many unknown scholars have done hard penance throughout their lives to find out the years of Mahadasha of the planets. It has taken a very long time to complete this difficult task. Only then the duration of years of planets Mahadasha can be known.

There are more than 40 types of Mahadashas. Most common are Vimshottari, Ashtottari, Yogini, Kala chakra, Chara dasha etc. Vimshottari Mahadasha is most popularly used and is believed to be the most accurate by astrologers. Vimshottari Mahadasha is taken for calculations in this book.

There are five types of dasas; Mahadasha, Antardasha, Pratyantardasha, Sukshmadasha and Pranadasha. If the time of birth is accurate, then only Pratyantardasha, Sukshmadasha and Pranadasha can be studied.

Vimshottari Dasha:

a- Vimshottari Mahadasha is calculated from the degrees of the Moon. Every planet has its own period of Mahadasha and represent one constellation, which are, as follows:

- 1- Ketu ----- 7 years
- 2- Venus----- 20 years
- 3- Sun----- 6 years
- 4- Moon----- 10 years
- 5- Mars----- 7 years

- 6- Rahu----- 18 years
- 7- Jupiter----- 16 years
- 8- Saturn----- 19 years
- 9- Mercury----- 17 years

9 Number Constellation Total=120 years

Angular movement of Moon to cover 9 number of constellations is $(13^{\circ}-20')$ x9= 120°

Total number of constellations is 27 (9x3)

For 27 number of constellations, Mahadasha is $120 \times 3 = 360$ years.

For 27 number of constellations, Moon's angular movement is $120^{\circ} \times 3 = 360^{\circ}$

One revolution of the Moon around the Earth.

- b-** At all times, everyone is under the influence of Mahadasha, Antardasha etc.
- c-** If there is an error of a few minutes in noting the birth time, then the results of Pratyantardasha, Sukshmadasha and Pranadasha cannot be analysed.
- d-** The results of Mahadasha are known from the Ascendant Chart.
- e-** The results of Antardasha are known from the Dasha Chart.
- f-** In the Transit horoscope the planet of Mahadasha and Antardasha are studied with more priority.
- g-** Mahadasha—9 number planets—120 years of dasha— 120° Moon's movement.
- h-** Antardasha- -- $9 \times 9 = 81$ numbers----- 120 years.
- i-** Pratyantardasha— $9 \times 9 \times 9 = 729$ numbers----- 120 years.
- j-** Sukshmadashs— $9 \times 9 \times 9 \times 9 = 6561$ numbers-----120 years.
- k-** Pranadasha---- $9 \times 9 \times 9 \times 9 \times 9 = 59049$ numbers-----120 years.
- l-** Smallest Pranadasha is of Sun/Sun/Sun/Sun/Sun, only 19 min. and 26.4sec.
- m-** Longest Pranadasha is of Venus/Venus/Venus/Venus/Venus, of 5 days and 13 hours.
- n-** Smallest Sukshmadasha is of Sun/Sun/Sun/Sun, of 6 hours, 28 min. and 48 sec.
- o-** Longest Sukshmadasha is of Venus/Venus/Venus/Venus, of 33 days and 7.92 hours.

T- Antardasha (Sub-period):

Make a new chart, put the planet of Mahadasha in the first house along with its sign. Accordingly mark the other planets with their signs of the Ascendant Chart in this new chart. The results of Antardasha are studied from this chart. Duration of periods of Mahadasha, Antardasha, Pratyantardasha etc. can be obtained from the Astro Sage Kundli app. or any other app of astrology from Google Play Store.

V- Reasons for errors in Astrological calculations:

- 1- Astrologers have given different-different Ayanamsa, due to which there is a difference in the calculation of Mahadasha.

Ayanamsa in July, 2023

- a- Lahiri----- $24^{\circ}-11'-9''$
- b- Raman----- $22^{\circ}-44'-30''$
- c- K.P. Old-- $24^{\circ}-5'-29''$
- d- K.P.New-- $24^{\circ}-5'-45''$
- e- Khullar----- $24^{\circ}-10'-31''$

Neglecting Raman Ayanamsa there is a difference of around 5' (5 minutes) in various Ayanamsa's.

Moon- $120^{\circ}=120$ years of Mahadasha

$1^{\circ}=1$ year= 365.25 days of Mahadsha

$5'= (365.25 \times 5)/60 = 30.44$ days of Mahadsha

An error of 30.44 days (average) in Mahadasha calculation, due to different Ayanamsas.

- 2- In the birth place, the longitude of the entire city is taken. Whereas every place in the city has a different longitude. This leads to some error in the calculation of degrees of ascendant. If the degrees of ascendant are on the border of two zodiac signs, then the horoscope should be studied from the ascendant of both the signs. If degrees of ascendant are more than 29° or less than 1° , then study the horoscope with both zodiac signs (Example-13).
- 3- If there is an error of one minute in noting the birth time of a child. Then how many days of error will be in calculation of Mahadasha?
The average time period of 9 number of constellations is 9 days, which is equal to 120 years of Mahadasha.
 $9 \text{ days} = 120 \text{ years of Mahadasha}$
 $9 \times 24 \times 60 \text{ minute} = 120 \times 365.25 \text{ days of Mahadasha}$
 $1 \text{ minute} = (120 \times 365.25)/9 \times 24 \times 60 = 3.38 \text{ days of Mahadasha.}$
When there is an error of one minute in noting the birth time, then there is an error of 3.38 days in Mahadasha.
- 4- Scholars have different opinions on which moment is considered as the birth time of the child. If we consider the different opinions of all scholars, there will be a difference of around 5 minutes in the birth time. Doctors say that, usually during the birth of a child, their attention is on the child and the mother. After everything is fine, they (Doctors) subtract 15-20 minutes from that time and enter the birth time in the records.
- 5- In astrology many scholars have different opinions on the same topic. Studying astrology requires a great deal of hard work, experience and patience.

- 6- Horoscopes are studied on an individual basis. But many people read about their future in newspapers, magazines etc. on the basis of their birth dates, Moon sign, Sun sign, first letter of their name etc., which usually come inaccurate.
- 7- Nine planets, twelve zodiac signs, twelve houses and 27 constellations are considered for the analysis of the horoscope. But there is no place for the Earth in the horoscope. It means that what impact of Earth has on the horoscope is not known. Sometimes analysis of horoscopes comes out to be inaccurate. Perhaps the reason for this may be not considering the influence of the Earth. Research is needed.
- 8- Calculating degrees of ascendant:
 - 1- It is easy to find out the degrees of the ascendant of a child born between latitude 0° to 45° North and 0° to 45° South.
 - 2- It is slightly tough to calculate degrees of ascendant of a child born between latitude 45° to 66° North and 45° to 66° South. Hence calculate degrees of ascendant carefully and check twice.
 - 3- It is tough to calculate degrees of ascendant of a child born above latitudes 66° North or 66° South. Hence calculate degrees of ascendant very carefully and check thrice.
- 9- Many countries have established different time zones for different locations in their country. In addition to this they made changes in summer time and winter time for daylight saving. Due to different time zones, there is a possibility of errors in preparing horoscopes of babies born in these countries. So, prepare horoscopes with caution.
- 10- Some scholars take degrees of true Rahu, while others take degrees of mean Rahu in a horoscope. There is often a difference between the degrees of true Rahu and mean Rahu. In transit when Rahu changes its zodiac sign, it is difficult to decide which zodiac sign actually is Rahu (Example-12). Research is required.
- 11- Due to the above reasons, it becomes difficult to study the Pratyantardasha, Sukshmadasha, Pranadasha and Divisional charts of a horoscope.
- 12- When the ascendant and planets are changing zodiac signs, do analysis of horoscopes carefully.

Example-12:

Birth date- 17-12-1995	Birth time- 12.50 AM	Birth place- New Delhi
Lagna- 8°-06'	True Rahu- 00°-51' (Virgo)	True Ketu-00°-51' (Pisces)
	Mean Rahu-29°-26'(Libra)	Mean Ketu-29°-26'(Aries)

: Ascendant Chart: Mean Rahu:

: Ascendant Chart: True Rahu:

There are two different types of degrees of Rahu and Ketu. Some scholars take degrees of True Rahu while others take degrees of Mean Rahu in a horoscope. There is often a difference between the degrees of True Rahu and Mean Rahu. In transit when Rahu changes its zodiac sign, it is difficult to decide which zodiac sign Rahu actually is. In the above example also Rahu and Ketu are in different houses. It will be appropriate to study the Ascendant Charts with both True Rahu chart and Mean Rahu chart

Analyse the Mahadasha of Rahu and Ketu from both the charts in such cases.

Rahu Mahadasha--	12-12-2005 to 12-12-2023
Ketu Mahadasha--	12-12-2075 to 12-12-2082

Analyse the Antardasha of Rahu and Ketu in the Mahadashas of other planets from the both charts.

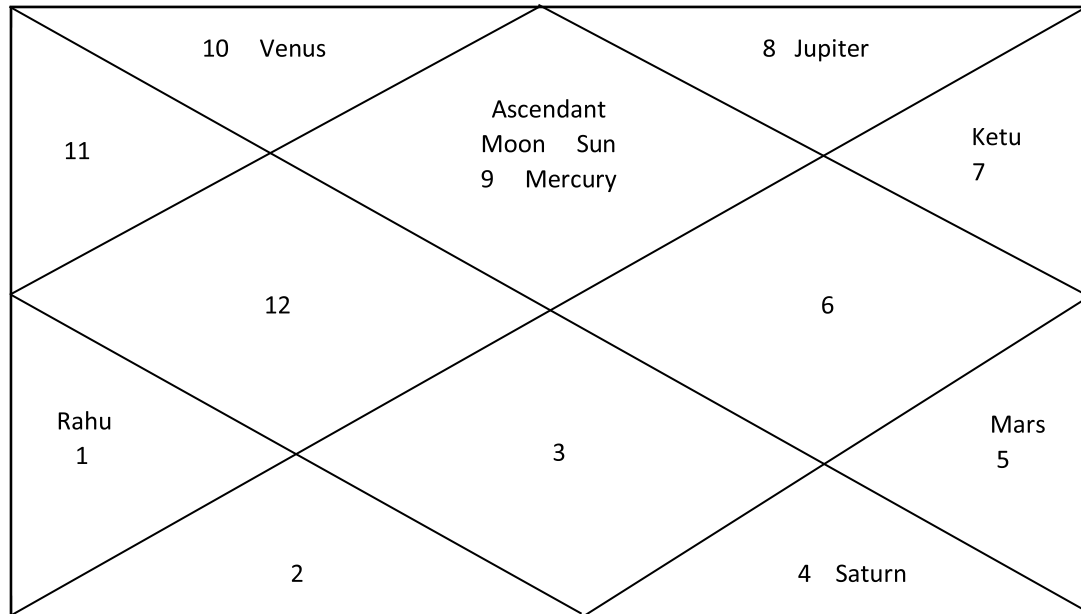

Mahadasha	Antardasha	Dates
Mars	Ketu	9-06-2003 to 6-11-2003
Rahu	Rahu	12-12-2005 to 24-08-2008
Rahu	Ketu	12-06-2016 to 30-06-2017
Jupiter	Ketu	18-11-2030 to 24-10-2031
Jupiter	Rahu	18-07-2037 to 12-12-2039
Saturn	Ketu	24-08-2045 to 3-10-2046
Saturn	Rahu	24-07-2053 to 30-05-2056

: Ascendant Chart at birth time 7-34 AM:

- 1- At birth time 9.33 AM, degrees of Ascendant house are 29°-45' and the ascendant sign is Sagittarius.
- 2- At birth time 9.34 AM, degrees of Ascendant house are 00°-01' and the ascendant sign is Capricorn.
- 3- Degrees of Moon are 00°-06' in Sagittarius sign, which is on the border of sign Sagittarius and Capricorn

Analyse horoscopes from both signs, Sagittarius and Capricorn. One chart will reveal a greater number of characteristics in the personality of the person. That chart will be correct. Analyse the Transit Chart from both signs, Sagittarius and Scorpio.

If the ascendant sign is Sagittarius, this person will have characteristics of planets Jupiter, Moon, Sun and Mercury in his personality.

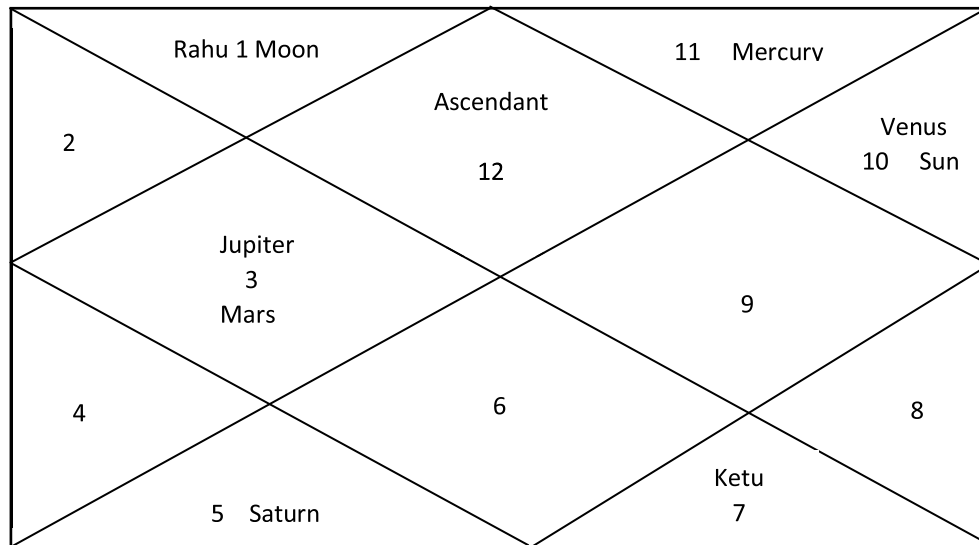

If the ascendant sign is Capricorn, this person will have characteristics of planets Saturn and Venus in his personality.

A lot of patience and hard work is required to correctly analyse such types of horoscopes.

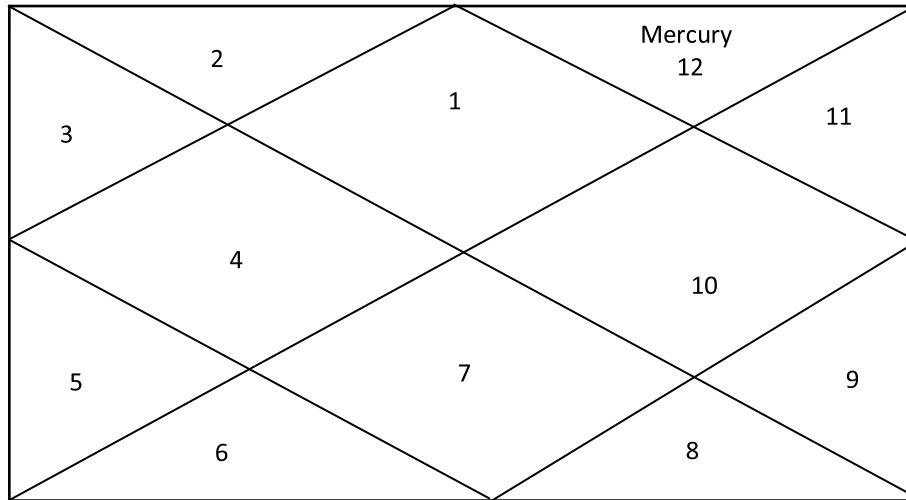

Due to different Ayanamsa and errors in noting correct birth time, it becomes difficult to prepare the correct horoscope in such cases, when the ascendant sign and planets are on the border of two signs.

Example-14:

: Ascendant Chart:

: Transit Chart:

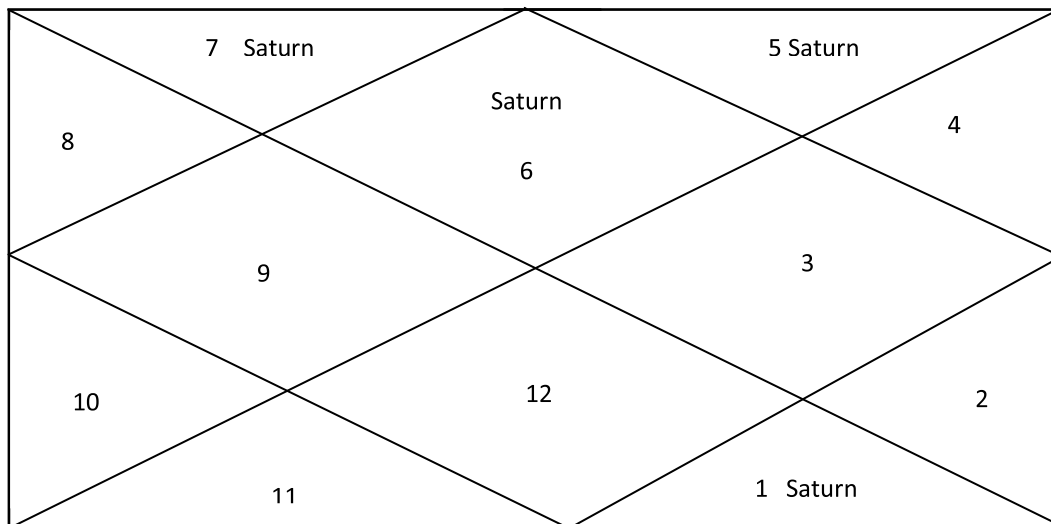

When, this person will run Mahadasha of Mercury and in Transit Chart Mercury will transit in Pisces sign (twelfth house). Mercury is debilitated in Pisces sign. Take following cautions:

CHAPTER-F

A- Karamas (Deeds):

Example-

A-1- Mr A spent 12 hours with his friend Mr B. When Mr A returned home, Mr A felt that the time spent with Mr B was extremely sweet. As if 12 hours had passed in just one minute.

A-2- Mr A spent 12 hours with his friend Mr C. When Mr A returned home, Mr A felt that the time spent with Mr C was sweet. As if 12 hours had passed in 3 hours.

A-3- Mr A spent 12 hours with his friend Mr D. When Mr A returned home, Mr A felt that the time spent with Mr D was good. As if 12 hours had passed in 6 hours.

A-4- Mr A spent 12 hours with his friend Mr E. When Mr A returned home, Mr A realised that the time spent with Mr E was average. As if 12 hours had passed in 9 hours.

A-5- Mr A spent 12 hours with his friend Mr F. When Mr A returned home, Mr A realised that the time spent with Mr F was sweet and sour. As if 12 hours had passed in 12 hours.

A-6- Mr A spent 12 hours with his friend Mr G. When Mr A returned home, Mr A realised that the 12 hours had turned into 18 hours, because of the tension from the argument with Mr G.

A-7- Mr A spent 12 hours with his friend Mr H. When Mr A returned home, Mr A realised that the 12 hours seemed like 30 hours, because of the tension between him and Mr H, due to confusions and arguments.

A-8- Mr A spent 12 hours with his friend Mr I. When Mr A returned home, Mr A realised that there were arguments, quarrels and some scuffles with Mr I, due to which Mr A felt extremely stressed and his mind was still upset about it. It seemed like years, instead of just 12 hours.

1- The time which passes quickly, is a good time.

2- The time which passes slowly, is a difficult time.

3- The time which seems to take years to pass, is a bad time.

4- Lust, anger, greed, attachment, arrogance, jealousy, pride, hatred, fear, laziness, deceit, stubbornness etc. are in all human beings, even in a Saint (Sadhu). But a Saint, due to his maturity, keeps the environment of A-1, A-2 and A-3 around them. He under compulsion goes to A-4 for a short period. Saint completely abandons the circumstances that lead to A-5, A-6, A-7 and A-8. Thus, Saint keeps himself always peaceful and happy.

5- By making some efforts an ordinary human-being can also increase his level of peace and happiness. By using his maturity, he keeps the environment of A-1, A-2, A-3 and A-

4 around him and under compulsion goes to A-5 and A-6 for a short time. Completely abandon the circumstances that lead to A-7 and A-8. With this he will gradually start attaining **self-realization**.

6- By gaining **self-realization** and improving one's maturity, the degree of peace and happiness will increase in one's life. This will also gradually bring **inner peace** in life. With the increase in inner peace, one gradually purifies himself. With the increase in **self-purification**, gradually one begins to walk on the **path of truth**. After some time studying by contemplation, meditation and churn, one's **spirituality** begins to awaken.

7- Even the most difficult time can be made peaceful and happy, through contentment, compromise, restraint, sacrifice, harmony, understanding, caution, saintliness etc.

B- Destiny:

1- Destiny- Out of many, destiny mainly depends on four main factors.

- a- Incident/ Opportunity/ Desires
- b- Luck
- c- Karama (Deeds)
- d- Circumstances

Astrological science can study one's Luck i.e., one's time is going good or bad and guide one, about his/ her karmas.

2- Degree of Success/ Failure-

Incident/ Opportunity/ Desires +	Success	+1000% or more
		+500%
		+200
		+100%
Luck +		+50%
		+10%
Karama +	Failure	-10%
		-50%
		-100%
		-200%
		-500%
Circumstances +		-1000% or more

3- **Incident-** Every incident has its limits. Luck and karmas also have their limits. If the extent of an incident is so great that it exceeds the combined limits of luck and karmas, harm occurs.

4- **Circumstances-** Almost at the same time, at some distance two babies are born. One is born into a wealthy family, while the other is born into a very poor family. Why is there a vast difference in the luck of both babies, although astrological data of both babies are almost the same. The circumstances of both babies are different. Astrology cannot explain these different circumstances.

5- Major Incidents of the World:

- 1- Great oxygenation event- 2.4 billion years ago. Loss of most of the Earth's obligate anaerobes.
- 2- Ordovician Period- 490 to 443 million years ago. Earth's 86% of species lost.
- 3- Late Devonian- 375 million years ago. Earth's 75% of species lost.
- 4- Permian Period- 299 to 252 million years ago. Earth's 96% of species lost.
- 5- End of Triassic- 200 million years ago. Earth's 80% of species lost.
- 6- End of Cretaceous- 66 million years ago. Earth's 76% of species lost.
- 7- Toba Super eruption Indonesia- 75,000 years ago. Only 3000 to 10000 human adults left on the Earth.
- 8- Second world war- 1939 to 1945 AD- Millions of humans killed.

C- Theory of Karmas (Deeds):

1-Karmas are of two types-

- 1- Good Karmas (Good deeds).
- 2- Bad Karmas (Bad deeds).

A-Good Karmas (Deeds)- Sharing to others your fortune, happiness and good deeds.

B-Bad Karmas (Deeds)- Snatching away others fortune, happiness and good deeds.

Bad Deeds are of two types-

- 1- Bad deeds done out of necessity. If the Lion does not kill an animal, his family will die out of hunger.
- 2- Bad deeds done for the sake of fulfilling one's desires. There is everything in the house, yet one robs others.

2- Every creature on the Earth lives for three main things (out of many):

- 1- Survival- How to stay safe and survive.
- 2- Food.
- 3- Personal relations.

For food, all creatures need to eat Bio-cells of others creatures i.e., animals, plants and fungi. **There are three forms of deeds results:**

- 1- Sanchit Karmas (Accumulated Karmas)- Karmas whose results have not yet begun to be received.
- 2- Prarabdha- Combined results of past karmas and some present karmas.
- 3- Kriyamana Karma- Present karmas whose results will be received later.

Which species one will get in the next life, is determined by one's Karmas. Therefore, avoid committing so many sins that one ends up in a species that is not at all pleasing in the next life.

3- Conclusion: Do bad deeds in life, only if needed for survival. One must do greater good deeds than the necessary bad deeds done in one's life.

4- On the path of time- good deeds and bad deeds, sins and virtues, fortunes and misfortunes, happiness and sorrows, peace and unrest, troubles, joys etc., are interrelated into one another. To understand this, basic knowledge of following subjects are essential:

- 1- Astronomy
- 2- Astrology
- 3- Evolution of Universe
- 4- Evolution of Earth
- 5- Natural Environment
- 6- Evolution of life
- 7- Evolution of humans
- 8- Evolution of religions

When the basic knowledge of the above subjects is obtained, then the following subjects will be understood:

- A- Birth- death-rebirth.
- B- Soul
- C- Species
- D- Spirituality
- E- Almighty God

D- Evolution of Universe:

- 1- Big-Bang – Universe born, 13.8 billion years ago.

- 16- 50 to 35 million years ago- Simians split into Platyrrhini and Catarrhini
- 17- 35 to 20 million years ago- Catarrhini split into two super families- old world monkeys and ape (Hominoidea)
- 18- 20 to 16 million years ago- Hominidae split from the ancestors of the gibbon (lesser ape)
- 19- 16 to 12 million years ago- Hominidae (great ape ancestors) divided into Homininae and orangutan

24- Fossils and DNA confirm humans are one of more than 200 species belonging to the order of primates.

F- Natural Environment (natural living space):

The natural environment is all the things that exist in nature, such as animals, plants, water, air and sunlight. It also includes features like mountains, forests and rivers. The natural environment is important because it provides us with resources that we need to live.

Natural Living Space- Natural living spherical space is around -8 km below to + 8 km above sea level for all living beings. Ruppell's Vulture can fly up to 11.3 km. Humans are desperately searching for such type of Natural Living Space outside the Earth and spending lots of money on such projects.

G-Evolution of Human:

Humans and chimpanzees are believed to have diverged from a common ancestor roughly 5 to 7 million years ago, with brain size 250 cc to 450 cc. Human bipedalism, walking on two legs, emerged gradually over millions of years, with significant developments occurring between 7 to 4 million years ago. The earliest stone tools ever found are dated to 3.3 million years ago, however cut marks on bones by tools are dated to 3.39 million years ago.

Human brain size increased with passage of time. Homo habilis lived around 2.5 to 1.8 million years ago, brain size increased to 610 cc. Homo erectus lived around 1.9 million to 1,00,000 years ago, brain size increased to about 860 cc. Homo heidelbergensis lived around 6,00,000 years ago, brain size increased to around 1250 cc. Homo neanderthalensis lived around 4,00,000 to 40,000 years ago, with brain size around 1600 cc. Homo sapiens are living from 3,00,000 years to till now, brain size is around 1350 cc.

Humans are the only creature on the Earth whose brain has increased by around 3.5 times in 5 million years of time period. Increase in brain size developed mental power and analytical power of humans.

H- Earliest known genus homo is:

- 1- Ardipithecus- 5.8 million years ago.
- 2- Ardipithecus ramidus, Kenyanthropus platyops, Australopithecus anamensis, Paranthropus robustus, Homo heidelbergensis, Australopithecus africanus, Australopithecus afarensis, Homo erectus, Neanderthal, Denisovan etc.
- 3- Homo Sapiens evolved around 3,00,000 years ago in Africa and spread all over the world. The last ice age lasted until 11,700 years ago. After the last ice age Homo Sapiens found that they could control and breed certain plants and animals. Humans invested more time in producing food and in settling down. Slowly villages became towns and towns became cities.
- 4- 11,300 years ago- First cultivation of grains started with growing wild emmer.
- 5- 11,000 to 9,000 years ago- Domestication of sheep, goat and cow. Domestication of emmer wheat. Human settlement. Early undecorated and unglazed low fired pottery.
- 6- 9,000 to 6,000 years ago- Invention of the potter wheel. Irrigation and flood control started. Started sailing of boats, building of temples and use of light wooden ploughs.
- 7- The three major Human races, Negroid (Negro), Caucasoid (Europid) and Mongoloid were separated due to Geographic barrier. In the last 8,000 to 5,000 years, slowly, Globalization has broken the Geographic barriers.
- 8- 6,000 to 4,000 years ago- Domestication of wild ass and donkey. First civilization (Sumer), made wheeled vehicles. King Narmer gave birth to the World's first nation. Early dynastic period of Egypt. Sumerian writing- cuneiform script. Completion of the Great Pyramid. First domestication of camels. Use of a spoke wheel by horse.
- 9- In the theoretical case of perfect geographic isolation, (absence of genetic recombination by genic flux and hybridization) the three major races would have become three or more species in less than one million of years.

I- Evolution of religions:

Since ancient times and even today most creatures exhibit strange behaviour before and during natural events, as if they are seeing the presence of some invisible force. Jackals, monkeys, wolves, dogs etc., and many types of birds begin to make noise and start wailing. Burrowing creatures emerge from their burrows and exhibit strange behaviour. This has been there for millions of years. Humans also behaved similarly long ago. Human intelligence (thinking and understanding) has evolved over time. Humans have gradually come to understand many natural phenomena. Even today humans are trying

to understand many natural phenomena like what happens after death, the cycle of fortune and misfortune, the cycle of happiness and sorrow, soul, God etc.

Human burial started as early as 1,00,000 years ago. There is archaeological evidence that religion existed as early as 62,000 years ago. Signs of specific burial customs and cult rituals indicate that religion (or religious practices) began with these practices. In the beginning religion was a way to explain natural phenomena by ascribing power to super natural forces. After some period, religion was a way to provide a moral force to encourage cohesiveness and co-operation within society.

K-Religion:

Religions have been established by some Great person of a group or a group of people- for the benefit of that society, for smooth functioning of that society, for protection of that society, for growth of that society and as per needs of that society. People adopt religion from mind, intellect, body, desires, thoughts etc. and follow code of conduct, rituals, laws, rules and regulations, traditions, beliefs, faiths, sentiments, principles etc. of that religion.

Changes come in society due to new circumstances and needs with the passage of time. Science also provides new information through its new discoveries. Due to these reasons religious beliefs and traditions also undergo changes. As per time, adopting these changes is good in the interest of religion.

In ancient times, tribes had different religions. Over time, these religions coalesced into organised religions. Religion increased the numbers of people in groups, increasing solidarity and knowledge sharing. This sharing of knowledge allowed humans to evolve rapidly. Religion played an important role in human evolution in the past. Humans are the only religious creature on the Earth.

L- Birth-Death-Rebirth:

After studying only ascendant houses of 50 horoscopes, it will be known that Heavenly Bodies determine the nature of humans by birth. By deeply studying 300 horoscopes, it will be known that Heavenly Bodies determine the nature and to some extent fortunes and misfortunes of all humans.

When nature and to some extent the fortunes and misfortunes of all humans are pre-decided, it means humans have connections with their past life (before birth period). As

if, a Divine Power is observing, controlling and balancing all humans. Means there is a cycle of birth, death and rebirth.

No human being goes empty handed. They carry with them a record of their sin and virtues based on their good and bad deeds in their previous lives, these are reaped in the form of fortune and misfortune in their next life.

Today there are more than 8 billion humans on the Earth. If we examine the differences in fortune and misfortune of all humans at their birth time, we will find countless and limitless variations.

A Power that passes from one body to another body is called Soul. By studying the horoscope of a person, his nature and to some extent his fortunes and misfortunes can be known.

M- Soul:

The Soul is a power, which keeps on changing bodies on the path of time, from one body to another, from second body to third body, like this keeps on changing bodies. The soul present in any body is billions of years old. Every soul has changed countless bodies on the path of time. The soul will change countless bodies for billions of years and more.

Until the soul leaves the body, it carries the cycle of good and bad deeds. When the soul leaves the body, it carries the cycle of sin and virtue, based on the good and bad deeds done in the past lives. Almighty God sends the soul to take birth in a new body on the basis of sin and virtue, which the new body receives in the form of fortunes and misfortunes.

Maintain the purity of the soul. Do only necessary bad deeds and do as many good deeds as possible. Follow the Theory of Karmas. So that sweetness of every birth remains and keeps getting the desired births.

N- Species:

At present around 8.7 million species of plants and animals exist on the Earth. Only 1.2 million species have been identified. The populations of many species are decreasing over time. While populations of many species are increasing over time. Earlier the population of animals and birds in the forest was high, which is now decreasing. Earlier the population of human beings was low, which is now increasing rapidly.

Estimated Human population on time line:

O- Spirituality:

Spirituality is the study of one's life on the path of time and to improve it by good deeds. Spirituality is also the study of one's soul on the path of time and to improve the path of time by good deeds.

On the path of time- good deeds and bad deeds, sins and virtues, fortunes and misfortunes, happiness and sorrows, peace and unrest, troubles, joys etc., are interrelated into one another. The observer, controller and balancer of this is Almighty God. Almighty God balances birth-death-rebirth, species, fortunes-misfortunes, happiness and sorrows etc. of all living beings on the basis of their deeds. Knowledge of this interrelation can be gained through Spirituality.

P- Almighty God:

- 1- Out of many countless jobs, He is also the observer, controller and balancer of all Karma's (Deeds) of all species.
- 2- Every living being, except humans, lives their lives by following nature's laws. God provides the next birth to these living beings based on their deeds. Due to the development of intelligence, humans stopped following nature's laws. Humans live their lives based on rules made by themselves. God provides the next birth to human beings based on the good and bad karmas (deeds) done by them.
- 3- God determines the fortunes and misfortunes of all species on the basis of their deeds. The God also determines, on the basis of one's karmas, that one's soul will take birth in which species in the next life.

- 4- Study of astrology is a big link to understand karma's (deeds), to understand sin and virtue, to understand happiness and sorrows, to understand birth-death-rebirth, to understand soul-species and at the last go towards the Almighty God.

- 4- Spirituality
- 5- Human personal relations.

R- Conclusions:

- 1- All Heavenly Bodies are inter-connected with each other, through their gravitational forces. Karmas of all living beings at every moment of live are observed by Heavenly Bodies (including the Earth) through their gravitational forces.
- 2- Gravitational forces of moving Heavenly Bodies (including the Earth) at different points in the Zodiac, affect Human beings differently.
- 3- Heavenly Bodies whose gravitational force affects the Earth, have different characteristics in their gravitational forces.
- 4- These different characteristics of gravitational forces of Heavenly Bodies, affect the nature and behaviour of human beings, due to which they have different nature and behaviours.

How I reached here:

From the age of preschool, I saw my parents worshipping God in temples and in the home temple. Since then, faith in God grew and I have been striving to know and understand the divine power. Many kinds of bitter incidents continued to happen in life from preschool age, till the age of about 11 years. Due to which many kinds of deficiencies came in my life, like- lack of self-confidence, inferiority complex, lack of maturity, lack of communication, lack of decision-making ability, stammering, excessive stammering in front of strangers etc., which developed the feeling that I am nothing. As I grew older, my curiosity to understand the divine power grew even more. Wherever I could go, I visited the Temples, Churches, Buddhist Monasteries, Gurudwaras, Mausoleum etc., and paid my respects with reverence. I was born in November 1955. My hobby in palmistry began in 1975 and my hobby in astrology began in 1977.

Two devastating events occurred in my life within a span of approximately 18 months, which completely shook my life. The fire of understanding the divine power in life, which was smouldering occasionally, now flared up and started blazing. Through my hobbies of palmistry and astrology, I came into contact with thousands of people and gained insight into various situations of life. To deeply understand the cycle of good deeds and bad deeds, sins and virtues, fortunes and misfortunes, happiness and sorrows, peace and unrest etc., I continued to think deeply every day. Divine power is everywhere, but I couldn't find any source to understand it.

One evening in July 2007, I was waiting for a friend at Gandhi Park Dehradun, Uttarakhand, thinking about the life cycle. Suddenly the idea to understand the cycle of good deeds and bad deeds, sins and virtues, fortunes and misfortunes, happiness and sorrows, peace and unrest etc., struck me through Heavenly bodies (Astrology). It was as if the tip of the hair of the elephant's tail came into my hand. As the time passed, with the help of astrology, I found that the balancer of this cycle is the Almighty God. The Almighty God balances the cycle of all living beings on the path of time based on their good deeds and bad deeds. We do not achieve anything in our life by our own will. Whatever we achieve in our life is the result of our good deeds and bad deeds done in the past, and to some extent our present good and bad deeds. Astrology is very helpful in understanding this cycle.
